“ Although standards-

in the United States

and the United

spread across the world, as an approach to systemic reform. It might appear that there is a world-wide “ tsunami ” of standards-based reform that will standardize and homogenize the educational system across the globe. This volume makes it very

clear, however, that
there is no one

approach to standards-
based reform and

countries change –

there is a danger in
paying attention to its
evolution and impact
in only one context.

That ' s what makes
this volume so

valuable. Louis

Volante has drawn

together descriptions from a wide range of countries, all involved in large-scale reform and using standards and assessments as part of their process. What becomes very obvious is that the language may be the same but the words reflect different contexts and can

represent very different ideals, values, and processes. I ' m sure you will find this book as interesting and challenging as I have – a gem that pushes your thinking and does not allow readers to remain neutral. ” (Lorna Earl)

This volume presents research from a variety of perspectives on the enhancement of human intelligence. It is organized around five themes – enhancement via instruction; enhancement via development (over

the life cycle);
enhancement over
time; enhancement
via new constructs;
and new directions
in enhancement.

Three key issues
are addressed:

First, although most
of the scientific
research on
intelligence has
concerned what it is,

this volume attends to the consequential societal and economic issue concerns of whether it can be increased, and how. Second, intellectual enhancement is particularly important when targeted to minorities and the
