***The book offers an interdisciplinary perspective on finance, with a special focus on stock markets. It presents new methodologies for analyzing stock markets' behavior and discusses theories and methods of finance from different angles, such as the mathematical, physical and philosophical ones. The book, which aims at philosophers and economists alike, represents a rare yet important attempt to unify the externalist with the internalist conceptions of finance.***

*appear to be the coldly calculating world of markets and business enterprise? Though often mathematically modelled in dry terms, markets can be looked at instead as meaningful domains of human activity. To economists, markets have been seen as nothing but objective 'forces' or allocation 'mechanisms'. This book, however, argues that they can be seen as involving the human spirit, personal expression and moral commitments. It presents the view that markets are not so much things that need to be measured as meanings that need to be narrated and interpreted. The aim of this book is to introduce*
