In this anthology of weird fiction, twenty-two authors share their harrowing visions of worlds shaped by the Yellow Sign, in stories and poems inspired by Robert W. Chambers's foundational works of weird horror. From the personal to the historic, from the macabre to the fantastic, the stories and poems gathered here illuminate new, unexpected realities shaped by the King in Yellow, under the sway of the Yellow Sign, or in the grip of madnesses inspired by their power. Authors included: Marc Abbott - Linda D. Addison - Meghan Arcuti - Greg Chapman - JG Faherty - Trevor Firetop - Patrick Freivald - Carol Gyzander - Todd Keisling - John Langan - Curtis Lawson - Adrian Ludens - Lisa Morton - Joseph S. Pulver, Sr. - Sarah Read - Kathleen Schneider - Ann K. Schwader - Darrell Schweitzer - J. Daniel Stone - Steven Van Patten - Tim Waggoner - Kaaron Warren Robert W. Chambers's classic work of weird fiction, The King in Yellow (1895), contained two stories that have exercised wide influence in the genre. "The Repairer of Reputations" introduced the world to The King in Yellow, a play in two acts, banned for its reputed power to drive mad anyone who reads its complete text. Another story, "The Yellow Sign," used the experiences of an artist and his model to elaborate on the mythsos of the Yellow King, the Yellow Sign, and their danger to all who encounter them. In those tales Chambers crafted fascinating glimpses of a cosmos populated by conspiracies, government-sanctioned suicide chambers, haunted artists, premonitions of death, unreliable narrators-and dark, enigmatic occurrences tainted by the alien world of Carcosa, where the King rules in his tattered yellow mantle. In Carcosa, black stars rise and Cassilda and Camilla speak and sing. In Carcosa, eyes peer from within pallid masks to gaze across Lake Hall at the setting of twin suns.

Return to the dark, surreal world of Lenore, the cute little dead girl with a knack for unintentional mayhem and occasional wanton destruction in this second instalment, beautifully and painstakingly coloured by Roman Dirge himself.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L

Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Divine Stories is the inaugural volume in a landmark translation series devoted to making the wealth of classical Indian Buddhism accessible to modern readers. The stories here, among the first texts to be inscribed by Buddhists, highlight the moral economy of karma, illustrating how gestures of faith, especially offerings, can bring the reward of future happiness and ultimate liberation. Originally contained in the Divyavadana, an enormous compendium of Sanskrit Buddhist narratives from the early Common Era, the stories in this collection express the moral and ethical impulses of Indian Buddhist thought and are a testament to the historical and social power of narrative. Long believed by followers to be the actual words of the Buddha himself, these divine stories are without a doubt some of the most influential stories in the history of Buddhism.
