MCQs for Medical Students and Doctors is an unusual

multiple-choice question book on three accounts: • It covers thirteen of the specialties in medicine that every medical student has to face and every first-contact physician has to deal with in encounters with their patients irrespective of the doctor's field of specialization; • Unlike many MCQ books, this book goes further by providing comments that accompany >99% of the answers as explanations or additional information. This makes this book an MCQ book with "short notes"; • It is different from most, if not all, MCQ books in medicine for the others are usually specialty-specific. This MCQ book successfully covers fundamental topics in three selected pre-clinical subjects viz.: anatomy,

pharmacology and therapeutics, and parasitology as well as ten clinical specialties viz.: obstetrics and gynecology, dermatology, anesthesia, mental health, ophthalmology, otorhinolaryngology, general surgery, orthopedics/trauma, internal medicine, and general pediatrics. Detailed material is provided in “Book Reviews” and “How to Use” for the reader’s guidance.

This new review guide contains approximately 500 multiple choice questions on obstetrics and gynecology. Each question is followed by the correct answer and an explanation of the answer. A PC disk accompanies the book, enabling the reader to take several practice tests under exam conditions.
