

M C Escher The Graphic Work

Make Believe: M.C. Escher for Kids (National Gallery of Victoria) is shortlisted in the CBCA Eve Pownall category for information books.

It was written to complement the Escher artworks shown at the Gallery but has an ongoing life of its own after the exhibition.

The book is well designed with a contents page and photographic representations of the illustrated work at the end. There is quite minimal, well-chosen written text in this sumptuous production. The illustrations do most of the work of communicating the life and art of 20th century Dutchman M.C.

Escher. Escher, or Maurits, as he is known in the book, lived in Italy for many years and was inspired by the landscape - built and natural - there. Make Believe is structured as a mixture of biography and art, with interactive activities for children and tangents into geometry and science based on Escher's work. Above all, it is a wonderful exploration and celebration of his art for primary-aged children.

Present the graphic work of the Dutch artist known for his often mathematically-inspired visual worlds filled with dimensional illusions. Take home one of the most cult artists in

history with this handy edition, presenting all known works of Hieronymus Bosch. Through full spreads and carefully curated details, the book surveys the artist's compositional scope as well as his most compelling, if disturbing, inventions, from horse-skulled harp players to devils on ice skates.

Introduction and explanation of each print by the artist.

M.C. Escher's complex, interlocking images of fish, birds, reptiles, and butterflies--known as tessellation drawings--made him one of the most popular artists of the 20th century. This clever, compact book lets readers explore eight of his famous drawings in two-sided jigsaw puzzles.

Their brilliant patterns will intrigue and entertain and, after the fun, the puzzles can be pressed back in the book for safe storage.

""Graphic Work"" presents over 80 of Escher's most interesting pictures selected by the artist himself. It includes Escher's commentaries on his work, which make his startling visual effects more easy to interpret. The book also features Escher's own account of his evolution as an artist. An authentic source book of high significance, it

offers the best introduction to the fantastic universe of the grand master of illusion.

All of the more than four hundred and fifty prints made by the popular graphic artist are reproduced and thoroughly discussed in an annotated study of Escher's unique visual exploration of time and space.

Meet the artist whose majestic breaking wave sent ripples across the world. Hokusai (1760-1849) is not only one of the giants of Japanese art and a legend of the Edo period, but also a founding father of Western modernism, whose prolific gamut of prints, illustrations, paintings, and beyond forms one of the most comprehensive oeuvres of ukiyo-e art and a benchmark of japonisme. His influence spread through Impressionism, Art Nouveau, and beyond, enrapturing the likes of Claude Monet, Berthe Morisot, Edgar Degas, Mary Cassatt, and Vincent van Gogh. Hokusai was always a man on the move. He changed domicile more than 90 times during his lifetime and changed his own name through over 30 pseudonyms. In his art, he adopted the same restlessness, covering the complete spectrum of Japanese ukiyo-e, "pictures of the floating world", from single-sheet prints of landscapes and actors to erotic books. In addition, he created album prints, illustrations for verse anthologies and historical novels, and surimono, which were privately issued

prints for special occasions. Hokusai's print series Thirty-Six Views of Mount Fuji, published between c. 1830 and 1834 is the artist's most renowned work and, with its soaring peak through different seasons and from different vantage points, marked the towering summit of the Japanese landscape print. The series' Under the Wave off Kanagawa, also known simply as The Great Wave, is one of the most recognized images of Japanese art in the world. This TASCHEN introduction spans the length and breadth of Hokusai's career with key pieces from his far-reaching portfolio. Through these meticulous, majestic works and series, we trace the variety of Hokusai's subjects, from erotic books to historical novels, and the evolution of his vivid formalism and decisive delineation of space through color and line that would go on to liberate Western art from the constraints of its one-point perspective and unleash the modernist momentum.

*****Anyone who loves to draw will be delighted by the contrasts and puzzles found in Escher's images. A large, removable, ready-to-color poster is included for would-be artists to create their own original work of art to display.

Essays, criticism, and performance scripts written between 1985 and 2003 by an artist whose artistic practice investigates and reveals the social structures of art and its

institutions. Andrea Fraser's work, writes Pierre Bourdieu in his foreword to Museum Highlights, is able to "trigger a social mechanism, a sort of machine infernale whose operation causes the hidden truth of social reality to reveal itself." It often does this by incorporating and inhabiting the social role it sets out to critique—as in a performance piece in which she leads a tour as a museum docent and describes the men's room in the same elevated language that she uses to describe seventeenth-century Dutch paintings. Influenced by the interdisciplinarity of postmodernism, Fraser's interventionist art draws on four primary artistic and intellectual frameworks—institutional critique, with its site-specific examination of cultural context; performance; feminism, with its investigation of identity formation; and Bourdieu's reflexive sociology. Fraser's writings form an integral part of her artistic practice, and this collection of texts written between 1985 and 2003—including the performance script for the docent's tour that gives the book its title—both documents and represents her work. The writings in Museum Highlights are arranged to reflect different aspects of Fraser's artistic practice. They include essays that trace the development of critical "artistic practice" as cultural resistance; performance scripts that explore art institutions and the public sphere; and texts that explore the ambivalent relationship of art to the economic and political interests of its time. The final piece, "Isn't This a Wonderful Place? (A Tour of a Tour of the Guggenheim Bilbao)," reflects on the role of museums in an era of globalization. Among the book's 30 illustrations are stills from performance pieces, some never before published.

Exploring the Infinite

Celebrates the use of optical illusion in art, presenting the importance and uniqueness of such work, discussing such artists Salvador Dal i, M.C. Escher, and Istv an Orosz.

M.C. Escher (1898-1972) is renowned for his ability to render the visions of his mind's eye. The visions themselves were remarkable for Escher, the skin of the visible world was nothing more than a piece of cloth that could be cut, folded, shaped, and rearranged in marvelous ways. A superb draftsman, he portrayed these otherworldly transformations of space within the familiar borders of a sheet of paper. The resulting images have become the favorite artworks of viewers around the world. *The Magic of M.C. Escher* does justice to this original artist's inventions. Escher's works--woodcuts, lithographs, and drawings, accompanied by quotes from the author--are brilliantly arranged to form a cinematic look at his achievements. Here is the magical world of the artist's mind, an uncharted realm full of exotic conceptions and inventions.

"The Dutch artist M.C. Escher created some of the most celebrated and extraordinary images in twentieth-century art . . . hippies claimed him as the godfather of psychedelic art. His work is ripe for rediscovery and reappraisal - this exhibition is the largest ever held in the UK - nearly 100 of Escher's greatest drawings and prints. Based on the world-renowned M.C.
