Provide competent and sensitive maternal and newborn nursing care with Clinical Companion for Maternity & Newborn Nursing, 2nd Edition! Ideal for quick reference in the clinical setting, this book offers the information you need on topics such as pregnancy, childbirth, postpartum care, and care of the newborn, including potential complications for each. Expert authors Dr. Shannon E. Perry, Kitty Cashion, Dr. Deitra Leonard

Lowdermilk, and Kathryn R. Alden stress the importance of safe nursing practice as outlined in the Quality and Safety Education for Nurses (QSEN) initiative. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be used for quick reference in critical situations. Nursing Alerts highlight critical information that must be considered when providing care. Medication

Guides in an appendix provide a key reference for common drugs and their interactions. Updated content provides the most current practice guidelines, including expanded information on obesity, the late preterm infant, and fetal heart rate pattern identification. Safety Alerts highlight developing competencies related to safe nursing practice in conjunction with the QSEN initiative on quality and safety in nursing care. Nursing care for pregnant women and children is a family-centered process, and *Maternal and Child Nursing Care, 3e*, is a text that addresses the needs of families across the continuum, from conception through adolescence.

based practice. This edition adds case studies preparing you for the new Next Generation NCLEX® examination. Best of all, active learning tools and features make it fun to master nursing concepts, offering plenty of opportunities to apply your knowledge to the practice setting. Nursing Care Plans help students apply the nursing process to plan individualized care in the most common maternity and pediatric situations. Clinical Reference sections in pediatrics chapters

provide basic information on disorders and their related anatomy and physiology, differences in body systems between children and adults, commonly used drugs, lab values, diagnostic tests, and procedures. Clinical Judgment boxes highlight situations designed to test clinical judgment skills. Health Promotion boxes highlight information needed to perform a comprehensive assessment of well infants and children at various ages. Safety Alerts emphasize what is

important to remember when providing safe and optimal quality care.

Pathophysiology boxes present an illustrated overview of illnesses and how to manage them. Want to Know boxes provide teaching guidelines, including sample answers for questions that are likely to be asked or topics that need to be taught. Communication Cues offer practical tips for verbal and nonverbal communication with patients and families. Glossary at the end of the book gives students quick

access to all key terms and definitions. NEW! Next Generation NCLEX® (NGN) examination-style case studies expose students to how content will be tested in the exam; case studies are either single-situation or unfolding studies. NEW! Updated Drug Guides summarize the latest information on medications.
