Raman's memoir chronicles the dramatic change in his profession as an accountant to launching him on the unchartered waters of management of research and development projects in Council of Scientific and Industrial Research and suggesting a fair and public passenger road transport system operated by State Road Transport Undertakings. His role as a trainer in these two diverse fields – scientific research, employing knowledge workers, and passenger road transport, employing blue-collar workers and a was daunting, which he meets with a suitably tailored approach in the design and delivery of training programmes. His research studies on Indian road transport operating under administrated fares and social costs and his seminal study of the US highways should interest readers in the area of public policy reforms. His academic career spread over the whole gamut of teaching, research, consulting, guiding research students, administration of business schools and experience earlier in government and the public but educative exposure to the Indian Parliamentary System vouch for his versatility. Raman's memoir should excite peers and students alike and serve as a model for future writers. Narrated with candour and humour, Raman's description of his early life in government servants and his own failed attempt to become a bureaucrat, his pen picture of the Delhi's Madrasas, his family's musical legacy and religiosity and his values of accountability and integrity, ungrudgingly shared in this memoir, reveal his credentials as a writer.
