What challenges are posed by the world economy for governments and businesses, and what changes are needed if we are to survive and prosper in the future?
Marshall Cavendish International Asia Pte Ltd

How do you solve a problem like North Korea? Much has been written about the deaths of North Korea's first two leaders, Kim Il-Sung and Kim Jong-Il, and the implications for the country and its people, but what about the future? Is the Korean peninsula doomed to an unstable, insecure future, or does a brighter future lie ahead? Above all, how is North Korea doing and what will be the fate of its people in the future? This matters, because instability in a region with traditional enmities, unresolved conflicts and nuclear weapons clearly has the potential for disaster. In this book, North Korean expert Andrew Logie recognizes that the government and reality of life in North Korea is often simply unknown. So, as well as providing a guide to the future this book also focuses on the present - answering questions such as: How and why is North Korea hungry and what have been the effects? What does North Korea seek through its violent provocations and how does it get away with it? Why has North Korea not collapsed? What can and is being done to expedite the collapse of the regime (without provoking war)? And what can be done to alleviate North Koreans' current suffering?

Based on the highly successful Primary Mathematics series from Singapore. Designed to equip students with a strong foundation in mathematics and critical thinking skills, this program offers an integrated solution to learning need in the classroom for grade 2.

Singapore's Multiculturalism

How to form, build and maintain stronger, long-lasting relationships

Evolving Diversity

Presenting and public speaking is a worry for many working executives and professionals. Alison Lester helps the reader to abate these fears by helping them to understand why they react the way they do and how to overcome it. Alison also gives the reader the fundamentals of presenting effectively, from preparation to how to present and conduct oneself, to the presentation techniques and tools available to make one's presentation unique and engaging.

Written in an engaging and comprehensive manner and peppered with tips and personal exercises, Present for Success will equip you with just what you need to become the best presenter you can be.

To understand the present, Arcadia Greentree must dig deep into her past. In Book 1, sixteen-year-old Arcadia discovered she was adopted and that her development had been shaped and monitored by her "parents" together with the headmaster of her school. The discovery resulted in a tragedy as her father was murdered and her mother put in a coma. In Book 2, Arcadia tries to locate the "professor" whom she believes to be ultimately responsible for her situation. A series of bomb threats lead her to Oxford University and a confrontation with her enemy—but all is not as it seems.

Bullying is common in all walks of life – not least at work. It's nasty and the results are long-lasting. But sometimes there's something more than bullying, where executives in organizations are malicious, violent and abusive. These people make their co-workers' and subordinates' lives an utter misery, and they can bring organizations down through their machinations. This is not bullying, this is evil. This book offers shocking examples from organizations around the world of the toxic nature of evil executives and the damage they do. It gives advice on how to recognize these predators, manipulators, sadists and frauds, how to manage in their presence, and how to reduce their crippling effect on you or anyone who might be a target. Offering solace and pointers in equal measure, The Evil Executive will provoke you to serious thought and timely action against the myriad manifestations of evil in the workplace.

Raising Thinkers: Preparing Your Child for the Journey of Life

Singapore Math by Marshall Cavendish

Your mind produces up to 70,000 thoughts a day—most of which are responsible for the decisions that you make. These decisions also determine your success both professionally and personally. However, we are taught what to think and not how to think. Information overload, short time frames and past failures can make even simple decisions and problems daunting. Do you lack confidence in your problem solving ability? Do you feel anxious when faced with a tough decision, or overwhelmed by lots of alternatives? Do you wish there was a formula for getting everything right? Executive coach and educator, Tremaine du Preez, fills this book with practical tools and effective techniques, all presented in a clear and practical manner. Making the right decision will be a breeze and no problem will be too difficult to handle when you are armed with these new and proven strategies.

In this latest addition to the highly successful 100 Great Ideas series, readers will find a comprehensive guide for a leader or a developing leader to make a step change in their effectiveness. The book addresses the question 'What is the step change I need to make to be leading well at the next level?'. Author Dr Peter Shaw, who has written several other titles in this series, distils 100 learning points from his vast experience of over 40 years in business and government, and conveys them in a highly personable, easy-to-read style. This book is divided into 10 sections: Why, What, Who, How, When, Which, Were, Be, Become and Know. These ideas will equip anyone who leads a team with the necessary knowledge to guide,

manage, motivate and counsel staff under their charge. In the Who section, for example, learning points include cultivating your champions, drawing on coaches who understand you, recognising your allies, building peer support and finding a mentor. The author has included inspiring case-studies drawn from successful leaders and how they have managed to build a team of confident and competent staff that functions as a cohesive and successful unit. 100 Great Leading Well Ideas is an invaluable companion for anyone who manages a team of staff

Parents are disturbed and angry that their children have to endure the physical and emotional harm from the bully in their school canteens, classrooms, neighbourhoods, and cyberspace. The bully is virtually a fact of life for so many children these days. Parents demand a truly practical book that shows them, step-by-step, the exact skills that they can teach their children to protect themselves from the bully. They realize that their children can never directly change the bully; the best chance of overcoming the horrors of bullying is for the children to improve themselves. Children can arm themselves with safe and proven skills to outsmart the bully. The hard-earned wisdom from many experienced parents, their children and mental health professionals working with the victim and the bully forms the backbone of this book. Seeing through the games the bully plays quickly gives your child calmness and confidence. Enjoy the popcorn: Re-scripting the bully horror show you how to teach your child instant mind-body skills to avoid unnecessary and risky confrontations, relieve deep emotional stress, confuse the bully with 13 Taiji talk tactics and successfully develop greater self-knowledge, social confidence and emotional maturity.

This book, Allah: Understanding God in Islam, apart from describing what Islam is, explains that all prophets sent by God, including Prophet Abraham, Prophet Moses, and Prophet Jesus (Jesus Christ), were Muslims prophets too

and that Muslims must believe in them. The book specifically informs readers that Allah is the same God of every human being of any race, culture, or religion. The book delves into the messages of the Quran, Islam's Holy Book, to highlight the importance of knowing the true nature of God, called Allah in Islam. It points out that the proper knowledge of God would compel people to adhere to His commandments in having faith in Him and His practical guidance to acquire a close and rewarding relationship with Allah and His creations as well as with all human beings, who, though diversified in various nationalities and faiths, can be united in spirit and togetherness. The book also emphasises that following Allah's guidance with understanding would facilitate people to appreciate the natural gifts Allah has given to every person and so, instead of getting overwhelmed by ignorance and falling into the trap of hatred and hostility, enable them to live a happy, peaceful, and harmonious life.

Advancement in telecommunications has drastically changed the way that people communicate, particularly in a professional capacity. The onslaught of e-mail, text and even instant messaging has given people other means with which to communicate with one another, but in doing, the art of personal, verbal and face-to-face communication is being lost, resulting in miscommunication and broken personal and professional relationships. What is the answer to global terrorism? The fundamental point about terrorism is present in its very name: it is violence designed to achieve political gain by spreading terror. Terrorism is essentially asymmetric and works by cowering people into submission. Which is precisely why it can be answered; after all, who wants to be bullied into submission? In fact, the fight against terror does not only take place in the dusty hills of Afghanistan, Africa or Asia: it takes place in our own minds. In this book, world expert Paul Wilkinson answers several frequently asked questions about terrorism. What do terrorists really want? What can be done to defeat them? What is the future of terrorism? There is no "one size fits all" solution, instead it is a multi-headed beast constantly mutating and adapting to changes in the political and strategic environment.

How do you solve a problem like North Korea?

Arcadia Greentree knows she isn't exactly normal. But then she discovers she isn't Arcadia Greentree either. Arcadia sees the world like no one else. Exceptionally observant, the sixteen-year-old is aware of her surroundings in a way that sometimes gets her into trouble and out of it again. But when she seeks to unravel a mystery at school, a tragedy at home forces her to

use her skills to catch a killer.

We all negotiate every day, whether we realise it or not. Yet few people ever learn how to negotiate. Those who do usually learn the traditional, win-lose style. In today's interdependent world of business partnerships and long-term relationships, however, a win-win outcome is fast becoming the only acceptable result. Win-win negotiators value their business and social relationships—winning in a given negotiation is not as important as maintaining their winning relationships, but this does not mean they must sacrifice their interests. Win-win negotiators believe they can win both the negotiation and the relationship. Written in a lively, succinct and easy-to-read style, David Goldwich shows you how to develop the win-win negotiator's mindset and introduces the core skills and techniques to successfully negotiate win-win agreements. Learn the art of a win-win negotiation, and achieve win-win results in all your negotiations today!

Do you know people who seem to get along well with just about anyone? People who always have something interesting to say? They close the best deals, land the biggest clients and quickly work their way up the professional ladder. Are these people just born natural communicators with magnetic personalities? Do they have something you don't, or know the secret to being popular and successful? Absolutely not. These people have simply mastered the process of interacting effectively with others—knowing exactly how to click with people from the first time they meet to understanding the importance of building rapport and maintaining these relationships in the long term. You can be one of them too.

New in this edition: REPENTANCE ON DEATH ROW. AN EXCLUSIVE INTERVIEW WITH SISTER GERARD, THE NUN WHO COUNSELLED THE TWO WOMEN ACCOMPLICES Singapore's most bizarre murder case drew to a close on 25 November 1988 when Adrian Lim, his wife Catherine Tan Mui Choo and mistress Hoe Kah Hong were hanged at Changi Prison. After two children were found dead within a fortnight in 1981, the Toa Payoh 'ritual killings' proved shocking for the revelations about self-styled spirit medium Adrian Lim's greed, depravity and cruelty. The confident trickster persuaded numerous women that he possessed supernatural powers and they paid him with money, valuable sex. He tortured his victims with primitive electric shock treatments that left one man dead. He was a monster who slapped and kicked his women to make them fear and obey him as he acted out his every lustful perversion. He turned his wife into a prostitute and stripper. He made his mistress lure the children to their deaths. Sentencing all three to hang, trial judges said of Adrian Lim: "We are revulsed by his abominable and depraved conduct."

How can you learn to live more sustainably, without giving up your lifestyle, and why should you care? We often hear the terms sustainability and sustainable development, but how much do we really understand about what they mean? Is sustainability just climate change in a different package? What's the difference between global warming and climate change? And, most importantly, what can be done about it? As well as explaining some of the most pressing problems, this book answers these questions and looks at how we are progressing. While many of these problems can seem overwhelming when viewed in isolation, many of the answers are, in fact, connected. Quite often the adoption of one solution will solve more than one problem at a time. Crucially, this book also explains that the individual has real power. It is easy to feel overwhelmed by the scale of the problems the world is facing, yet in truth, each one of us has a significant contribution to make in our lives

The skills in shortest supply for the future workplace are not technical, but behavioural – creativity, problem-solving and critical thinking. Raising Thinkers begins with an exploration of this skills gap in developed countries across the East and West from a national, corporate and educational perspective. In Asia there is growing unhappiness with a school

system that is too narrowly focused on rote learning and teaching to test. In the West there is much debate about the efficacy of school systems that either cater largely to the lowest levels of ability or that too blindly strive to top global education rankings. Raising Thinkers provides insight into the future that today's children will inhabit as adults and what public school systems are currently serving up. It covers the mechanics of high-level, critical and creative thinking, problem solving and decision making and proposes a curiosity-based approach to problems that should be taught right from school-going years. School reform will always lag behind the ever evolving needs of the corporate world. For current scholars and parents, change will come too late – therefore Raising Thinkers is also a guide aimed at helping parents and caregivers bridge the skills gap in fun, useful and practical ways.

E-mail is one of the greatest inventions of our lifetime – phenomenally affecting the way we communicate. Reading, writing and managing e-mail is taking up an increasing amount of our time. But are we using it right? E-mail can be used to stay in touch whether we are traveling or working from home. Perhaps we can relax standards when it comes to personal e-mails, but e-mailing for business purposes has reached a new dimension. People whose jobs never used to involve writing skills are now replying dozens of e-mails each day. But under such pressure to respond quickly, what happens to the quality of the messages exchanged? The bottom line remains: just as body language helps you to making an impression in person, what you write and how you write it affects what people think of you and your organisation. Be it a thank you note, a meeting reminder, a proposal or a sales pitch, a well-written message that looks and sounds professional will make it easier for people to want to do business with you. It will help people feel good about communicating with you and help you achieve the right results.

Addictive Internet use is a relatively new phenomenon of which many people are unaware, and for which treatment is often not sought. Left ignored, excessive Internet use may lead to deteriorating relationships or interfere with normal functioning in life. Navigating the Cyberworld With Your Child highlights the different types of Internet-related addictions that a child or teenager may face – such as pornography, social networking and texting, gaming and online shopping – and discusses prevention and treatment approaches. It also explores legal problems that arise from cybercrimes, and offers intervention strategies, services and programmes available for both victim and perpetrator. Finally, it takes a look at future technology and potential research areas.

What challenges are posed by the world economy for governments and businesses, and what changes are needed if we are to survive and prosper in the future? The strength of the world economy affects everyone. From Thessalonika to Shanghai, Indonesia to Illinois, the prosperity and economic security of billions of people is now bound together more closely than ever before. Overall, the economic news for the last two decades has been positive. Billions of people in traditionally poorer parts of the world are climbing out of poverty - but everyone's economic future is uncertain. As the world emerges from the largest economic crisis in peace time, it is painfully clear that economic cycles and shocks can be frequent, complex and severe. The book provides essential facts about the global economy, its regions and prospects. It also outlines current and future economic challenges, how they arose and why they matter, as well as demographic trends and key country strategic economic/business outlooks. Above all, the book highlights what changes are needed to improve the global economy and what corporations need to do to survive and prosper in the new post-crisis world.

Since independence in 1965, Singapore has developed its own unique approach to managing the diversity of Race, Religion, Culture, Language, Nationality, and Age among its citizens. This approach is a consequence of many factors, including its very distinct ethnic makeup compared with its neighbours, its ambitions as a globally oriented city-state, and its small physical size. Each of these factors and many others have presented Singapore society with a range of challenges and opportunities, and will in all likelihood continue to do so for the foreseeable future. In the writing of this book, the author team set themselves the task of projecting the impact of current domestic and international social trends into the future, to anticipate what Singapore society might look like by around 2040. In doing so, they analyse the particular path that Singapore has taken since independence, in comparison with other multicultural societies and with regard to the balance between the necessity of forging a new national identity after British rule and departure from Malaysia, and the need to ensure that Singapore's ethnic minority populations remain socially enfranchised. They further consider how current trends may develop over the next couple of decades, what new challenges this may present to Singapore society, and what might be the likely responses to such challenges. In this book, Singapore is a case study of a global city facing the challenges of developed-world modernity in frequently acute ways.
