Microsoft as the most important technological milestone in the series to date. It is the first version in the flight simulator series to be released on DVD-ROM. It is also the first version in the series to feature a new type of electronic distribution prevention using license keys, removing the need for the user to insert the game disc into their computer in order to run the software. Flight Simulator X marks the tenth version of the popular line of flight simulators. It was officially released to the US market on October 17, 2006. According to Microsoft's Web site for the game, a standard edition features everything from nav aids to GPS and airways. It also includes 18 planes, 28 detailed cities, and over 24,000 airports with a deluxe version featuring 24 aircraft, and 38 cities. Flight Simulator X was
