9780205252282 The purpose of this study was to identify the factors associated with the utilization of preadjudicatory detention of the preadjudicatory detention of juveniles, (b) the legal origins of the preadjudicatory detention of preadjudicatory detention of juveniles, (c) a number of theoretical perspectives associated with the use of preadjudicatory detention of juveniles, and (d) whether legal (i.e., prior record, offense, etc.) or extralegal factors (i.e., prior record, offense, etc.) were associated with the detention of juveniles in the juvenile justice system. The study utilized a quantitative method design in which secondary data were employed. A total of 7,135 juveniles were analyzed from secondary data gathered by the United States Department of Justice, Bureau of Justice, Bureau of Justice, Bureau of Justice Statistics in 1998. Various types of statistical analysis (bivariate cross-tabulation, binary logistic regression) provided clarification and differentiation concerning factors associated with the preadjudicatory detention of juveniles. With respect to extralegal factors, the results from this study indicate that race was associated with the detention. The results also reveal that certain legal factors were associated with the preadjudicatory detention of juveniles. For instance, a juvenile's relationship with the juvenile court at the juvenile as the specific charges of burglary, robbery and assault were associated with the preadjudicatory detention of the juvenile. This study underscores the need for creating and developing objective assessment tools during the intake process for juveniles. Future investigative studies should include the attitudes of certain legal practitioners and the use of qualitative data when researching juvenile court

This book develops a contemporary theory of nationalism that addresses 21st century political challenges, exploring theoretical accounts to decipher the diverse manner by which nationalism comes to be embedded in our social and political world. Accounting for the dynamism and 'intertextuality' of nationalism, Nationalism, Nationalism and Hegemony shows how 'the nation' and 'nationalism' come to be consolidated as conceptual and experiential power structures and how the interests of political groups are advanced through diverse nationalist modalities, which can at any time be activated for political purposes. A critique of the various and diverse manifestations of nationalism, this contribution to both theory and political practice will appeal to scholars working in the fields of sociology and social and political theory. A God-Centered Approach

Religion assembles a group of distinguished historians who explore the origin of the thesis, its reception, the responses it drew from various faith traditions, and its continued prominence in public discourse. Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals, including John William Draper and Andrew Dickson White, who through their polemical writings championed the conflict thesis relentlessly. Others consider what the thesis meant to different religious communities, including evangelicals, liberal Protestants, Roman Catholics, Eastern Orthodox Christians, Jews, and Muslims. Finally, essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today. Counter to popular perceptions, contemporary American sociology is and promotes a profoundly sacred project at heart. Sociology today is in fact animated by sacred impulses, driven by sacred project at heart. Sociology today is and promotes a profoundly sacred project. fathers were mostly atheists. Its basic operating premises are secular and naturalistic. Sociologists today are disproportionately not religious, compared to all Americans, and often irreligious, compared to all Americans, and often irreligious. The Sacred Project of American Sociology shows, counter-intuitively, that the secular enterprise that everyday sociology appears to be pursuing is actually not what is really going on at sociology's deepest level. Christian Smith conducts a self-reflexive, tables-turning, cultural and institutional sociology of the profession of American sociology itself, showing that this allegedly secular discipline ironically expresses Emile Durkheim's inescapable sacred, exemplifies its own versions of Marxist false consciousness, and generates a spirited reaction against Max Weber's melancholically observed disenchantment of the world. Sociology itself is a part of that very human, very social, often very sacred and spiritual world. And sociology's ironic mis-recognition of its own sacred project leads to a variety of arquably self-destructive and distorting tendencies. This book re-asserts a vision for what sociology is most important for, in contrast with its current commitments, and calls sociologists back to a more honest, fair, and healthy vision of its purpose.

Interpersonal relationships are possible for humans because we are created in the image of a Trinitarian God. But if the Trinity is our model for relationships and our models for understanding them? Redeeming Sociology advocates a biblically informed model for human relationships—relationships rooted in the Trinitarian character of God, his governance of the world, and his redemption accomplished in Christ. Poythress examines how the breaking of relationships through sin leads to strife, murder, and oppression among human beings and sets cultures against one another. And he shows how these broken relationships are restored through the outworking of redemption in Christ. Though typical sociological models for interpersonal relationships may offer some valuable insights, they are handicapped by a fundamental misunderstanding of humanity. The biblical model that Poythress presents correctly diagnoses the problem of human relationships, so it can likewise prescribe a biblical solution that infuses new meaning and power into how we relate to others made in the image of God.

Study Guide for Macionis Society, the Basics, Eleventh Edition Inerrancy and Worldview

A Down to Earth Approach

The Basics, Books a La Carte Edition

Though the Bible presents a personal and relational God, popular modern worldviews portray an impersonal divine force in a purely material world assumptions about fundamental issues—like the nature of humanity, evil, and the purpose of life-that present profound obstacles to understanding the Bible. In Inerrancy, showing how worldview, Dr. Vern for biblical inerrancy implicitly critiques the worldview of theologians like Enns, Sparks, Allert, and McGowan. Poythress, who has researched and published in a variety of fieldsdisciplines. By directly addressing key examples in each field, Poythress shows that many difficulties can be resolved simply by exposing the influence of modern materialism. Inerrancy and Worldview's positive response to current attempts to abandon or redefine inerrancy will enable Christians to respond well to modern challenges by employing a worldview that allows the Bible to speak on its own terms.

This book challenges sociologists and sociology students to think beyond the construction of social problems? Service Sociology posits that a central role of sociology is not simply to analyse and interpret social problems, but to act in the world in an informed manner to ameliorate suffering and address the structural causes of these problems. This volume provides a unique contribution to this approach to sociology, exploring the intersection between its role as an academic discipline and its practice in the service of communities and people. With both contemporary and historical analyses, the book traces the legacy, characteristics, contours, and goals of the sociology of service, shedding light on its roots in early American sociology and its deep connections to activism, before examining the social context that underlies the strategies that have promise in remedying contemporary social problems. Presenting examples of concrete social problems from around the world, including issues of democratic participation, the organization and leadership of social movements, homelessness, activism around HIV/AIDS and service spring breaks, Service Sociology and Academic Engagement in Social Problems explores the utility of public teaching, participatory action research, and service learning in the classroom as a contribution to the community.
