This new full-color pathology atlas is specifically designed to accompany Robbins and Cotran Pathologic Basis of Disease, 7th Edition. More than 1,200 full-color illustrations richly depict all of the major conditions that are most commonly covered in pathology courses and on the USMLEs. Gross and microscopic pathology images are complemented by full-color conceptual line drawings and corresponding radiologic images.

This book, now seeing its fourth edition, has been appreciated as the book in dermatopathology for residents in India. It has, in the past, received acclaim for its simplicity, clarity and brevity. This edition takes these basic concepts of the book further. All the original features of the book such as readable presentation of content, clinical correlation, flow charts, text boxes and tables of comparison are retained. The book is now being published in colour and several new features have been added. The book will continue to serve as a ready reckoner for students as well as for the practising dermatologists and pathologists.

Part of the trusted Robbins and Cotran family, Robbins Basic Pathology provides a readable, well-illustrated and concise overview of the principles of human pathology that's ideal for today's busy students. This thoroughly revised edition continues with a strong emphasis on pathogenesis and the clinical features of disease, adding new artwork and more schematic diagrams to further aid in summarizing key pathologic processes and expand the already impressive illustration program. Excellent art program boasts high-quality photomicrographs, gross photos, and radiologic images to supplement the world-class illustrations. Bulleted summary boxes provide quick access to key information and easy review of key concepts. Highlights pathogenesis, morphology, and pathophysiologic content throughout.

Robbins and Cotran Review of Pathology E-Book

SAQs, MCQs, EMQs and OSCEs for MRCOG Part 2, Second edition

Sternberg's Diagnostic Surgical Pathology

Previous editions of this book have proved indispensable for trainee surgeons preparing for the MRCS and AFRCS examinations. This extensively revised new edition is presented in a compelling new style and in a larger format. Beginning with a 'route-map' showing 'how to use this book', the text offers concise accounts of the core topics in pathology required of surgeons in training. There is particular emphasis on tissue pathology but full account is taken of relevant aspects of microbiology, haematology, immunology and clinical chemistry. Tables of normal laboratory values are included. Each major disorder is examined from the point of view of Cause, Structure, and Behaviour. Genetics, molecular biology and imaging receive balanced attention as do transfusion, telepathology and audit. The use of computers is outlined and suggestions given on access to Internet sources for learning purposes. The needs of trainees in countries outside Europe have been considered carefully. Illustrations have been selected to provide a clear, pictorial account of complex points. The inclusion of biographies of surgical pioneers adds interest and enables candidates to put their knowledge into context. A special feature is a series of marginal 'signposts' in the form 'Now Read' that take candidates to interrelated topics quickly and easily. There is extensive cross-referencing and a comprehensive index.

A sound knowledge of basic sciences is vital for any doctor with an interest in ophthalmology, and is a significant part of all postgraduate examinations in the subject. Pathology: Quick Review And Mcqs, 2nd Edition

This book established itself in its first edition as the definitive 'one-stop-shop' revision aid; the only one available to encompass all elements of the MRCOG Part 2 examination in a single volume. Now incorporating practice EMQs as well as the standard question types, this second edition will ensure that it retains its place on the 'must-have' list for every candidate preparing for this exam. Concentrating on testing the candidate's theoretical and practical knowledge as recommended in the current MRCOG syllabus, the book tests the trainee with questions in obstetrics and gynaecology and those aspects of medicine, surgery and paediatrics relevant to the practice of both. The book is divided into four key parts, one for each style of question, each of which opens with an introductory section on how to approach the exam and, crucially, how to fail it. # Part 1 provides a series of short answer practice papers. Common mistakes are highlighted as well as a list of key points required to get full marks. A sample answer is given for each question # Part 2 contains a mock paper for the MCQ part of the exam, containing 225 questions with answers and helpful annotations # Part 3 introduces the EMQ, giving the reader 40 questions in the style of the examination, together with answers and explanatory notes # Part 4 is devoted to the OSCE, with descriptions of 20 sample stations assessing different aspects of clinical practice, advice on how to tackle these, and suggested marking schemes. Throughout, questions have been designed to test factual knowledge and understanding, problem-solving ability, and clinical and communication skills.
