Using a consistent, logical, and step-by-step approach, MEDICAL TERMINOLOGY: A LIVING LANGUAGE, 5/e introduces students to the anatomy and physiology of body systems and the corresponding medical terms related to them. For each body system, broad coverage of anatomy, physiology, pathology, diagnostic procedures, treatment procedures, and pharmacology is provided. The author emphasizes both terms built from Latin and Greek word parts, and modern English terms, helping students develop a full working word part vocabulary they can use to interpret any new term. This edition contains many new terms, and has been reorganized for more efficient learning. To eliminate confusion, Word Building tables have been removed from each chapter and the terms have been distributed throughout the pathology, diagnostic procedure, and treatment procedure tables, where they are more immediately relevant to students.

This book, part of the European Society of Intensive Care Medicine textbook series, provides detailed up-to-date information on the physical, cognitive, and psychological impairments that are frequently present following a stay in an intensive care unit and examines in depth the available preventive and therapeutic strategies, including adapted rehabilitation programs. Beyond acquainting readers with the multiple facets of post-intensive care syndrome (PICS), the book aims to promote the effective follow-up of patients, thereby enhancing their ability to work and their functional autonomy, and to identify risk factors for the development of PICS as a stimulus to beneficial organizational changes in intensive care departments. The background to the book is the realization by healthcare providers that the quality of life of patients who have required a stay in an intensive care unit can be severely impacted or even become unacceptable. All too often, the diverse sequelae are overlooked by specialists of other disciplines. Moreover, families and caregivers are also at high risk of post-traumatic stress disorder and depression. The European Society of Intensive Care Medicine has developed the Lessons from the ICU series with the vision of providing focused and state-of-the-art overviews of central topics in Intensive Care and optimal resources for clinicians working in Intensive Care. This book, written by renowned experts in the field, will facilitate the transmission of key knowledge with significant clinical and financial benefits.

Quiet Diplomacy in Action is the first comprehensive account of the work of Max van der Stoep as High Commissioner on National Minorities for the Organization for Security and Co-operation in Europe (OSCE). Because Van der Stoel worked discreetly, until now very little has been written about his activities. This book takes the reader behind the scenes to explain why the post of High Commissioner was created, what his mandate is, how he worked in practice, and what recurrent themes and issues he encountered. Quiet Diplomacy in Action also gives a detailed summary of the High Commissioner's activities in the more than fifteen countries that he was involved with between 1993 and 2001. Major documents relating to national minorities in the OSCE context are included in an annex. As Michael Ignatieff writes in the Foreword: 'Everyone talks about conflict prevention. One of the few senior figures that actually does it is the OSCE High Commissioner on National Minorities'. This book, written in co-operation with Mr. Van der Stoel, gives a unique insight into conflict prevention, minority rights, and the challenge of resolving inter-ethnic tensions. It should be considered a primary resource for all those interested in these subjects.
