World Development Indicators 2015 World Development Indicators 2015 provides a compilation of relevant, highquality, and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers, and citizens find and use data related to all aspects of development, including those that help monitor progress toward the World Bank Group's two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators—world view, people, environment, economy, states and markets, and global links. As in past editions, World Development Indicators reviews global progress toward the Millennium Development Goals (MDGs) and provides key indicators related to poverty. WDI 2015 includes: * A selection of the most popular indicators across 214 economies and 14 country groups organized into six WDI themes * Thematic and regional highlights, providing an overview of global development trends * An in-depth review of the progress made toward achieving the Millennium Development Goals * A user guide describing resources available online and on mobile apps A complementary online data analysis tool is available this year to allow readers to further investigate global, regional, and country progress on the MDGs: data.worldbank.org/mdgs. Each of the remaining sections includes an introduction; six stories highlighting specific global, regional or country trends; and a table of the most relevant and popular indicators for that theme, together with a discussion of indicator compilation methodology. WDI DataFinder Mobile App Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets, using iOS, Android, and BlackBerry, available in four languages: English, French, Spanish, and Chinese. Use the app to: * browse data using the structure of the WDI * visually compare countries and indicators * create, edit, and save customized tables, charts, and maps * share what you create on Twitter, Facebook, and via email

Decades of research have demonstrated that the parent-child dyad and the environment of the familyâ€"which includes all primary caregiversâ€"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
