Comprehensive directory of databases as well as services "involved in the production and distribution of information in electronic form." There is a detailed subject index and function/service classification as well as name, keyword, and geographical location indexes.

A "Keep It Simple" guide to investing online, providing an overview of online investing, and covering set-up, trading partners, community investing, technical analysis, online banking, and day trading.

From the best-selling author of the Next Big Investment Boom, this book provides everything you need to know about making the world's money markets work to your advantage, enabling you to turn basic investments into a winning portfolio. Big Money, Little Effort shows you how a straightforward, manageable and stress-free investment system, if properly applied and monitored, can protect you from the volatility of the world's stock markets while ensuring consistent returns on your original investment. In an industry awash with different (and often very vocal) opinions, the author removes the mystique that often surrounds stock market investment and explains his own tried-and-tested system for managing your investments - a system that can be operated and maintained in a short amount of time, once a week. The book includes a glossary of financial terms and a list of further reading resources. Whether your investment is large or small, Big Money, Little Effort is the essential guide if you want to make positive returns from the stock market.

A guide to personal finance for people over fifty covers such topics as stocks, insurance, annuities, tax-exempt bonds, long-term care, and real estate.

Explains the pros and cons of a wide range of computer hardware and software available for computerized investing, discussing how to automate the investing process with the smallest outlay of time, effort, and money

Learn the Art of Day Trading With a Practical Hands-On Approach

Short-term trading refers to the practice of buying and selling financial instruments within the same trading week or, at most, a few weeks. Short-term traders buy and sell stocks over a few days or weeks in the hope that their stocks will continue climbing in value for the time they own them, making for quick and, often, huge profits. Some of the more commonly traded financial instruments are stocks, stock options, currencies, and futures contracts such as equity index futures, interest rate futures, and commodity futures. Short-term trading was once the preserve of banks, financial firms, and professional investors. Many traders are bank or investment firms employees working in equity investment and fund management. As with many other business segments, the Internet, technology, and legislative changes have opened up this attractive marketplace to a new breed of individual investors and speculators working part-time. You and I can now stand on an even playing field with the largest banks, wealthiest individuals, and trading institutions from the comfort of home. Short-term trading can provide you with very high and secure rate of return as high as 12%, 18%, 24%, or even 300%. If performed correctly, short-term trading can far outpace all other investment techniques. The key is to know how to perform this process correctly. This all sounds great, but what is the catch? There really is none, except you must know what you are doing!

This groundbreaking and exhaustively researched new book will provide everything you need to know to get you started generating high-investment returns with low risk from start to finish. In this easy to read and comprehensive new book you will learn how to set up your online account, how to choose the correct software to use in trading, how to get started in short-term trading, how to invest in short-term stocks, evaluate performance, and handle fees and taxes. This book delves into trading tactics for swing trading, position trading, leveraging the stock market, selling short, and pinpointing entry, exits, and targets for your trades. You will pick up the language of a trader so that you recognize candlestick patterns, advancing and declining issues and volume, call options, and put options. You will know how to find the very best stocks every day, how to read and prosper with stock charts, how to use the New York Stock Exchange tick indicator and trading index (TRIN), the Commodity Channel Index (CCI), the moving average convergence/divergence (MACD), the Dow 30-Day Moving Average. As you read this book, the mysteries of short-term trading will unfold so that you can double or even triple your investment all while avoiding the common traps and pitfalls. In addition, we took the extra effort and spent an unprecedented amount of time researching, interviewing, e-mailing, and communicating with hundreds of today's most successful investors. Aside from learning the basics of mutual fund trading you will be privy to their secrets and proven successful ideas. Instruction is great, but advice from experts is even better, and the experts chronicled in this book are earning millions. If you are interested in learning essentially everything there is to know about short-term investing as well as hundreds of hints, tricks, and tips on how to earn enormous profits in short-term investing while controlling your investments, then this book is for you. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Every book has resources, contact information, and web sites of the products or companies discussed.

John Bollinger is a giant in today's trading community. His Bollinger Bands sharpen the sensitivity of fixed indicators, allowing them to more precisely reflect a market's volatility. By more accurately indicating the existing market environment, they are seen by many as today's standard—and most reliable—tool for plotting expected price action. Now, in Bollinger on Bollinger Bands, Bollinger himself explains how to use this extraordinary technique to compare price and indicator action and make sound, sensible, and profitable trading decisions. Concise, straightforward, and filled with instructive charts and graphs, this remarkable book will be essential reading

for all serious traders, regardless of market. Bollinger includes his simple system for implementation, and techniques for combining bands and indicators.

Trade Your Way to Profits With the Volume Reversal Indicator

TradeStation Made Easy!

Customize your trading plan for greater profits using the most popular charting software The majority of professional and individual traders use some kind of trading software on which to base their strategies. With over 100,000 users, the most popular trading software today is TradeStation, published by TradeStation Technologies. While this software is favored by many, TradeStation's computer language can be confusing, especially for the novice. TradeStation Made Easy! is the first and only book to explain exactly how to use the unique computer language behind this bestselling software program. It is not meant as a replacement for the TradeStation manuals, instead it will cover the essence of programming in EasyLanguage and focus on a consistent set of data and an elementary system throughout. An easily understood guide to TradeStation that also provides tips for the user in designing a personalized trading system Endorsed by the software provider TradeStation Technologies Written in a straightforward manner, that is accessible even for those with little computer experience TradeStation Made Easy! fills a much-needed gap in this area and puts the basics of EasyLanguage in perspective. With it, you'll be able to write simple and intermediate programs that will accurately express your theories and ideas about whatever market interests you.

Good for all levels of investment traders. This manual reviews the basics of option trading, covers a few important chart reading indicators, and delves into in-depth P3 Strategy details.

Trade you way to financial success! Are you tired of playing the "buy-and-hope" game with your stocks? Savvy stock trader Toni Turner shows you the ins and outs and ups and downs of short-term trading. You'll learn how to buy and sell stocks on a monthly, weekly, or even daily basis, so you can own the right stocks at the right time. Turner's clear, common-sense advice, easy-to-follow explanations, and helpful examples will help you invest in the exciting and profitable world of short-term trading quickly and safely. In this revised edition, you'll get completely up-to-date information on: New products such as ETFs and expanded coverage on sector investing Resources for choosing an online broker New SEC (Securities and Exchange Commission) rules and regulations Updated charts and graphs with current examples A Beginner's Guide to Short-Term Trading is the hands-on book designed to get you actively involved in every step of the trading process. Now you can take control of your portfolio and secure the financial freedom you've always dreamed of. Start planning your trades today!

Turn insight into profit with guru guidance toward successful algorithmic trading A Guide to Creating a Successful Algorithmic Trading Strategy provides the latest strategies from an industry guru to show you how to build your own system from the ground up. If you're looking to develop a successful career in algorithmic trading, this book has you covered from idea to execution as you learn to develop a trader's insight and turn it into profitable strategy. You'll discover your trading personality and use it as a jumping-off point to create the ideal algo system that works the way you work, so you can achieve your goals faster. Coverage includes learning to recognize opportunities and identify a sound premise, and detailed discussion on seasonal patterns, interest rate-based trends, volatility, weekly and monthly patterns, the 3-day cycle, and much more—with an emphasis on trading as the best teacher. By actually making trades, you concentrate your attention on the market, absorb the effects on your money, and quickly resolve problems that impact profits.

Algorithmic trading began as a "ridiculous" concept in the 1970s, then became an "unfair advantage" as it evolved into the lynchpin of a successful trading strategy. This book gives you the background you need to effectively reap the benefits of this important trading method. Navigate confusing markets Find the right trades and make them Build a successful algo trading system Turn insights into profitable strategies Algorithmic trading strategies are everywhere, but they're not all equally valuable. It's far too easy to fall for something that worked brilliantly in the past, but with little hope of working in the future. A Guide to Creating a Successful Algorithmic Trading Strategy shows you how to choose the best, leave the rest, and make more money from your trades.

Option Trading Basics and Putting Profit Probability Potential on Your Side

A Complete Guide to Trading

This book shows traders how to use Intermarket Analysis to forecast future equity, index and commodity price movements. It introduces custom indicators and Intermarket based systems using basic mathematical and statistical principles to help traders develop and design Intermarket trading systems appropriate for long term, intermediate, short term and day trading. The metastock code for all systems is included and the testing method is described thoroughly. All systems are back tested using at least 200 bars of historical data and compared using various profitability and drawdown metrics.

This book provides a new, powerful twist to MIDAS technical analysis, a trading method developed by the late Paul Levine. The authors show how to employ MIDAS in trading, from recognizing set ups to identifying price targets. The book explains the basics of MIDAS before demonstrating how to apply it in different time frames. Further, it extrapolates how MIDAS can be used with other more conventional indicators, such as DeMark or moving averages. In addition to introducing new indicators that the authors have created, the book also supplies new computer codes.

Trend trading lets the market do the work for you Is your portfolio doing all it should? Are you looking for a market-focused way to increase returns? Try your hand at trend trading. Instead of analyzing the performance of a company, analyze the performance of the market as a whole. When you spot a trend, jump on it and let it ride until it's time to move. Whether your strategy is short-term, intermediate-term, or long-term, trend trading can help you capitalize on the action of market and get the most out of every move you make. Trend Trading For Dummies will get you up to speed on the ins and outs of this unique technique. You'll learn how to spot the trends and just how heavily market analysis figures into your success. You can get as complex as you like with the data for long-term predictions or just go for quick rides that pump up your gains. Before you jump in, you need to know the basics that can help ensure your success. Learn the rules of trend trading and why you need a solid system Understand technical analysis to make accurate predictions Analyze

the market and learn what to look for before you trade Use leverage to your advantage to make better moves Trend Trading For Dummies includes trading strategies that you can use as-is, or customize to suit your needs. Thorough preparation is the key to any good trading plan, and it's no different with trend trading. Trend Trading For Dummies allows you to trade using every angle, and will get you out of or into the market in a flash.

MARTIN PRING ON TECHNICAL ANALYSIS McGraw-Hill's Martin Pring on Technical Analysis series introduced individual investors to the value and legitimacy of technical analysis helped by the worldrenowned Martin Pring brand. Explains how personal computers can keep investment records, track portfolio performance, gather investment data, and execute stock transactions; describes current software; and discusses applications offered through on-line services and the Internet

An in-depth look at the trading system that anyone can use The Logical Trader presents a highly effective, yet simple trading methodology that any trader anywhere can use to trade almost anything. The "ACD Method" developed and refined by Mark Fisher after many years of successful trading, provides price points at which to buy and sell as determined by the opening range of virtually any stock or commodity. This comprehensive guide details a widely used system that is profitably implemented by many computer and floor traders at major New York exchanges. The author's highly accessible teaching style provides readers of The Logical Trader with a full examination of the theory behind the ACD Method and the examples and real-world trading stories involving it. Mark B. Fisher (New York, NY), an independent trader, is founder of MBF Clearing Corp., the largest clearing firm on the NYMEX. Founded in 1988, MBF Clearing has grown from handling under one percent of the volume on the NYMEX to nearly twenty percent of the trades today. A 1982 summa cum laude graduate from the Wharton School of Business, University of Pennsylvania, Fisher also received his master's degree in finance and accounting from Wharton. New technology and the advent of around the clock trading have opened the floodgates to both foreign and domestic markets. Traders need the wisdom of industry veterans and the vision of innovators in today's volatile financial marketplace. The Wiley Trading series features books by traders who have survived the market's ever changing temperament and have prospered—some by reinventing systems, others by getting back to basics. Whether a novice trader, professional or somewhere in-between, these books will provide the advice and strategies needed to prosper today and well into the future.

The investment world is full of different methods for understanding how to best grow your rates of return and minimize risk. The Candlestick Charting method, first developed by Japanese rice traders in the middle of the 19th century, has become one of the favorite modern methods of analyzing and understanding the market through careful plotting and analysis of the data provided. This book will guide you through the seemingly complex, but revolutionary, useful method of candlestick charting to gain the highest possible rates of return while ensuring your risks are as minimal as possible.

Candlestick charting is a complex language all in itself and for that reason, this book will guide you through the entire process of understanding the language, starting with the very origins of the technique. You will learn how it was developed and why it is still used today, including what changes have been made to the methods by Western investors. You will learn how the candlestick charts are prepared and what the different line constructions signify. Additionally, you will be shown how to read and differentiate between the different bodies, including the short and long white and black bodies, to measure high and low price levels, support, and resistance. You will be shown the various additional forms such as spinning tops, shadows, and doji. Next, the various different candle lines are outlined in full detail, showing you dozens of different formations including the single candle lines of "the hammer", "the hanging man", and "the shooting star", the dual candle lines of "dark cloud over", "the piercing pattern", "the engulfing pattern", "last engulfing pattern", and "harami". You will also learn the window candle lines, as well as the formations of three or more candle lines. Analysis of candle lines and the technical aspects, including how to discern stops, the risk/reward in each line, trends, the use of computers, and how to place and offset trades will supply you with the necessary information

you need to read the candle lines. By interviewing dozens of experts in the reading and analysis of candle charts, this book is able to provide a comprehensive perspective of candle charts and how you can start using moving averages, analyzing three line break charts, renko charts, and kagi charts. You will be provided with practice charts for all three major types and additional resources to help you learn how to read and analyze each type. For anyone interested in the centuries old Japanese style of market analysis that is candlestick charting, this book provides a comprehensive overview from the very origins to the most modern of interpretations. Atlantic Publishing is a small, independent publishing company based in Ocala, Florida. Founded over twenty years ago in the company president's garage, Atlantic Publishing has grown to become a renowned resource for non-fiction books. Market breadth indicators, i.e. advance/decline, new high/new low, or up/down volume, allow technical analysts and traders to look beneath the surface of a market to quantify the underlying strength or direction associated with a market move. Increasingly popular in all types of markets, they give traders the ability to accurately forecast a number of possible outcomes and the likelihood of each.

Bottom line? For gauging the near-term direction and strength of a market, breadth indicators are among the single most valuable tools a trader can use. The Complete Guide to Market Breadth Indicators is the most comprehensive and vivid collection available of market breadth indicator information and features ideas and insights from market veterans including John Murphy, Don Beasley, Jim Miekka, Tom and Sherman McClellan, and numerous others. Chapters are first categorized based upon the mathematical relationship between the breadth pairs. Each indicator is then analyzed to provide information including: Also known as--other names by which the indicator is recognized Author/creator--when available Data components required--components of breadth data required to calculate the indicator Description--brief description of the indicator Interpretation--generally accepted industry interpretation of the indicator, with techniques of different analysts also discussed Chart--Chart or charts that best display the indicator Author comments--Greg Morris's personal interpretation, opinion, and use of the indicator, along with suggested modifications, complementary indicators, and more Formula--An algebraic formula for the indicator or, for formulae that are too complex for this section, a descriptive narrative on the formula References--An indicator-specific bibliography for additional information on the indicator or its creator, with notes about a

particular book or magazine article Breadth analysis is one of the purest measures of market liquidity. Applicable to virtually any exchange or index of securities for which breadth data is available, it represents the best available footprint of the health and near-term direction of the overall market examined. The Complete Guide to Market Breadth Indicators is the first book to delve into the use, mathematics, and interpretation of the most popular and proven of these tools, and is an invaluable reference for technical traders and investors of all types, and in every market.

A newly expanded and updated edition of the trading classic, Design, Testing, and Optimization of Trading Systems Trading systems expert Robert Pardo is back, and in The Evaluation and Optimization of Trading Strategies, a thoroughly revised and updated edition of his classic text Design, Testing, and Optimization of Trading Systems, he reveals how he has perfected the programming and testing of trading systems using a successful battery of his own time-proven techniques. With this book, Pardo delivers important information to readers, from the design of workable trading strategies to measuring issues like profit and risk. Written in a straightforward and accessible style, this detailed guide presents traders with a way to develop and verify their trading strategy no matter what form they are currently using—stochastics, moving averages, chart patterns, RSI, or breakout methods. Whether a trader is seeking to enhance their profit or just getting started in testing, The Evaluation and Optimization of Trading Strategies offers practical instruction and expert advice on the development, evaluation, and application of winning mechanical trading systems.
