Principles of Macroeconomics for AP® Courses 2e

The Sayre & Morris texts have been written for first-year economic principles courses offered in colleges and universities. In writing the text, the authors have focused on four guiding principles: Achieve a well written text the authors have developed a well written text that speaks directly to the student. At the same time the text avoids unnecessary jargon, abstraction, and repetition. Focus emphasis on the student students learn economics by "doing economics". Self-test questions are positioned throughout each chapter to check for understanding, and the authors have integrated a carefully crafted Study Guide with three levels of problems allowing students to master the basics as well as get reinforcement with the more difficult concepts. Avoid an encyclopaedic text – each text covers the course in 13 carefully crafted chapters, allowing for a few extension topics, ensuring that most of the text can be covered in the standard 12 or 13 weeks. Provide a coherent package – the authors have written the text, instructor's manual and integrated Study Guide, and have carefully supervised the development of the test bank, PowerPoint slides, and the Online Learning Centre content, ensuring an integrated and comprehensive teaching and learning package The Study Guide for Microeconomics by Mark Rush of the University of Florida is carefully coordinated with the text, MyEconLab, and the Test Banks. Each chapter of the Study Guide contains: * Key concepts * Helpful hints * True/false/uncertain questions * Multiple-choice questions * Short-answer questions * Common questions or misconceptions that the student explains as if he or she were the teacher Each part allows students to test their cumulative understanding with questions that go across chapters and work a sample midterm examination. Students can purchase the Study Guide from our online catalog, or from MyPearsonStore.
