• Was Adam the first test-tube baby? • Did nuclear fission destroy Sodom and Gomorrah? • How were the ancients able to accurately describe details about our solar system that are only now being revealed by deep space probes? The awesome answers are all here, in this important companion volume to The Earth Chronicles series. Having presented evidence of an additional planet as well as voluminous information about the other planets in our solar system, Zecharia Sitchin now shows how the discoveries of modern astrophysics, astronomy, and genetics exactly parallel what has already been revealed in ancient texts regarding the "mysteries" of alchemy and the creation of life. Genesis Revisited is a mind-boggling revelation sure to overturn current theories about the origins of humankind and the solar system.

Liberation, lust, envy, rage, power, thrill—our cars provoke enough emotion to jam a six-lane highway. If you name your ride, reminisce about sex in the back seat or enjoy roaring down the open road, you know why we love our wheels. But if you hate traffic, curse at the price at the pump or fight over parking spaces, you know why we hate them too. Drive is a cross-continent adventure that explores where our fuel-injected

dreams have taken us. Award-winning journalist Tim Falconer invites us on his road trip as he meets vintage car enthusiasts on Route 66, rides along in a police cruiser, kicks the tires at a Las Vegas auto show and takes a hydrogen-powered car for a spin. Steering us along North America's interstates and blue highways, meandering through small towns, sprawling suburbs and walkable neighbourhoods, Falconer shows us the growing collision of cars and people. In this complicated affair, who's really in the driver's seat? Can smart growth, public transit and complete streets free us? A spirited, front-seat view of quirky locals and locales, Drive looks at what auto-dominated life means to our health, environment and communities. Falconer also opens the door on British and Argentine car cultures, and considers the road ahead for China and India, nations with increasingly American attitudes. As billions grab their keys, can we avoid carmageddon? "[A] fascinating survey of the automobile and its effect on society ... A fun book about a serious topic." -Winnipeg Free Press "Essential reading for any Canadian intrigued by the conundrum of finding better ways to get from here to there." -Spacing magazine

Innovation isn't what it used to be. Traditionally a synonym for sophistication, hi-tech and expense, today it means seeking frugality, mining segments that the competition has abandoned and accessing new customers whose modest incomes meant they were once ignored. The West used to conceptualise innovation for its own purposes. Today, it is being developed increasingly for - and soon by - the emerging world. The Logan's adventure epitomises these new innovation trajectories and outlines new frontiers for its industry. The question then becomes how and why a company like Renault chose this path; how it withstood so many surprises and obstacles to become one most spectacular success stories of the early 21st century; and whether this success might destabilise European industrialists' traditional development model. Following an in-depth investigation behind the scenes at Renault and Dacia, the book's three authors - economists and managers specialised in the automotive industry - provide an answer to these and other questions. Beyond the automotive sector, the book is also useful to anyone tracking current upheavals in the world's economic equilibrium and interested in how corporate innovation processes might contribute to this trend.

Discovered in a treasure-filled parking lot in Leicester, England (next to a pile of bones that didn't look that important), an ancient manuscript proves to be the long-lost first play written by none other than seventeen-year-old William Shakespeare from Stratford. We are totally not completely making this up. WILLIAM SHAKESPEARE'S LONG LOST FIRST PLAY (abridged) is the literary holy grail: an actual manuscript in Shakespeare's own hand showing all his most famous characters and familiar speeches in a brand-new story. But because it's one hundred hours long and contains multiple unwieldy storylines, it was decided, as a public service, to abridge it down to a brief and palatable ninety-minute performance for this lost masterpiece. "Something wickedly funny this way comes!" The New York Times "A breathlessly irreverent, pun-filled romp!" The Washington Post "A top-notch comic deconstruction of Shakespeare!" The Stage--U K

This paper reports the growing number of low-income countries that are making efforts to resolve their debt problems, often aided by the resources of the debt reduction facility for countries of the International Development Association (IDA). Progress for most, however, remains slow. With the backing of IDA resources and assistance from official bilateral sources, debt buy-backs have been concluded by Bolivia, Guyana, Mozambique, Niger, Sao Tome and Principe, Uganda, and Zambia. Preliminary discussions on similar operations are under way with several other countries. Although most of the major baric debt cases have been resolved, attention still needs to be focused on the problems of low-income countries. In many of these countries, the process of debt restructuring has been delayed owing to economic and political difficulties. To maintain market access on reasonable terms, countries need consistently to implement strong macroeconomic and structural policy programs. Maintenance of such programs is likely to be particularly important in the period ahead, given the high degree of uncertainty with regard to interest rate movements in the industrial countries.

Some 75 articles drawn from four Continents trace the progress of Datsun's highly competitive 240Z and 280Z coupes between 1970 and 1978. Included are road, track, comparison and long-term tests, new model introductions and updates together with full specifications and performance data. Also featured are articles on tuning and racing, plus advice is offered on acquiring a good pre-owned 240Z or 260Z.

When magic and superpowers emerge in the masses, Wendy Deere is contracted by the government to bag and snag supervillains in Hugo Award-winning author Charles Stross' *Dead Lies Dreaming: A Laundry Files Novel*. As Wendy hunts down Imp—the cyberpunk head of a band calling themselves “The Lost Boys”— she is dragged into the schemes of louche billionaire Rupert de Montfort Bigge. He hires Imp’s sister, Eve, to procure it by any means necessary, and in the process, he encounters Wendy Deere. Myths, Lies and Old Age: a collection of poems by Bob Eccleston. Within these pages there are myths: some known, some newly created, some yet to occur and some which may prove to be reality. There are vistas of old age from a viewpoint which does not preclude a future or a sense of humour; where the use of set forms indicates maturity and balance. There are lies aplenty although different readers may have different views as to where they occur. There is love and murder, hope and despair, tragedy and comedy; even nonsense. There is a modicum of sex involving two amorous seals. In short, there is variety and, hopefully, enjoyment.

September 11th.-Lat. 81 degrees 40' N.; long. 2 degrees E. Still lying-to amid enormous ice fields. The one which stretches away to the north of us, and to which our ice-anchor is attached, cannot be smaller than an English county. To the right and left unbroken sheets extend to the horizon. This morning the mate reported that there were signs of pack ice to the southward. Should this form of sufficient thickness to bar our return, we shall be in a position of danger, as the food, I hear, is already running somewhat short. It is late in the season, and the nights are beginning to reappear. This morning I saw a star twinkling just over the fore-yard, the first since the beginning of May. There is considerable discontent among the crew, many of whom are anxious to get back home to be in time for the herring season, when labour always commands a high price upon the Scotch coast. As yet their displeasure is only signified by sullen countenances and black looks, but I heard from the second mate this afternoon that they contemplated sending a deputation to the Captain to explain their grievance. I much doubt how he will receive it, as he is a man of fierce temper, and very sensitive about anything approaching to an infringement of his rights. I shall venture after dinner to say a few words to him upon the subject. I have always found that he will tolerate from me what he would resent from any other member of the crew.
