It is critical to improve the asset management system implementation as well as economics and industrial decision making to ensure that a business may move smoothly internally. Maintenance management should be aligned to the activities of maintenance in accordance with key business strategies, which must be designed under the comprehensive approach of an asset management process. After transforming the priorities of the business into priorities of maintenance, maintenance managers will use their medium-team strategies to tackle potential weaknesses in the maintenance of the equipment in accordance with these objectives. Cases on Optimizing the Asset Management Process explains and summarizes the processes and the reference frame necessary for the implementation of the Maintenance Management Model (MMM). This book acts as an overview of the current state of the art in asset management, providing innovative tools and practices from the fourth industrial revolution. Presenting topics like criticality analysis, physical asset maintenance, and unified modelling language, this text is essential for industrial and manufacturing engineers, plant supervisors, academicians, researchers, advanced-level students, technology developers, and managers who make decisions in this field.

In this book, we show the replacement of academic and vocational education, which is structured according to subject systems and oriented towards scientific knowledge. This work process knowledge is the basis for the acquisition of the design competence of vocational specialists, which is becoming increasingly important in the world of work. A modern knowledge concept based on vocational education is developed and documented. In the first part of the book the concept of vocational knowledge is developed, in the second part empirical results from COMET projects are documented, from which the vocational knowledge imparted in different occupations can be read. There has been a confusing discussion about vocational knowledge for decades. In 1991, the KMK agreed on a new concept for vocational education and training with the guiding idea of vocational design competence. It remained open on which vocational knowledge this new guiding idea should be based. Up to now there has been no original vocational pedagogical justification for the vocational knowledge on which vocational design competence is based.
