"Publication of this volume is supported by the National Oceanic and Atmospheric Administration grants, 40AAR902260, NA 86R0074, and NA 46RGO434 and a U.S. Fish and Wildlife Service grant 1448-98210-99-G456"--T.p. verso.

A memoir of a German soldier who served on the front lines of World War II captures the horror of the war and the feelings of a young man caught up in something larger than himself.

Diagnostic Pediatric Hematopathology is unique in providing an accurate and up-to-date guide to the diagnosis of benign and malignant hematologic disorders of childhood. The text discusses the development of the hematopoietic and lymphoid and abnormal findings in children at various ages. Also examined are the morphologic, immunophenotypic, cytogenetic, and molecular genetic characteristics of most pediatric-specific hematologic diseases. This is an excellent reference that evaluates peripheral blood, bone marrow, and lymph nodes of children. The text is written by a team of experienced pediatric hematopathologists and clinical scientists drawn from major academic children's hospitals in the United States. It is an essential tool in the every day practice of pathologists, pediatric pathologists, and hematopathologists, and a ready educational resource for fellows, pathology residents, medical students, clinical scientists in the field, and pediatric hematologists/oncologists.

Studies in Post-Classical Greek Literature and its Reception

Destruction and Reconstruction

The Dreadful Dragon of Hay Hill

**The use of suspense in ancient literature attracts increasing attention in modern scholarship, but hitherto there has been no comprehensive work analysing the techniques of suspense through the various genres of the Classical literary canon. This volume aspires to fill such a gap, exploring the phenomenon of suspense in the earliest narrative writings of the western world, the literature of the ancient Greeks. The individual chapters focus on a wide range of poetic and prose genres (epic, drama, historiography, oratory, novel, and works of literary criticism) and examine the means by which ancient authors elicited emotions of tense expectation and fearful anticipation for the outcome of the story, the development of the plot, or the characters' fate. A variety of theoretical tools, from narratology and performance studies to psychological and cognitive approaches, are exploited to study the operation of suspense in the works under discussion. Suspenseful effects are analysed in a double perspective, both in terms of the artifices employed by authors and with regard to the responses and experiences of the audience. The volume will be useful to classical scholars, narratologists, and literary historians and theorists.**

**On the night of 5/6 June 1944, D-Day, a Lockheed Hudson dropped a small group of parachutists into the mountainous Morvan area of central France. Their mission was to operate as an advance reconnaissance party 400 miles behind the German lines and to make contact with the French Resistance.One of the team, later to become its commander, was Ian Wellsted, known by his nom-de-guerre of Gremlin. During the next three months No.1 Troop of the 1st Special Air Service Regiment relayed vital information about enemy troop locations and movements, sabotaged bridges and supply lines, skirmished with German columns and harried the occupying forces as they retreated eastwards in the face of the Allied invasion.Camped deep in the woods of the Montsaughe region, the small force worked alongside the local groups of Maquis, forging strong links of mutual respect and friendship.Ian Wellsted's exciting first-hand account of his operations behind enemy lines is a tale of gallantry and daring, of comradeship and cooperation, full of humour and perceptive insight revealing one of the most significant chapters in the history of the SAS.**

**This book provides evidence that Labour in Trinidad and Tobago played a vital role in undermining British colonialism and advocating for federation and self-government. Furthermore, there is emphasis on the pioneering efforts of the Labour movement in party politics, social justice, and working class solidarity.**

Commando Country looks across the origins and development of new forces like the Commandos and Special Operations Executive, finding common ground for the intensive training they relied on to carry out raids and resistance operations throughout occupied Europe and beyond. Drawing on official sources and the testimony of trainees and their instructors, Stuart Allan considers not only the military utility of the highland environment but also its relationship to the ethos of this most uncompromising kind of warfare.

In this witty and compelling tale of how the nation 's first and only Jewish Celebration beer came to fruition, founder Jeremy Cowan tells the story of Shmaltz Brewing 's evolution from an inside joke into a thriving and award-winning craft brewing company. Divulged are the small-business challenges and marketing strategies that helped Cowan go from hand-squeezing pomegranates and delivering beer in his grandmother 's Volvo to producing two of the most respected and unique craft beer brands in America: He'brew the Chosen Beer and Coney Island Craft Lagers. Included alongside the sage advice for entrepreneurs and the humorous personal anecdotes are suggested beer pairings for each chapter, a hangover rating system, and 16 pages of full-color photograph collages.

With the fall of France, almost the entire coastline of Western Europe was in German hands. Clandestine sea transport operations provided lines of vital intelligence for wartime Britain. These 'secret flotillas' landed and picked up agents in and from France, and ferried Allied evaders and escapees. This activity was crucial to the SIS (Secret Intelligence Service) and the SOE (Special Operations Executive). This authoritative publication by the official historian, the late Sir Brooks Richards, vividly describes and analyses the clandestine naval operations that took place during World War Two. An Account of the Work of the British Special Operations Executive in France, 1940-1944

*On the night of the 22 September 1943 Pearl Witherington, a twenty-nine-year-old British secretary and agent of the Special Operations Executive (SOE), was parachuted from a Halifax bomber into Occupied France. Like Sebastian Faulks' heroine, Charlotte Gray, Pearl had a dual mission: to fight for her beloved, broken France and to find her lost love. Pearl's lover was a Parisian parfumeur turned soldier, Henri Cornioley, who had been taken prisoner while serving in the French Logistics Corps and subsequently escaped from his German POW camp. Agent Pearl Witherington's wartime record is unique and heroic. As the only woman agent in the history of SOEs in France to have run a network, she became a fearless and legendary guerrilla leader organising, arming and training 3,800 Resistance fighters. Probably the greatest female organiser of armed maquisards in France, the woman whom her young troops called 'Ma Mère', Pearl lit the fires of Resistance in Central France so that Churchill's famous order to 'set Europe ablaze', which had brought SOE into being, finally came to pass. Pearl's story takes us from her harsh, impoverished childhood in Paris, to the lonely forests and farmhouses of the Loir-et-Cher where she would become a true 'warrior queen'. Shortly before Pearl's death in 2008, the Queen presented her with a CBE in Paris. While male agents and Special Force Jedburghs received the DSO or Military Cross, an ungrateful country had forgotten Pearl. She had been offered a civilian decoration in 1945 which she refused, saying 'There was nothing civil about what I did.' But what pleased her most was to receive her Parachute Wings, for which she had waited over 60 years. Two RAF officers travelled to her old people's home and she was finally able to pin the coveted wings on her lapel. Pearl died in February 2008 aged 93.*

*Exhibition catalogue featuring more than 250 colour reproductions of paintings, sculptures, manuscripts, maps and early books, with accompanying essays.*

*This is a comprehensive account of the behind-the-lines operations that preceded and supported the D-Day landings and the breakout from Normandy. The French resistance played a key role in undermining German resistance during the liberation of France in 1944. They destroyed vital railways, ambushed convoys and tied down large numbers of German troops in security patrols. Many attacks were spearheaded by British and American special forces, the SAS and US 'Jedburgh teams' (ancestors of the 'Green Berets'). German reaction to their assaults was brutal in the extreme. SS units were unleashed on civilian populations and the Vichy French milice made this a French civil war. Both sides executed prisoners as a matter of routine. It is a sanguinary tale that exposes the limits as well as the potential of elite military units and civilian resistance movements.*

*Scholars of the period will find this to be a richly informative and thoroughly engrossing read.*

*The history of the United States, as yet unwritten, will show the causes of the "Civil War" to have been in existence during the Colonial era, and to have cropped out into full view in the debates of the several State Assemblies on the adoption of the Federal Constitution, in which instrument Luther Martin, Patrick Henry, and others, insisted that they were implanted. African slavery at the time was universal, and its extinction in the North, as well as its extension in the South, was due to economic reasons alone. The first serious difficulty of the Federal Government arose from the attempt to lay an excise on distilled spirits. The second arose from the hostility of New England traders to the policy of the Government in the war of 1812, by which their special interests were menaced; and there is now evidence to prove that, but for the unexpected peace, an attempt to disrupt the Union would then have been made. The "Missouri Compromise" of 1820 was in reality a truce between antagonistic revenue systems, each seeking to gain the balance of power. For many years subsequently, slaves—as domestic servants—were taken to the Territories without exciting remark, and the "Nullification" movement in South Carolina was entirely directed against the tariff. Anti-slavery was agitated from an early period, but failed to attract public attention for many years. At length, by unwearied industry, by ingeniously attaching itself to exciting questions of the day, with which it had no natural connection, it succeeded in making a lodgment in the public mind, which, like a subject exhausted by long effort, is exposed to the attack of some malignant fever, that in a normal condition of vigor would have been resisted. The common belief that slavery was the cause of civil war is incorrect, and Abolitionists are not justified in claiming the glory and spoils of the conflict and in pluming themselves as "choosers of the slain."*

*What?!* You've never heard of Crusoe the celebrity dachshund? You must be living under a rock! ... Or at least that's what Crusoe thinks. He's the self-proclaimed "wiener dog who thinks he's more of a celebrity than he really is" (until now!). Crusoe is the star of his wildly popular blog of the same name, winner of the 2013 AND 2014 Best Pet Blog Award. That's right... two years in a row! Because Crusoe is a talented and ridiculously photogenic miniature dachshund with a big personality, stunning fashion sense, and an insatiable penchant for whimsy. Perhaps you know him better by his infamous alter ego, BATDOG? We thought so. This is Crusoe's New York Times bestselling book debut and he's so excited to share it with all of his adoring fans. Now everyone can stare lovingly into his big brown eyes and admire his wit and many costumes any time they choose. Crusoe is certain that his book will make the perfect gift for dog-lovers of all ages. He wants to be accessible to his fans so you can really get to know the mutt behind the mask, the pooch behind that signature sexy pout; the pup with a heart of gold. Can't miss Crusoe Features in the Book:

**This second edition has been updated throughout to account for the latest trial data, including new chapters on pathophysiology, and interpretation of recent clinical trials. This pocketbook is a concise, practical guide to the diagnosis, assessment and management of Type 2 Diabetes aimed at clinicians, GPs and nurse specialists.**

**In May 1940 Francis Suttill was commissioned into the East Surrey regiment of the British Army. He was later recruited by the SOE, and after being trained during the summer of 1942, Suttill was chosen to create a new resistance network in northern France, based in Paris, with the operational name Physician. His code name was Prosper and his assumed identity was François Desprésées. The circuit of agents grew fast until June 1943, when the Gestapo discovered letters, instructions, crystal sets and addresses in a car and false ID papers in an apartment. Over the next three months, more than eighty agents died or were killed, mostly in concentration camps. Major Suttill DSO would be killed in Sachsenhausen in May 1945. Rumours of betrayal by MI6, even of the involvement of Winston Churchill, have abounded ever since. For the first time, Major Suttill’s son tells the whole story of the tragedy basing his meticulous research on primary sources.**

**The story of the Special Forces in World War II has never fully been told before. Information about them began to be declassified only in the 1980s. Known as the Jedburghs, these Special Forces were selected from members of the British, American, and Free French armies to be dropped in teams of three deep behind German lines. There, in preparation for D-Day, they carried out what we now know as unconventional warfare: supporting the French Resistance in guerrilla attacks, supply-route disruption, and the harassment and obstruction of German reinforcements. Always, they operated against extraordinary odds. They had to be prepared to survive pitched battles with German troops and Gestapo manhunts for weeks and months while awaiting the arrival of Allied ground forces. They were, in short, heroes.The Jedburghs finally tells their story and offers a new perspective on D-Day itself. Will Irwin has selected seven of the Jedburgh teams and told their stories as gripping personal narratives. He has gathered archival documents, diaries and correspondence, and interviewed Jed veterans and family members in order to present this portrait of their crucial role – a role recognized by Churchill and Eisenhower – in the struggle to liberate Europe in 1944–45. This is narrative history at its most compelling; a vivid drama of the battle for France from deep behind enemy lines.**

In a dramatically different tale of espionage and conspiracy in World War II, Shadow Warriors of World War II unveils the history of the courageous women who volunteered to work behind enemy lines. Sent into Nazi-occupied Europe by the United States' Office of Strategic Services (OSS) and Britain's Special Operations Executive (SOE), these women helped establish a web of resistance groups across the continent. Their heroism, initiative, and resourcefulness contributed to the Allied breakout of the Normandy beachheads and even infiltrated Nazi Germany at the height of the war, into the very heart of Hitler's citadel—Berlin. Young and daring, the female agents accepted that they could be captured, tortured, or killed, but others were always readied to take their place. Women of enormous cunning and strength of will, the Shadow Warriors' stories have remained largely untold until now.

At the age of eighteen, Aaron Cohen left Beverly Hills to prove himself in the crucible of the armed forces. He was determined to be a part of Israel's most elite security cadre, akin to the American Green Berets and Navy SEALs. After fifteen months of grueling training designed to break down each individual man and to rebuild him as a warrior, Cohen was offered the only post a non-Israeli can hold in the special forces. In 1996 he joined a top-secret, highly controversial unit that dispatches operatives disguised as Arabs into the Palestinian-controlled West Bank to abduct terrorist leaders and bring them to Israel for interrogation and trial. Between 1996 and 1998, Aaron Cohen would learn Hebrew and Arabic; become an expert in urban counterterror warfare, the martial art of Krav Maga, and undercover operations; and participate in dozens of life-or-death missions. He would infiltrate a Hamas wedding to seize a wanted terrorist and pose as an American journalist to set a trap for one of the financiers behind the Dizengoff Massacre, taking him down in a brutal, hand-to-hand struggle. A propulsive, gripping read, Cohen's story is a rare, fly-on-the-wall view into the shadowy world of "black ops" that redefines invincible strength, true danger, and inviolable security.

This work gathers together the principal essays of Richard Hunter, whose work has been fundamental in the modern re-evaluation of Greek literature after Alexander and its reception at Rome and elsewhere. At the heart of Hunter’s work lies the high poetry of Ptolemaic Alexandria and the narrative literature of later antiquity (‘the ancient novel’), but comedy, mime, didactic poetry and ancient literary criticism all fall within the scope of these studies. Principal recurrent themes are the uses and recreation of the past, the modes of poetic allusion, the moral

purpose of literature, and the intellectual context for ancient poetry.
