State of M&E in Malawi

Zimbabwe Journal of Educational Research

Final Draft: Malawi poverty reduction strategy paper

This book is a comprehensive text for those interested in formal education in sub-Saharan Africa. It provides a thought-provoking overview of the key educational ideas, themes and issues facing schooling in Africa today, by drawing on a wide literature to examine evidence concerning both educational policy and the working realities of primary and secondary schools in Africa. Based on the author's forty years of experience in researching and publishing on education in Africa, it takes a balanced but critical approach to analysing education in Africa, and discusses both positive and negative patterns across the region, as well as identifying differences between and within countries. The book examines major questions of educational provision, structure, content and process but does so in a way that raises challenging questions about gender, inequality, violence, authoritarianism and democracy in education as well the fundamental question of whether education is achieving its desired outcomes. It will be of great interest to students and researchers working in the fields of comparative and international education, education and international development, African education, African studies and development studies.

The Malawi Growth and Development Strategy II (MGDS-II) is a poverty reduction strategy for the period 2006-11, which is aimed at fulfilling Malawi's future developmental aspiration—Vision 2020. The strategy identifies broad thematic areas and key priority areas to bring about sustained economic growth. A striking feature of this strategy is that the various governmental organizations, private sector, and general public are equal stakeholders. However, successful implementation of MGDS-II will largely depend on sound macroeconomic management and a stable political environment.

Who Benefits from Public Education Spending in Malawi?

Secondary School Curriculum Review Symposium

A longer-range purpose is to collect comparable information on as many polities as possible in order to facilitate the development of a richer theory to guide language policy and planning in other polities that undertake the development of a national policy on languages. This volume is part of an areal series which is committed to providing descriptions of language planning and policy in countries around the world."--BOOK JACKET.

This volume covers the language situation in Malawi, Mozambique, and the Philippines explaining the linguistic diversity, the historical and political contexts and the current language situation - including language-in-education planning, the role of the media, the role of the religion, and the roles of non-indigenous languages. The authors are indigenous and have been participants in the language planning context.

Education in Southern Africa

E-Infrastructure and E-Services for Developing Countries

Smouldering Charcoal

This book constitutes the thoroughly refereed post-conference proceedings of the Second International ICST Conference on e-Infrastructure and e-Services for Developing Countries, AFRICOM 2010, held in Cape Town, South Africa, in November 2010. The 13 revised full papers presented were carefully reviewed and selected and cover a wide range of topics such as wireless network technologies, E-governance, as well as ICT for development and ICT business models and open-access.

This book offers insights into the educational dimensions of climate change and promotes measures to improve education in this context. It is widely believed that education can play a key role in finding global solutions to many problems related to climate change. Indeed, education as a process not only helps young people to better understand and address the impact of global warming, but also fosters better attitudes and behaviours to aid efforts towards mitigating climate change and adapting to a changing environment. But despite the central importance of education in relation to climate change, there is a paucity of publications on this theme. Against this background, the book focuses on the educational aspects of climate change and showcases examples of research, projects and other initiatives aimed at educating various audiences. It also provides a platform for reflections on the role education can play in fostering awareness on a changing climate. Presenting a wide range of valuable lessons learned, which can be adapted and replicated elsewhere, the book appeals to educators and practitioners alike.

As the Government of Malawi investigates options to expand access to higher education and improve the quality of higher education provision, the objective of this report is to contribute to an improved understanding of the challenges confronted by the higher education sub-sector in Malawi. The report summarizes the key findings of an in-depth study of factors affecting access and equity in the Malawian higher education sub-sector, the quality and relevance of educational outputs, the financing of the sector, and the frameworks structuring governance of the sector and its management. The study was initiated in response to a request from the Government of Malawi, to the World Bank, to support the Ministry of Education, Science and Technology (MoEST) in its pursuit of financially sustainable policy options to increase equitable access to higher education, and to improve the quality of higher education provision in alignment with the needs of the labor market.

'The Education System in Malawi', an Education Country Status Report (CSR), is a detailed analysis of the current status of the education sector in Malawi, the results of which have been validated by the government of Malawi. Its main purpose is to enable decision makers to orient national policy on the basis of a factual diagnosis of the overall education sector and to provide relevant analytical information for the dialogue between the government and development partners. The analysis incorporates data and information from multiple sources, such as school administrative surveys by the Ministry of Education, household surveys, and a tracer survey created especially for this study. This CSR, developed by a multi-ministerial national team supported by UNESCO P le de Dakar, the World Bank, and GTZ specialists, updates the previous one drawn up in 2003 and consists of eight chapters, including a chapter on higher education. The analysis provides key monitoring and evaluation inputs for the overall education sector, particularly under the framework of the implementation of the National Education Sector Plan.

Annual Report for the Year ...

Aktuell steht die Weltbevölkerungen vor vielen entscheidenden Herausforderungen, die es zu bewältigen gilt. Der globale Klimawandel und die zunehmende Ressourcenverknappung sind dabei die bekanntesten Beispiele. Eine zentrale Herausforderung wird bei der Debatte gerne vernachlässigt, herabgewürdigt oder gar vergessen: Nämlich das Ernährungsproblem. Weltweit leiden immer noch ca. 850 Millionen Menschen an chronischer Unterernährung. Das Problem ist dabei kein Phänomen das strikt auf den Afrikanischen Kontinent begrenzt ist. Vielmehr sind viele Staaten im sogenannten »Globalen Süden« von Hunger und Mangelernährung bedroht. Die globale Unterernährung stellt aber nur eine Seite der Medaille dar. Spätestens seit dem Jahr 2008 ist das Problem der weltweiten Überernährung gleichermaßen dramatisch. Nach Schätzungen von diversen Organisationen sind ca. 1,4 Milliarden Menschen übergewichtig und knapp eine halbe Milliarde Menschen fettleibig (BMI > 30). Nimmt man all diese Zahlen zusammen, sind ca. 30% der Weltbevölkerung entweder unter- oder überernährt, was zu starken Belastungen für Gesundheit, Wirtschaft, etc. führt. Die Lösung für beide Probleme ist der Wandel zu nachhaltigen Ernährungssystemen. Der vorliegende Sammelband setzt sich mit diesen Themen auseinander und stellt sie in den Kontext einer neuen »Großen Transformation«.

Education in Southern Africa is a comprehensive critical reference guide to education in the region. With chapters written by an international team of leading regional education experts, the book explores the education systems of each country in the region. With chapters covering Botswana, Lesotho, Madagascar, Mozambique, Namibia, South Africa, Swaziland and Zimbabwe, the book critically examines the development of education provision in each country as well as local and global contexts. Including a comparative introduction to the issues facing education in the region as a whole and guides to available online datasets, this handbook will be an essential reference for researchers, scholars, international agencies and policy-makers at all levels.

Shadow Human Rights Report, 2008

This paper reviews the Annual Progress Report on Malawi ' s Poverty Reduction Strategy (MPRS). The poverty situation remained high over the implementation period of the MPRS. The government continued funding activities that have been perceived to have an impact on poverty reduction. The MPRS outlined a number of macroeconomic policies that have been adhered to achieve the macroeconomic targets. These policies have been mainly in the form of monetary, fiscal, and structural policies.
