With its comprehensive overview of core technology areas, "MCSD in a Nutshell" is the perfect study guide and resource to help developers master technologies with which they relatively are inexperienced. Cowboy stories and movies about the Wild West are full of amazing characters. Yet many of the lawmen we think of as heroes were anything but -- some were violent scoundrels and outlaws themselves. Among all the lawmen of the frontier, one man stands out as a true hero: Bass Reeves. In his day, Bass Reeves was the most successful federal marshal in the United States. True to the mythical code of the West, he never drew his gun first. He rounded up hundreds of outlaws and was shot at countless times but was never hit. Bass Reeves was born into slavery. And though the laws of his country enslaved him and his mother, when he became a free man he served the law with such courage and honor that he was known and respected all over the Indian Territory. Gary Paulsen's dramatic account of the life of Bass Reeves, through stories both real and imagined, makes him come alive as a boy and a man. Listeners will truly understand why he became a legend.

This handy readable book is what one would expect from so accomplished and talented a person as C. Satapathy. His association with the WTO and the Directorate of Valuation has enabled him to illuminate many dark and elusive corners of this intriguing subject; and to analyse the principles of valuation critically and pragmatically. The principles, which are otherwise baffling and unfathomable to an average reader, have not only been explained in an extremely lucid and simple manner but have also been brilliantly illustrated.
