Twenty chapters present the range of current research into the study of textiles and dress in classical antiquity, stressing the need for cross and inter-disciplinarity study in order to gain the fullest picture of surviving material. Issues addressed include: the importance of studying textiles to understand economy and landscape in the past; different types of embellishments of dress from weaving techniques to the (late introduction) of embroidery; the close links between the language of ancient mathematics and weaving; the relationships of iconography to the realities of clothed bodies including a paper on the ground breaking research on the polychromy of ancient statuary; dye recipes and methods of analysis; case studies of garments in Spanish, Viennese and Greek collections which discuss methods of analysis and conservation; analyses of textile tools from across the Mediterranean; discussions of trade and ethnicity to the workshop relations in Roman fulleries. Multiple aspects of the production of textiles and the social meaning of dress are included here to offer the reader an up-to-date account of the state of current research. The volume opens up the range of questions that can now be answered when looking at fragments of textiles and examining written and iconographic images of dressed individuals in a range of media. The volume is part of a pair together with Prehistoric, Ancient Near Eastern and Aegean Textiles and Dress: an interdisciplinary anthology edited by Mary Harlow, Cécile Michel and Marie-Louise Nosch

Planning Abu Dhabi

This book represents the first attempt to step inside the holiday experience of young British tourists in San Antonio, Ibiza. Briggs' ethnographic study reveals the ugly truth about how and why they get involved in deviance and risk-taking when they go abroad, driven by self validation and a commodified social context.

Whether you're interested in better performance on the road or extra horsepower to be a winner on the track, this book gives you the knowledge you need to get the most out of your engine and its turbocharger system. Find out what works and what doesn't, which turbo is right for your needs, and what type of set-up will give you that extra boost. Bell shows you how to select and install the right turbo, how to prep your engine, test the systems, and integrate a turbo with EFI or carbureted engine.

These photographs form part of a project to document the area between Manchester and Oldham, England in 1984-1986.

Philosopher, entrepreneur, and former National Geographic and New York Times correspondent Zoltan Istvan presents his visionary novel, The Transhumanist Wager, as a seminal statement of our times. Scorned by over 500 publishers and literary agents around the world, his philosophical thriller has been called "revolutionary" and "socially dangerous" by readers, scholars, and religious authorities. The novel debuts a challenging original philosophy, which rebuffs modern civilization by inviting the end of the human species-and declaring the onset of something greater. Set in the present day, the novel tells the story of transhumanist Jethro Knights and his unwavering quest for immortality via science and technology. Fighting against him are fanatical religious groups, economically depressed governments, and mystic Zoe Bach: a dazzling trauma surgeon and the love of his life, whose belief in spirituality and the afterlife is absolute. Exiled from America and reeling from personal tragedy, Knights forges a new nation of willing scientists on the world's largest seasteading project, Transhumania. When the world declares war against the floating city, demanding an end to its renegade and godless transhuman experiments and ambitions, Knights strikes back, leaving the planet forever changed.

Chapters 17 to 20 describe the part of Africa later called the Maghrib and its Saharan hinterland. Chapters 21 to 29, the rest of Africa as well as some of the islands of the Indian Ocean.–Publisher's description

I Twenty-five years ago, at the Conference on the Comparative Reception of Darwinism held at the University of Texas in 1972, only two countries of the Iberian world-Spain and Mexico-were represented.' At the time, it was apparent that the topic had attracted interest only as regarded the "mainstream" science countries of Western Europe, plus the United States. The Eurocentric bias of professional history of science was a fact. The sea change that subsequently occurred in the historiography of science makes 1972 appear something like the antediluvian era. Still, we would like to think that that meeting was prescient in looking beyond the mainstream science countries-as then perceived-in order to test the variation that ideas undergo as they pass from center to periphery. One thing that the comparative study of the reception of ideas makes abundantly clear, however, is the weakness of the center/periphery dichotomy from the perspective of the diffusion of scientific ideas. Catholics in mainstream countries, for example, did not handle evolution much better than did their correligionaries on the fringes. Conversely, Darwinians in Latin America were frequently better placed to advance Darwin's ideas in a social and political sense than were their fellow evolutionists on the Continent. The Texas meeting was also a marker in the comparative reception of scientific ideas. Darwinism aside. Although, by 1972, scientific institutions had been studied comparatively, there was no antecedent for the comparative history of scientific ideas.

Abu Dhabi 's urban development path contrasts sharply with its exuberant neighbour, Dubai. As Alamira Reem puts it, Abu Dhabi, capital of the United Arab Emirates since 1971, ' has been quietly devising its own plans ... to manifest its role and stature as a capital city ' . Alamira Reem, a native Abu Dhabian and urban planner and researcher who has studied the emirate ' s development for more than a decade, is uniquely placed to write its urban history. Following the introduction and description of Abu Dhabi ' s early modern history, she focuses on three distinct periods dating from the discovery of oil in 1960, and coinciding with periods in power of the three rulers since then: Sheikh Shakhbut bin Sultan Al Nahyan (1960-1966), Sheikh Zayed bin Sultan Al Nahyan (1966-2004), and Sheikh Khalifa bin Zayed Al Nahyan (2004-). Based on archival research, key interviews and spatial mapping, she analyses the different approaches of each ruler to development; investigates the role of planning consultants, architects, developers, construction companies and government agencies; examines the emergence of comprehensive development plans and the policies underlying them; and assesses the effects of these many and varied influences on Abu Dhabi ' s development. She concludes that, while much still needs to be done, Abu Dhabi ' s progress towards becoming a global, sustainable city provides lessons for cities elsewhere.

As Pagan Spain portrays midcentury Spain as a country of tragic beauty, political oppression, and contradictions, Wright amalgamates at once polemic, travel narrative, history, and journalistic essay. He combines, as well, first-person narrative, eyewitness reporting, commentary, anecdotes, vignettes, and dramatic monologue. Pagan Spain, less a journalistic account of a people and an exotic locale than it is a sociological critique of a corrupt system of government. is a daring portrait of a country in turmoil.

Finally, there's a one-stop, problem-solving guide for every professional involved in electrical construction projects. Industrial Electrical Wiring eschews the theoretical discussions common to other texts on the market and instead focuses on such real-world issues as codes, standards, and print reading, as well as the design and implementation of actual installations. Every major element in the field is addressed in hard, practical terms--from overcurrent protection to low-voltage terminations, electrical calculations to wiring methods, equipment fateners to electric motors. Haynes disassembles every subject vehicle and documents every step with thorough instructions and clear photos. Haynes repair manuals are used by the pros, but written for the do-it-yourselfer.

Design, Installation, and Maintenance

Toward an Architecture of Enjoyment is the first publication in any language of the only book devoted to architecture by Henri Lefebvre. Written in 1973 but only recently discovered in a private archive, this work extends Lefebvre's influential theory of urban space to the question of architecture. Taking the practices and perspective of habitation as his starting place, Lefebvre redefines architecture as a mode of imagination rather than a specialized process or a collection of monuments. He calls for an architecture of jouissance--of pleasure or enjoyment--centered on the body and its rhythms and based on the possibilities of the senses. Examining architectural examples from the Renaissance to the postwar period, Lefebvre investigates the bodily pleasures of moving in and around buildings and monuments, urban spaces, and gardens and landscapes. He argues that areas dedicated to enjoyment, sensuality, and desire are important sites for a society passing beyond industrial modernization. Lefebvre's theories on space and urbanization fundamentally reshaped the way we understand cities. Toward an Architecture of Enjoyment promises a similar impact on how we think about, and live within, architecture.
