A memoir, biography, work of history, and literary criticism all in one, this moving book tells the story of three exiled writers—Erich Auerbach, François Fénelon, and W. G. Sebald—and their relationship with the classics, from Homer to Mimesis. In a genre-defying book hailed as “exquisite” (The New York Times) and “spectacular” (The Times Literary Supplement), the best-selling memoirist and critic Daniel Mendelsohn explores the mysterious links between the randomness of the lives we lead and the artfulness of the stories we tell. Combining memoir, history, and literary criticism, *Three Rings* weaves together the stories of three exiled writers who turned to the classics of the past to create masterpieces of their own—works that pondered the nature of narrative itself: Erich Auerbach, the Jewish philologist who fled Hitler’s Germany and wrote his classic study of Western literature, *Mimesis*, in Istanbul; François Fénelon, the seventeenth-century French archbishop whose ingenious sequel to the *Odyssey*, *The Adventures of Telemachus*—a veiled critique of the Sun King and the best-selling book in Europe for over a hundred years—resulted in his banishment; and the German novelist W.G. Sebald, self-exiled to England, whose distinctively meandering narratives explore Odyssean themes of displacement, nostalgia, and separation from home. Intertwined with these tales of exile and art is an account of Mendelsohn’s struggle to write two of his own books—a family saga of the Holocaust and a memoir about reading the *Odyssey* with his elderly father—that are haunted by tales of oppression and wandering. As *Three Rings* moves to its startling conclusion, a climactic meditation about the way in which the lives of its three heroes were linked across borders, languages, and centuries forces the reader to reconsider

relationship between narrative and history, art and life.

Whether or not we reject the Marxist schema there is little doubt that Marx was a great economist. The three volumes of Capital, complete pieces of remarkable economic analysis from which modern economists can still learn; however difficult he is to read, there are moments like Ricardo and Walras, he can revel in the abstract power of economic reasoning.

Neostoicism was one of the most important intellectual movements of the sixteenth and seventeenth centuries. It started in the Protestant Netherlands during the revolt against Catholic Spain. Very quickly it began to influence both the theory and practice of politics in many parts of Europe. It proved to be particularly useful and appropriate to the early modern militaristic states; for, on the basis of the still generally accepted humanistic values of classical antiquity, it promoted a strong central power in the state, raised above the conflicting doctrines of the theologians. Characteristically, a great part of Neostoic writing was concerned with the nationally organized military institutions of the state. Its aim was the general improvement of social discipline and the education of the citizen to both the exercise and acceptance of bureaucracy, controlled economic life and a large army.

In the last decade or so, many books have been devoted to the history of Europe. Two conceptual axes predominate in a large number of these accounts: a discourse focusing on Europe's values, and another discourse, fashioned largely in opposition to the first, which emphasizes the process of European "construction." The first conceives of Europe's past teleologically, as a process by which certain values (Christian ethics, individualism, capitalism, tolerance, republicanism, due process, etc.) were affirmed and came to define European culture. The second approach rejects the discourse on values emphasizes the post-Enlightenment emergence of the concept of Europe, and the political and ideological implications in its continuous redefinitions (and re-elaborations) during the past two or more centuries. This volume offers new approaches that integrate the long temporal dimension of the values-based approach, albeit devoid of its teleological element, with the "constructivist" interpretation.

Warren Buffett is the most famous investor of all time and one of today's most admired business leaders. He became a billionaire and investment sage by looking at companies as businesses rather than prices on a stock screen. The first two editions of The Warren Buffett Way gave investors their first in-depth look at the innovative investment and business strategies behind Buffett's spectacular success. The new edition updates readers on the latest investments by Buffett. And, more importantly, it draws on the new field of behavioral finance to explain how investors can overcome the common obstacles that prevent them from investing like Buffett. New material includes: How to think like a long-term investor – just like Buffett Why "loss aversion", the tendency of most investors to overweight the pain of losing money, is one of the biggest obstacles that investors must overcome. Why behaving rationally in the face of the ups and downs of the market has been the key to Buffett's investing success Analysis of Buffett's recent acquisition of H.J. Heinz and his investment in IBM stock The greatest challenge to emulating Buffett is not in the selection of the right stocks, Hagstrom writes, but in having the fortitude to stick with sound investments in the

face of economic and market uncertainty. The new edition explains the psychological foundations of Buffett's approach, thus giving readers the best roadmap yet for mastering both the principles and behaviors that have made Buffett the greatest investor of our generation.

The worth of dialogue with people who come from other cultural traditions was the first important discovery of the ambulance drivers at the front. It led them to care for the wounded on all sides in the war and then to create university exchanges between France and the United States. The practice of intercultural dialogue is the first training experience that is offered today to the students who leave home and to the families who receive them in their homes as new children for long periods of time. As this story unfolds, it is perhaps the border that emerges as something to question - the political borders that the American Field Service ambulance drivers crossed in two world wars, and the cultural and ideological borders overcome by students, schools, and families that answered the call of AFS.

Find happiness at home with five guiding principles from cultural phenomenon THE MODERN HOUSE. 'A source of fascination, inspiration and fantasy' Guardian In 2005, childhood friends Matt Gibberd and Albert Hill set out to convince people of the power of good design and its ability to influence our wellbeing. They founded The Modern House - in equal parts an estate agency, a publisher and a lifestyle brand - and went on to inspire a generation to live more thoughtfully and beautifully at home. As The Modern House grew, Matt and Albert came to realise that the most successful homes they encountered - from cleverly conceived studio flats to listed architectural masterpieces - had been designed with attention to the same timeless principles: Space, Light, Materials, Nature and Decoration. In this lavishly illustrated book, Matt tells the stories of these remarkable living spaces and their equally remarkable owners, and demonstrates how the five principles can be applied to your own space in ways both large and small. Revolutionary in its simplicity, and full of elegance, humour and joy, this book will inspire you to find happiness in the place you call home.
