Bovary, who has adulterous affairs and lives beyond her means in order to escape the banalities and emptiness of provincial life. Though the basic plot is rather simple, even archetypal, the novel's true art lies in its details and hidden patterns. Flaubert was a notorious perfectionist and claimed always to be searching for le mot juste ("the precise word"). Madame Bovary takes place in provincial northern France, near the town of Rouen in Normandy. The story begins and ends with

inevitable since the ideas are unfamiliar and complex, but it seems more forbidding than it really is and the reader who persists will find it worth the effort. The Guide is intended to be read in conjunction with Capital (though it can be read on its own). It goes through Marx's masterpiece, chapter by chapter, setting each in the context of the whole and picking out the main threads of the argument. Each of Marx's technical terms is explained when it is first used and is also

The world that was revolutionized by industrialization is being remade by the information revolution. But this is mostly a revolution from above, increasingly shaped by a new class of technocrats, experts, and professionals in the service of corporate capitalism. Using Marx as a touchstone, Timothy W. Luke warns that if communities are not to be overwhelmed by new class economic and political agendas, then the practice of democracy must be reconstituted on a more populist basis. However, the galvanizing force for this new, more community-centered populism will not be the proletariat as Marx predicted, nor contemporary

Instead of offering an insular `Marxian' account of nationalism, the book identifies arguments in Marx and Engels' writings that can help us to think more clearly about national identity and conflict today. These arguments are located in a distinctive theory of politics, which enabled the authors to analyse the relations between nationalism and other social movements and to**

all that Marx wrote on this subject. François Furet provides an extended discussion of Marx's thinking on the revolution, and Lucien Calvié situates each of the selections, drawn from existing translations as well as previously untranslated material, in its larger historical context. With his early critique of Hegel, Marx started moving toward his fundamental thesis: that the state is a product of civil society and that the French Revolution was the triumph of bourgeois society. Furet's interpretation follows the evolution of this idea and examines the dilemmas it created for Marx as he considered all the faces the new state assumed over the course of the Revolution: the Jacobin Terror following the

constitutional monarchy, Bonaparte's dictatorship following the parliamentary republic. The problem of reconciling his theory with the reality of the Revolution's various manifestations is one of the major difficulties Marx contended with throughout his work. The hesitation, the remorse, and the contradictions of the resulting analyses offer a glimpse of a great thinker struggling with the constraints of his own system. Marx never did elaborate a theory of an autonomous state, but he never stopped wrestling with the challenge to his doctrine posed by late eighteenth-century France, whose changing conditions and successive regimes prompted some of his

most intriguing and, until now, unexplored thought.

Moishe Postone undertakes a fundamental reinterpretation of Karl Marx's mature critical theory. He calls into question many of the presuppositions of traditional Marxist analyses and offers new interpretations of Marx's central arguments. He does so by developing concepts aimed at grasping the essential character and historical development of modern society, and also at overcoming the familiar dichotomies of structure and action, meaning and material life. These concepts lead him to an original analysis of the nature and problems of capitalism and provide the basis for a critique of 'actually existing socialism'.

According to this new interpretation, Marx identifies the core of the capitalist system with an impersonal form of social domination generated by labor and the industrial production process are characterized as expressions of domination generated by labor itself and not simply with market mechanisms and private property. Proletarian labor and the industrial production process are characterized as expressions of domination rather than as means of human emancipation. This reinterpretation entails the form of economic growth and the structure of social labor in modern society to the alienation and domination at the heart of capitalism. This reformulation,

different models of science. The key methodological themes of Marx's work and their development are shown with particular attention paid to the elements of dialectics and materialism. Four models of science are outlined: positivism; critical rationalism; scientific conventionalism and scientific realism. The author concludes that Marx's method is a good example of scientific realism.
