Spanning from the arctic to the tropics, from large-scale views of Australia's barrier reef to close-up images of sea turtles, Man and Sea is a compelling, entirely unique journey through a fascinating world. Spectacular aerial images by Yann Arthus-Bertrand and striking underwater photographs by Brian Skerry offer a top-to-bottom tour of the world's oceans, while the enlightening text covers the sea's critical mechanisms, from currents to food chains. Inspiring interviews of some of the world's most respected researchers and activists also offer cutting-edge insight into the many challenges, such as overfishing and pollution, facing the oceans today. Exploring the critical and ever-evolving relationship between

mankind and the ocean, *Man and Sea* is an unforgettable portrait of the global issue of sustainable development. Praise for *Man and Sea*: "Mr. Skerry's Technicolor image of hard corals on the Kingman Reef far out in the Pacific and Mr. Bertrand's shot of the pale sand of Whitsunday Island near the Great Barrier Reef are cool and timeless portraits of treasures we might easily think limitless." —The Editors, *Wall Street Journal*

**Soon to be a major motion picture! Now in Paperback: The harrowing adventure-at-sea memoir ("Terrific."-Daniel James Brown) recounting the 2013 search-and-rescue mission for lost Montauk fisherman John Aldridge. 5:14 a.m. I am floating in the middle of the night, and nobody in the world even knows I am missing. Nobody is looking for me. You can't get more alone than that. You can't be more lost. I've got too many people who love me. There's no way I'm dying like this. In the dead of night on July 24, 2013, John Aldridge was thrown off the back of the Anna Mary while his fishing partner, Anthony Sosinski, slept below. As desperate hours ticked by, Sosinski, the families, the local fishing community, and the U.S. Coast Guard in three states mobilized in an unprecedented search effort that culminated in a rare and exhilarating success. A tale of survival, perseverance, and community, A Speck in the Sea tells of one man's struggle to survive as friends and strangers work to bring him home. Aldridge's wrenching first-person account intertwines with the narrative of the massive, constantly evolving rescue operation designed to save him.**

**(1887-1951) was an American writer best known for The Bounty Trilogy, three historical novels he wrote with Charles Nordhoff. During World War I, Hall had the distinction of serving in the militaries of three Western allies: Great Britain as an infantryman, and then France and the United States as an aviator. After the war, Hall spent much of his life on the island of Tahiti, where he and Nordhoff wrote a number of successful adventure books, many adapted for film. Charles Dickens attained an astounding level of popular acclaim during his lifetime; Victorian audiences clamored for his traditional Christmastime stories every year. The tale "A Message from the Sea" is an example of one of Dickens' Christmas publications; although the nautical setting of the story is not what one would traditionally expect from a holiday publication, the themes of charity, good will, and rising above seemingly insurmountable odds are sure to spark a warm glow in readers' hearts any time of the year.**

Traces a father and son journey around South America in a tiny boat they built together

The Hundred Years War was a struggle for control over the French throne, fought as a series of conflicts between England, France, and their respective allies. The Soldier in Later Medieval England is the outcome of a project which collects the names of every soldier known to have served the English Crown from 1369 to the loss of Gascony in 1453, the event which is traditionally accepted as the end-date of the Hundred Years War. The data gathered throughout the project has allowed the authors of this volume to compare different forms of war, such as the chevauchées of the late fourteenth century and the occupation of French territories in the fifteenth century, and thus to identify longer-term trends. It also highlights the significance of the change of dynasty in England in the early 1400s. The scope of the volume begins in 1369 because of the survival from that point of the 'muster roll', a type of documentary record in which soldiers names are systematically recorded. The muster roll is a rich resource for the historian, as it allows closer study to be made of the peerage, the knights, the men-at-arms (the esquires), and especially the lower ranks of the army, such as the

archers, who contributed the largest proportion of troops to English royal service. *The Soldier in Later Medieval England* seeks to investigate the different types of soldier, their regional and national origins, and movement between ranks. This is a wide-ranging volume, which offers invaluable insights into a much-neglected subject, and presents many opportunities for future research. Declared “the best survival book in a decade” by *Outside Magazine*, *438 Days* is the true story of the man who survived fourteen months in a small boat drifting seven thousand miles across the Pacific Ocean. On November 17, 2012, two men left the coast of Mexico for a weekend fishing trip in the open Pacific. That night, a violent storm ambushed them as they were fishing eighty miles offshore. As gale force winds and ten-foot waves pummeled their small, open boat from all sides and nearly capsized them, captain Salvador Alvarenga and his crewmate cut away a two-mile-long fishing line and began a desperate dash through crashing waves as they sought the safety of port. Fourteen months later, on January 30, 2014, Alvarenga, now a hairy, wild-bearded and half-mad castaway, washed ashore on a nearly deserted island on the far side of the Pacific. He could barely speak and was unable to walk. He claimed to have drifted from Mexico, a journey of some seven thousand miles. A “gripping saga,” (*Daily Mail*), *438 Days* is the first-ever account of one of the most amazing survival stories in modern times. Based on dozens of hours of exclusive interviews with Alvarenga, his colleagues,

search-and-rescue officials, the remote islanders who found him, and the medical team that saved his life, 438 Days is not only “an intense, immensely absorbing read” (Booklist) but an unforgettable study of the resilience, will, ingenuity and determination required for one man to survive more than a year lost and adrift at sea.

Warfare at Sea, 1500-1650 is the first truly international study of warfare at sea in this period. Commencing in the late fifteenth century with the introduction of gunpowder in naval warfare and the rapid transformation of maritime trade, Warfare at Sea focuses on the scope and limitations of war before the advent of the big battle fleets from the middle of the seventeenth century. The book also compares the social history of seamen and the early officer corps in several European countries and includes discussion on Spain, Portugal, France, Venice, the Ottoman Empire and the Baltic states.

*"Men at Sea is an opus of eight spectacularly drawn dark, poetic stories adapted by Riff Reb's. This collection offers: "A Smile of Fortune," from Joseph Conrad "The Sea Horses" and "The Shamraken Homeward Bound," from William Hope Hodgson "The Galley Slaves" and "The Far South," from Pierre Mac Orlan "A Descent into the Maelstrom," from Edgar Allan Poe "The Three Customs Officers," from Marcel Schwob "The Shipwreck," from Robert Louis Stevenson These eight tales, themselves interspersed by seven double-page spreads dedicated to extracts from illustrated classics, deliver a rich, poetic, and masterfully crafted work of life and death on the sea.*

Winner of the National Book Award, Nathaniel Philbrick's book is a fantastic saga of survival and adventure, steeped in the lore of whaling, with deep resonance in American literature and history. In 1820, the whaleship Essex was rammed and sunk by an angry sperm whale, leaving the desperate crew to drift for more than ninety days in three tiny boats. *Two centuries of American maritime history, in which the Atlantic Ocean remained the great frontier Westward expansion has been the great narrative of the first two centuries of American history, but as historian Daniel Vickers demonstrates here, the horizon extended in all directions. For those who lived along the Atlantic coast, it was the East—and the Atlantic Ocean—that beckoned. While historical and fictional accounts have tended to stress the exceptional circumstances or psychological compulsions that drove men to sea, this book shows how normal a part of life seafaring was for those living near a coast before the mid-nineteenth century. Drawing on records of several thousand seamen and their voyages from Salem, Massachusetts, *Young Men and the Sea* offers a social history of seafaring in the colonial and early national period. In what sort of families were sailors raised? When did they go to sea? What were their chances of death? Whom did they marry, and how did their wives operate households in their absence? Answering these and many other questions, this book is destined to become a classic of American social and maritime history.*

"We returned to our loved ones, but we were never the same again. Most were markedly changed. Young boys had become mature older men, aged beyond their years. All because of those days in the sea." For five days near the end of the Second World War, the USS Indianapolis disappeared from the map. After being hit by two torpedoes from a Japanese submarine, the warship sank within twelve minutes: 900 men out of a crew of 1200 managed to jump free. But by the time they were found, all that time later, the survivors had plummeted to just 316 men. The story of how that happened and how the few that remained of her crew were eventually rescued from the mid-Pacific, have become one of the most enduring - and notorious - of wartime sea stories. But the meaning of the Indianapolis goes beyond a simple sinking. What makes the story of this American warship so compelling is that it was important in so many ways. It was the flagship of the fighting admiral Raymond Spruance, in 1943-44, during the crucial battles to control the central Pacific. It delivered the key components of the first atomic bomb dropped in a war, in this case on Hiroshima. It was the greatest single loss of life at sea in an American naval disaster at war. It goes down in history as the biggest attack by sharks on human beings ever recorded. It also became a huge scandal as naval authorities tried to cover-up what had gone wrong, and why the crew had been inadvertently left to die. This book is designed to interweave all these themes to provide a short and informative and above all, readable, guide to the Indianapolis story, and

to also tell the intertwined tales of the two men at the heart of the story: Captain Charles McVay and the man who sank the ship, Mochitsura Hashimoto.

This is the story of the fictional warriors, heroes, villains, survivors and victims whose exploits thrill and appall us, capturing the existential appeal to men of war -- Ranges through 3,000 years of history, through epic poems, the modern novel and film scripts -- Case studies include *Apocalypse Now*, *All Quiet on the Western Front*, *Thin Red Line*, *Master and Commander*, and *Dr. Strangelove*

This 1921 Pulitzer Prize awarded history has been written in response to a demand for some account of the generally misunderstood German submarine campaign in the World War I and particularly of the means by which it was defeated. The interest of the public in such a story is due to the fact that during the war the sea forces were compelled to take all possible precautions to keep the enemy from learning anything about the various devices and means used to oppose or defeat the under-water craft. ***All At Sea is a celebration of the epic absurd, an attempt to explain just how out of hand things can become from a very simple starting point. The book follows the author's death-defying 200-mile journey in his antique Thomas Crapper bath - not just across the Channel, but around Kent - right up to the tremendous reception and huge media attention which awaited him under Tower Bridge. Tim met the Queen, and his bath now resides in the National Maritime Museum of Great Britain.***

After the S-51, Ellsberg goes on to the heartrending tale of the sinking of the submarine S-4, which sank after a collision with forty sailors aboard. Commander Ellsberg races to the scene through land, air, and sea to search for potential survivors trapped aboard the sunken sub. Ellsberg also regales readers with stories of some of the most famous underwater missions in history, such as men submerging deep to recover £5 million worth of gold from the wreck of the Laurentic, bringing vast treasures from the ocean bottom, and diving to rescue thirty-three survivors from the stricken submarine Squalus.
