It was claimed to be a history of the Slavic people and the god Veles himself--the pre-Christian Slavic god of mischief, chaos and deception

Exposing the social and political landscape of homelessness in Fresno, Dispatches from the War Zone

offers the reader a rare opportunity to understand this issue from the perspective of the homeless, their allies and an investigative journalist who closely followed this story for more than 10 years. What at first appeared to be builders and developers working with Fresno City Hall and the police to move the homeless to more remote areas of town turns into something else entirely. We find government corruption, a class action lawsuit against the city for its unconstitutional attacks against the homeless and the suspicious death of Pamela Kincaid, the lead plaintiff in the legal action. Originally, it was the federal government's de-funding of affordable housing in the early 1980s that led to today's homeless crisis. The book examines those structural reasons for homelessness but also looks at what grassroots groups in Fresno, working on alternatives, have accomplished. Although the end to homelessness has been elusive for those groups doing business as usual, the paradigm shifts this book suggests give new hope that a better world is possible. There is a pathway to ending homelessness and treating all people with the dignity and respect they deserve. Experience Sociology has set the new standard for teaching Introductory Sociology. Approaching sociology through the key concepts of culture, structure, and power, the program enables students to see sociology everywhere, and make the familiar new. The SAGE International Encyclopedia of Mass Media and Society discusses media around the world in their varied forms—newspapers, magazines, radio, television, film, books, music, websites, social media, mobile media—and describes the role of each in both mirroring and shaping society. This encyclopedia provides a thorough overview of media within social and cultural contexts, exploring the development of the mediated communication industry, mediated communication regulations, and societal interactions and effects. This reference work will look at issues such as free expression and government regulation of media; how people choose what media to watch, listen to, and read; and how the influence of those who control media organizations may be changing as

new media empower previously unheard voices. The role of media in society will be explored from international, multidisciplinary perspectives via approximately 700 articles drawing on research from communication and media studies, sociology, anthropology, social psychology, politics, and business.

Jonathan Bricklin's debut novel is astounding for its intellectual playfulness and verbal ingenuity, and for the exuberant voice of Willy Nilly, the young hero of this unexpected adventure. Telepathy, Tetherball, Turtles, Politics, Pirates, Lemonade, Cryogenics, Waterslides and Holograms are some of the ingredients in this madcap frenzy of metaphorical escapism. If Raymond Chandler and Tom Robbins adopted a baby it might grow up to write a book like this.

Michael Dante played the title role in Winterhawk (1975), a Western about a legendary Blackfoot Chief's character and his principles. In this novella sequel, he pens an ageless saga about ruthless railroad executives trying to assassinate him in order to build their railroad directly through his territory, taking the Blackfoot land without provocation. Winterhawk and his tribe remain strong as long as they can, to protect the land of their people, the land they call home, before the invasion of progress imposes itself on America. This inspiring story of a brave man, who stands up to and fight against those who have their own agenda for his land, evokes the nostalgic atmosphere of Western series that Dante frequently appeared in during American television's Golden Era, such as Death Valley Days, The Big Valley, Daniel Boone, Custer, The Texan, Bonanza,

Maverick, and Cheyenne.

This book is about the fundamentals of live sound engineering and is intended to supplement the curriculum for the online classes at the Production Institute (www.productioninstitute.com/students). Nonetheless, it will be invaluable for beginning sound engineers and technicians anywhere who seek to expand their knowledge of sound reinforcement on their own. Written with beginners and novices in churches and convention centers in mind, this book starts by teaching you professional terminology and the processes of creating production related documents used to communicate with other sound engineers, vendors and venues. Subjects such as Signal Path and AC (alternating current) power safety and distribution are closely examined. These two subjects are closely related to the buzzing, humming and other noise related phenomena that often plague sound reinforcement systems. Chapters include an in-depth review of both analog and digital mixing consoles, their differences and similarities, and the gain structure fundamentals associated with the proper operation of either type of mixing console. Audio dynamic processors such as compressors, limiters and noise gates and their operation are explained in detail. Audio effects like delay and reverb are examined so that you can learn the basics of "sweetening" the mix to create larger and more emotive soundscapes and achieve studio-like outcomes in a live sound environment. Advanced mixing techniques, workflow, and the conventional wisdom used by professional audio engineers are

explained so you don't have to spend years trying to figure out how these processes are achieved. Last but not least, a comprehensive review of acoustic feedback, and how to eliminate it from stage monitors and main speaker systems are detailed in a step by step process. This book will be especially helpful to volunteer audio techs in houses of worship, convention centers and venues of all types. It will bridge the gap between the on-the-job training that beginners receive and the knowledge and conventional wisdom that professional sound engineers employ in their daily routine.

Arab Media Systems

Dispatches from the War Zone

Surviving Cultural Free Fall

This volume provides a comparative analysis of media systems in the Arab world, based on criteria informed by the historical, political, social, and economic factors influencing a country's media. Reaching beyond classical western media system typologies, Arab Media Systems brings together contributions from experts in the field of media in the Middle East and North Africa (MENA) to provide valuable insights into the heterogeneity of this region's media systems. It focuses on trends in government stances towards media, media ownership models, technological innovation, and the role of transnational mobility in shaping media structure and practices. Each chapter in the volume traces a specific country's media – from Lebanon to Morocco – and assesses its media system in terms of historical roots, political and legal frameworks, media economy and ownership patterns, technology and infrastructure, and social factors (including diversity and equality in gender, age, ethnicities, religions, and languages). This book is a welcome contribution to the field of media studies, constituting the only edited collection in recent

years to provide a comprehensive and systematic overview of Arab media systems. As such, it will be of great use to students and scholars in media, journalism and communication studies, as well as political scientists, sociologists, and anthropologists with an interest in the MENA region.

In Alienation Nation, James LaFond, the author of over 10 books and 300 articles on urban survival, offers a guide to defining and surviving our dystopian now. As a committed Darwinist LaFond offers no societal solutions and advocates no political action, but rather offers a guide to living below the political and criminal horizon [which he insists are one in the same] and adopting a practical view of violence and society toward the end of developing sustainable countermeasures that will permit you to avoid and survive crime without falling into the clutches of the judicial system.
