Strategic Management in Action presents current strategic management theories and practice in an engaging and easy-to-read format. Coulter effectively blends theory with plenty of opportunity to practice throughout the text, providing readers with the ideologies, ethical dilemmas, and unique strategies of today's real managers and organizations in action.

"This course and this book are about management and managers. Managers are one thing that all organizations--no matter the size, kind, or location--need. And there's no doubt that the world managers face has changed, is changing, and will continue to change. The dynamic nature of today's organizations means both rewards and challenges for the individuals who will be managing those organizations. Management is a dynamic subject, and a textbook on it should reflect those changes to help prepare you to manage under the current conditions. We've written this 14th edition of Management to provide you with the best possible understanding of what it means to be a manager confronting change and to best prepare you for that reality. But not every student aspires to a career in management. And even if you do, you may be five or ten years away from reaching a managerial position. So you might rightly feel that taking a course in management now may be getting ahead of the game. We hear you. In response to these concerns, we've added new material to this book that is important and relevant to everyone working in an organization--manager and non-manager alike. Our "Workplace Confidential" pages identify, analyze, and offer suggestions for dealing with the major challenges that surveys indicate frustrate employees the most. You should find these pages valuable for helping you survive and thrive in your workplace. Surprisingly, this topic has rarely been addressed in business programs. Inclusion in an introductory management course appeared to us to be a logical place to introduce these challenges and to provide guidance in handling them"--

Robbins Management: The Essentials covers the concepts essential to management in the 21st century in a fresh, lively format that's perfectly suited to a typical university semester. The second edition features new and in-depth coverage of

sustainability, ethics and corporate social responsibility and new case studies from local and international businesses.

The Truth About Managing People offers real solutions for the make-or-break problems faced by every manager. This isn't someone's opinion; it's a definitive, evidence-based guide to effective management: a set of bedrock principles to rely on throughout an entire management career. The Rules of Management: They're surprisingly easy to learn and live by. Now, Richard Templar's brought them all together in one place. Templar covers everything from setting realistic targets to holding effective meetings; finding the right people to inspiring loyalty. Learn when and how to let your people think they know more than you (even if they don't) -- and recognize when they really do The first edition of The Rules of Management became a global phenomenon, topping bestseller charts around the world. This new, even better edition contains 10 brand new rules to take you further, faster. In Wired to Care, top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has: empathy, the ability to reach outside of ourselves and connect with other people. When people inside a company develop a shared sense of what's going on in the world, they see new opportunities faster than their competitors. They have the courage to take a risk on something new. And they have the gut-level certitude to stick with an idea that doesn't take off right away. People are Wired to Care, and many of the world's best organizations are, too.
