'Management Information for Marketing Decisions 2001-2002' is a specifically tailored coursebook for students undertaking the Management

Information for Marketing Decisions module of the CIM Advanced Certificate. Butterworth-Heinemann have worked closely with the Education Division of the CIM to ensure that all aspects of the text are up-to-date and correspond to the CIM's requirements, making this title the definitive companion to this year's course. Its comprehensive content and user-friendly text layout are designed to facilitate learning, with questions, activities, definitions and study tips to support the theory, while the structured study units link the information directly to the CIM syllabus. The new edition of this text contains: · a firmly international perspective · new material to cover e-marketing issues, the basic concepts of management information systems, emerging accounting techniques and the application of market research · a completely revised Continuous Assessment unit · new and up to date examples and case studies to illustrate the theory · additional text references and website references · preparatory aids for the final exam, including the most recent exam papers, examiners' marking schemes and specimen answers Comprehensive yet uniquely accessible, it provides essential support for anyone undertaking a CIM course. This book examines influential ideas within Management Information Systems (MIS). Leading international contributors summarize key topics

and explore a variety of issues currently being discussed in the field. They re-visit influential ideas such as socio-technical theory, systems thinking, and structuration theory and demonstrate their relevance to newer ideas such as re-engineering, hybrid management, knowledge workers, and outsourcing. In locating MIS within an interdisciplinary context, particularly in the light of rapid technological changes, this book will form the link between past and future approaches to MIS.
