Practice exercises for the Language Book activities, intended for homework or quiet class time. Practice Book pages should be done when the corresponding page in the Language Book has been finished. If time allows teachers may like to go through some or all of the exercises orally before children work independently.

Standardized test-taking skills for reading, math and language for grade 8.

Connecting Math Concepts introduces ideas gradually and teaches students the connections between concepts. Focusing on the big ideas of mathematics, Connecting Math Concepts teaches explicit strategies that enable students to master difficult ideas such as ratios, proportions, probability, functions, and data analysis. Detailed explanations and guided practice move students toward independent work, ensuring that students gain success and confidence as mathematical thinkers.

Middle Grades Research Journal (MGRJ) is a refereed, peer reviewed journal that publishes original studies providing both empirical and theoretical frameworks that focus on middle grades education. A variety of articles are published quarterly in March, June, September, and December of each volume year.

Exploring Values Through Multimedia, Literature and Literacy Events was written by teachers and educational researchers for classrooms and schools interested in developing learning communities that develop critical and compassionate future citizens. Through the use of specific multimedia, literature and literacy events, this book presents numerous ways for classroom teachers and schools to promote respectful, responsible, caring, and sharing students in a democratic society. Beginning with Plato's message that we cannot let the formation of good citizens to chance, Exploring Values Through Multimedia, Literature and Literacy Events takes the reader through a brief history of character education and moral development and a summary of multimedia's impact on our lives. The chapters that follow are devoted to teacher tested classroom and school programs, activities, and resources for the understanding of diverse human perspectives. Included in several chapters are the unique ways classes might analyze how and why information is presented in the media. Due to the constant media bombardment on our lives, the goal if this volume is to support our students as they discern the meanings of truth and justice.
