There are not many books in India that can serve as a useful textbook to the students and guides to the practising journalist. It is this lacuna that M.V. Kamath, one of the most prominent Indian Journalists, has tried to fill. This is a book on Indian journalism for Indian journalists, citing examples of Indian writers, Kamath quotes profusely from the writings of Indian editors to illustrate his ideas which considerably adds to the relevance of his work.

Brigitte Bardot, BB, La bebe, is a symbol of the age of the Pill and the Playboy philosophy. After her first film at the age of 17 she was catapulted to fame. She was never a great actress, but she was a great sex symbol. This is an account of her as an international social phenomenon: how she was trapped by fame, how she handled and mishandled it, how fame drove her to become a recluse. It describes her relationships, her failure to find happiness, her litigious nature - she has fought nearly 150 court cases involving invasion of privacy and animal rights - and how she has hidden behind animals to protect herself from humans.

Luther Holz changed his last name to Holder when he moved to the United States in the mid 19th century. This book follows his family as they build a small legacy, and unknowingly fulfill a much larger, ancient legacy.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Rich in titles on English life and social history, this collection spans the world as it was known to eighteenth-century historians and explorers. Titles include a wealth of travel accounts and diaries, histories of nations from throughout the world, and maps and charts of a world that was still being discovered. Students of the War of American Independence will find fascinating accounts from the British side of conflict. ++++ The below data was compiled from various identification fields in the bibliographic record of this title. A practical guide for robust sharī'ah governance of the Islamic banking industry Debate in the market on the extent of sharī'ah compliance of Islamic banks, their products, and activities has piqued stakeholders' interest. In Foundations of Sharī'ah Governance of Islamic Banks, Karim Ginena and Azhar Hamid explore the depths of sharī'ah governance to unravel its mysterious dimensions, and equip academics and practitioners with a solid understanding of the subject, which has become a serious challenge and thus deserves dedicated attention. The authors make a strong case for the need to contain the sharī'ah risk that Islamic banks experience, and present a compelling argument for how this should be done. Ginena and Hamid propose a robust sharī'ah governance model that comprehensively tackles this risk, and helps improve the extent of sharī'ah compliance of market players. The authors detail the internal, external, and institutional arrangements needed to promote responsible sharī'ah governance, and critically analyze current laws, regulations, and industry practices on the topic. The chapters of the book do the following: Examine the roots, characteristics and objectives of sharī'ah and its relation to financial dealings; Probe the role of regulators in sharī'ah governance, explore the different approaches adopted by banking supervisors, and provide examples of relevant legal and regulatory measures; Explain to bank directors and management the fiduciary duty they assume with respect to sharī'ah compliance, and detail how they could discharge this responsibility in line with best practices; Elaborate on the purpose of the Sharī'ah Supervisory Board (SSB), its responsibilities, competence criteria, internal regulations, and key governance guidelines; additionally, they explore different SSB models; Describe the internal sharī'ah control system including its six components, and examine the internal sharī'ah audit function as well as different stages of conducting a sharī'ah audit; Clarify the role of a sharī'ah auditor, with guidance on reporting lines, scope of duties, authority, and practical ways on fulfilling tasks, such as a sample sharī'ah risk assessment grid and audit checklists; Discuss the newly emerging external sharī'ah advisory firms that are expected to play a key role in the coming years and the services they provide. Through an effective treatment of each of these elements, and the way that they interact with one another, the book offers a fresh take on how robust sharī'ah governance of Islamic banks can be successfully accomplished. It is a comprehensive resource for academics, regulators, directors, lawyers, auditors, consultants, employees, and customers of Islamic banks interested in learning more about these challenges. This essential reading persuasively extends the discourse on the subject and addresses critical sharī'ah issues that have policy implications for decision makers in jurisdictions aiming to attract the fast-growing Islamic finance industry or increase their market share.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
