Nothing says summer like driving a convertible. The car without a roof has always been a symbol for luxury and laissez-faire. And it still holds true today: everybody who's anybody drives "topless." The larger four-seater convertibles in particular have always been highly sought after--but they are difficult to build and have usually been made as coupés for this reason. Mercedes-Benz has always been a pioneer in this area.

'Mercedes-Benz: The Grand Cabrios & Coupes' gives us a peek at the long-standing partnership between Mercedes-Benz and Stuttgart-based photographer, Rene Staud. Carefully staged photos show graceful curves and precision down to the finest details that convey the company's dedication to a very special kind of driving pleasure. This volume presents the most important convertibles and related coupes from 100 years of Daimler automotive history. A special highlight is Daimler's new flagship, a convertible based on the new S-class that is being rolled out at the 2015 IAS. Even though summer eventually comes to an end, and sunny days can give way to showers, this book stands for everlasting convertible adventures. AUTHOR:

Photographer Rene Staud made a breakthrough with the development of his Magicflash lighting technology; this type of surface lighting helps him greatly in his ad photos for top-shelf automakers. Staud and his team continue to develop new ways to meet the highest demands of the industry in both creativity and service. He has amassed 35 years of experience in ad photography; and has literally built the image of many companies with his photos. SELLING POINTS: * Open this glorious photo book and experience the classic Mercedes-Benz convertibles and the newest models in such realistic detail, you'll want to touch them * Elegantly-staged cars that made automotive history * Breathtaking curves that make "driving topless" a delight

Millions of GM cars and trucks have been built with Turbo 350 automatic transmissions. There always comes a time when the old transmission shows signs of wear. At some point, even the best transmissions need to be rebuilt. Mercedes-Benz - The Grand Cabrios & Coupés

Mercedes Benz has now been manufacturing SL sports cars for fifty years, and for all that time the cars adorned with those two special letters have been admired and coveted by car lovers the world over. It all started in 1954, with the fabulous and iconic 300SL Gullwing, a road car developed directly from the stunning 300SLR racing car. Other models followed, including the more affordable 190SL, the 'Pagoda' car of the sixties and the stylish ranges of the seventies and eighties. Mercedes now use the SL tag before rather than after the numbers in the cars' designations, but the line is as strong as ever, with a magnificent new range and an SLR supercar developed with McLaren that takes the family right back to its roots.
