Papers are mainly focusing on Edexcel, AQA & OCR GCSE examinations as well as other similar examination boards.

Turkey's education system stands out internationally as a success story. In recent decades, participation has been vastly expanded, becoming universal at lower levels of schooling and outperforming other middle-income countries in upper secondary education. However, the education system is also marked by disparities, with only around half of 15-year olds acquiring the essential competencies

Learn how to acquire a personalized education through self-directed learning, and meet post-secondary entrance requirements.

“Although standards-based reform emerged in the United States and the United Kingdom, the idea has spread across the world, as an approach to systemic reform. It might appear that there is a world-wide “tsunami” of standards-based reform that will standardize and homogenize the educational system across the globe. This volume makes it very clear, however, that there is no one approach to standards-based reform and countries change – there is a danger in paying attention to its evolution and impact in only one context. That’s what makes this volume so valuable. Louis Volante has drawn together descriptions from a wide range of countries, all involved in large-scale reform and using standards and assessments as part of their process. What becomes very obvious is that the language may be the same but the words reflect different contexts and can represent very different ideals, values, and processes. I’m sure you will find this book as interesting and challenging as I have – a gem that pushes your thinking and does not allow readers to remain neutral.” (Lorna Earl)

This book will introduce the history and practices of mathematics education in Korea. How it has been influenced from Japan, America, and other countries, and has developed into the unique Korean style of mathematics education. The editors have planned to include most of the topics researchers outside Korea want to know mathematics education in Korea.

An indexing, abstracting and document delivery service that covers current Canadian report literature of reference value from government and institutional sources.

Towards Evidence-based Policy for Canadian Education

Manitoba School Journal

Mathematics Education in Korea

Evidence is increasingly being demanded before education policy in Canada is developed. Unfortunately, all too often education research and policy proposals come from relatively isolated perspectives. This volume arose from a project that brought together a diverse group of stakeholders as part of an ongoing effort to improve communications between relevant groups.
