Corporate saving is one of the most significant source of funds for financing corporate growth. It has both micro as well as macro significance. In spite of such dual importance of this decision problem, the theoretical determinants of corporate savings are less well established and this is an area in which very little research has been done so far. The present work is an effort in this direction. The main highlights of the present work in context to General Engineering Industry are :
 • In general engineering industry, saving decision is considered as a primary decision variable in the firm's policy framework.
 • Saving decision of firms is primarily governed by
 • Previous year's dividend is very often taken into account by firms as an important determinant while framing their saving policy.
 • Investment demand has a significant influence on the saving decision of firms.
 • External finance is negatively related to the saving decision of firms.
 • Increase in interest payment would induce firms to rely more on corporate saving.

Feeling limited by circumstances, substances, or behaviors often leads to the simple, yet profound question, "Is this all there is?" This question is an opportunity to rediscover one's truth and live life more fully and authentically. Spirit Recovery Medicine Bag offers readers a path to finding their personal answer to this question in an engaging two-part format. In Part One, readers will join Lee McCormick as he reflects on his personal journey of recovery and transformation—a journey that initiated him into a life of helping others recover their own sense of self and purpose. Part Two is a medicine bag of healing practices designed to guide readers in developing self-awareness and awakening their sense of power—specifically the power of choice rooted in personal values and commitment to living those values. Covering a variety of topics addressing spirituality, awareness, and consciousness, the authors pose questions for reflection and self-investigation along the way. Spirit Recovery Medicine Bag is not a negation of Twelve-Step recovery, but a tool for expanding awareness and increasing involvement regardless of the path one is walking. In Twelve-Step language, it builds on Step 12's direction to practice these principles in all one's affairs. The authors believe that the inner journey to one's truth and the creative expression of that truth make for a good definition of spirituality, and they offer readers a very real message of the possibility of living "happy, joyous, and free" through spirit recovery.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
