What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? In this introductory textbook, accomplished historian John Fea shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. Deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ.

This collection of essays adopts a distinctive approach to environmental legal issues, representing a variety of specializations, ranging from public law to international law. In 1873, John Stuart Stuart-Glennie elaborated a theory of 'the moral revolution' to characterize the historical shift from roughly 600 BCE in a variety of civilizations, as part of a critical theory of history. This book brings light to the now eclipsed theory and offers new contexts and understandings of the phenomenon.

A powerful reinterpretation of the founding of America by a Pulitzer Prize-winning historian. The creation of the United States of America is the central event of the past four hundred years," states Walter McDougall in his preface to Freedom Just Around the Corner. With this statement begins McDougall's most ambitious, original, and uncompromising of histories. McDougall marshals the latest scholarship and writes in a style redolent with passion, pathos, and humour in pursuit of truths often obscured in books burdened with political slants. With an insightful approach to the nearly 250 years spanning America's beginnings, McDougall offers his readers an understanding of the uniqueness of the "American character" and how this character has shaped the wide ranging course of historical events. McDougall explains that Americans have always been in a unique position of enjoying "more opportunity to pursue their ambitions than any other people in history." Throughout Freedom Just Around the

Corner the character of the American people shines, a character built out of a freedom to indulge in the whole panoply of human behaviour. The genius behind the success of the United States is founded on the complex, irrepressible American spirit. A grand narrative rich with new details and insights about colonial and early national history, Freedom Just Around the Corner is the first instalment of a trilogy that will eventually bring the story of America up to the present day, a story epic, bemusing, and brooding.

The present study is an attempt to place in historical perspective the relationship between early capitalism as exemplified by Great Britain, and the Negro slave trade, Negro slavery and the general colonial trade of the seventeenth and eighteenth centuries. It is strictly an economic study of the role of Negro slavery and the slave trade in providing the capital which financed the Industrial Revolution in England and of mature industrial capitalism in destroying the slave system.

A textbook tracing the history of the United States from the Industrial Revolution to the present. MICHIGAN ENCYCLOPEDIA is the definitive reference work on Michigan ever published. The noted Michigan historian Dr. Matthew Lawrence Daly, Assistant Professor of History at Grand Valley State University, has authored articles on Introduction to Michigan History, Early History of Michigan, and Michigan History. These articles cover the history of Michigan, from the early explorers to twenty-first century events. Other major sections in this reference work are Michigan Symbols and Designations, Geography and Topography of Michigan, Profiles of Michigan Governors, Chronology of Michigan Historic Events, Dictionary of Michigan Places, Michigan Constitution, Bibliography of Michigan Books, Pictorial Scenes of Michigan, State Executive Offices, State Agencies, Departments and Offices, Michigan Senators, Michigan Assembly Members, U.S. Senators and U.S. Congress members from Michigan, Directory of Michigan Historic Places and Index. MICHIGAN ENCYCLOPEDIA contains stunning photographs and portraits to compliment the expertly written text. Population charts are arranged alphabetically by city or town name, and by county. This allows students easy access to find population figures for their area of interest. Other population charts list all places in Michigan by largest populated places to least populated places by city or county. Directories contain the information on elected state and federal officials along with their contact information including mail and email addresses, phone and fax numbers. Easy to use reference maps are included to find your elected state or federal officials. The Directory of State Services lists the head officials and full contact information on state agencies and departments, some of which were just newly created by the legislature. The Directory of Michigan Historic Places contains all the latest up to date information on every Michigan historic place. The Bibliography includes that latest books published on Michigan. Following its publication in 1974, Grant Gilmore's compact portrait of the development of American law from the eighteenth century to the mid-twentieth century became a classic. In this new edition, the portrait is brought up to date with a new chapter by Philip Bobbitt that surveys the trajectory of American law since the original publication. Bobbitt also provides a Foreword on Gilmore and the celebrated lectures that inspired The Ages of American Law. WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD AN AMERICAN BOOK AWARD FINALIST Now in paperback, *War Without Mercy* has been hailed by *The New York Times* as “one of the most original and important books to be written about the war between Japan and the United States.” In this monumental history, Professor John Dower reveals a hidden, explosive dimension of

the Pacific War—race—while writing what John Toland has called “a landmark book . . . a powerful, moving, and evenhanded history that is sorely needed in both America and Japan.” Drawing on American and Japanese songs, slogans, cartoons, propaganda films, secret reports, and a wealth of other documents of the time, Dower opens up a whole new way of looking at that bitter struggle of four and a half decades ago and its ramifications in our lives today. As Edwin O. Reischauer, former ambassador to Japan, has pointed out, this book offers “a lesson that the postwar generations need most . . . with eloquence, crushing detail, and power.”

For the first time since its invention over 500 years ago, the print medium is being challenged as the primary means of recording and communicating ideas. Indeed, within the printing industry itself the advent of digital technology has rendered the craft of hand setting metal type obsolete - the days of the skilled compositor are now at an end. Patrick Duffy's work sets out to examine the experiences of the skilled compositor in the period 1850 to 1914. Focusing primarily on the workplace and the workplace institutions, it aims to explore issues of control, co-operation and conflict in order to determine if the compositor did, as many labour historians claim, belong to an aristocracy of labour. Drawing on a wide range of source material from trade society minutes to Parliamentary Papers, the author explores the diversity of experience that compositors had in the workplace and the uneven patterns of change that the trade experienced. The study throws light on some of the issues raised by these changes: what part did ancient craft traditions play in the maintenance of control in the workplace? Why were women excluded from this particular work when they were accepted in most other parts of the trade? To what extent did trade society officials represent the aspirations of the rank and file membership? Starting with an overview of the nature, growth and development of the trade, the book goes on to examine the occupational and social aspects of the compositors' experience, with a chapter devoted to

women's role in the printing trade. Finally, the formation, functions and development of relevant trades unions and employers' associations is discussed. This insightful analysis of the experience of the skilled compositor provides a valuable case study for labour historians at the same time furthering our understanding of a somewhat neglected aspect of printing history.

"And then there came a day of fire!" From its shocking curtain-raiser—the conflagration that consumed Lower Manhattan in 1835—to the climactic centennial year of 1876, when Americans staged a corrupt, deadlocked presidential campaign (fought out in Florida), Walter A. McDougall's *Throes of Democracy: The American Civil War Era, 1829-1877* throws off sparks like a flywheel. This eagerly awaited sequel to *Freedom Just Around the Corner: A New American History, 1585-1828* carries the saga of the American people's continuous self-reinvention from the inauguration of President Andrew Jackson through the eras of Manifest Destiny, Civil War, and Reconstruction, America's first failed crusade to put "freedom on the march" through regime change and

nation building. But *Throes of Democracy* is much more than a political history. Here, for the first time, is the American epic as lived by Germans and Irish, Catholics and Jews, as well as people of British Protestant and African American stock; an epic defined as much by folks in Wisconsin, Kansas, and Texas as by those in Massachusetts, New York, and Virginia; an epic in which Mormon prophet Joseph Smith, showman P. T. Barnum, and circus clown Dan Rice figure as prominently as Herman Melville, Walt Whitman, and Henry Ward Beecher; an epic in which railroad management and land speculation prove as gripping as Indian wars. Walter A. McDougall's zesty, irreverent narrative says something new, shrewd, ironic, or funny about almost everything as it reveals our national penchant for pretense—a predilection that explains both the periodic throes of democracy and the perennial resilience of the United States.

Growing up in Singapore in the 80s has been challenging. I didn't know much about life or economy. I didn't know what I want to do apart from playing. I know I had to study and get a job. In school we had to write composition about our profession when we grow up. I had never wanted to be a philosopher, let

alone writing about social philosophy. It is just that growing up with a single parent is tough. It is tougher when she is uneducated and I had to learn most things by myself. After my National Service, I decided to further studies. That was when I was exposed to philosophy and psychology in the UK. After graduation in 1999 with a degree in Electronics, I came back home to resume my National Service (I disrupt it and had about 2 months left). The life in UK exposed me to something that I did not notice when growing up in Singapore. I find local social scene unsatisfactory. They are Confucians, Muslims, Christians, freethinkers and humanists. Most time, they are preoccupied with how to earn more money. Religion does not give me the fulfillment that it promised. In addition, most were based on Singaporeans' interpretation of the Bible and Buddhism's dharma. Most times, I feel that everything that Singaporeans do has got to do with wealth creation or at least with the expenditure of it. It end up like what Pope Francis referred to as "the cult of money." Organised religion involves more fear-mongering than cultivating an inner grace and peace. Hence this book is about how I relate an ancient thinker's ethics (Aristotle) to the

present day. I find Aristotle's ethics to most suit my needs as a man and lover. It does not pretend to be more than what it seek, the golden mean. It does require us to think and explore the values to find balance and achieve wisdom with intellectual and moral virtues. I also find other philosophers (French or not) particularly insightful and thought-provoking. They offer me explanation and exploration on subjects like love, sex, and death. Freudian psychoanalysis are also very penetrating in their findings and insights. Moreover, I needed some contemporary psychological theory, not in-depth psychoanalysis, to back Aristotle's model of ethics (intellectual and moral virtues). Hence the psychological background of my book. I got acquainted with these psychological theories when I was preparing myself to be a financial consultant. I later found out more about them and they became useful in my work and life. Hence I would like to share it with people in Asia so that they can ask the right kind of questions in life in order to learn more about themselves and the social milieu they are living in. Because everyone of us are affected by the social sciences (politics, economics and sociology). This book will, I hope,

allow us to understand why we are irrational and how we can make rational changes through reasonings in their life and achieving eudaimonia. My wish is simply to share what I enjoy doing, apart from creating useful ideas to improve the world. Through my book, I hope to make others understand religion, science and philosophy and how they play an increasingly integral part in the Asian century.

This book traces the development of the standard property rights over five kinds of natural resource - inland rivers, ocean fisheries, petroleum resources, gold and base metals and forest resources - from classical times through to the 19th century. Completely private resources and those in the public (or Crown) lands are given equal attention and a simple supply-and-demand model is used to explain how property rights are altered over time. Scott also provides the reader with a unique set of characteristics for defining rights and numerous case studies and examples of their evolution, highlighting the increasing recourse to common law courts and government legislation and the problems caused by competing demands on the same, limited

reconstructed industrial settlements, preserved landscapes and historic townscapes. Our society and its creative core of literature, visual arts and architecture were profoundly affected by the whole process. The British Carboniferous legacy for wider humankind was profound and permanent, more so with the realisation over the last 60 or so years that the emission of carbon dioxide during human utilisation of fossil fuels has caused global warming with all its many unintended consequences. Coal, iron ore and other metallic ores and materials had been extracted from Carboniferous strata and traded for over five hundred years before the Industrial Revolution, notably since thirteenth century in the London Trade of coal from Tyneside. By contrast, the neighbouring island of Ireland had no great deposits of coal and ironstone, although with gold, copper, lead and zinc aplenty. What produced this abundance of fossil carbon preserved in the Carboniferous rocks of Britain? Why did the Industrial Revolution originate in Britain in the early- to mid-eighteenth century and not elsewhere in mainland Europe where coal was also abundant? Linked geological, economic and social factors combined to enable the formation, preservation, exposure and exploitation of neighbouring coal- and iron-bearing reserves. The principal features of the distinctive industrial regions that grew up are traced back to their landscapes and geology in a major section of the book. Great

industrial cities became wonders of the world, their entrepreneurs and industrialists proud at what they had created. However, industrial workers in their mines, foundries, forges, factories and mills had to collectively fight for economic, political and social rights and then to cope with the many traumas of de-industrialisation and unemployment. Measures for Measure will appeal to all with an interest in the industrial history of Great Britain and its impact on the landscape, economy, social history and culture of the island.
