On publication the first edition of Paediatric Exercise Science and Medicine became the definitive text in the rapidly emerging discipline of paediatric exercise (including sport) science and medicine. Since the publication of the first edition, sport and exercise science and medicine has grown into one of the UK's major undergraduate subjects with 1,930 'sport' courses being offered at 151 institutions and UCAS receiving over 35,000 applications in 2005. Thishuge growth in undergraduate courses is now being reflected by an increase in taught masters programmes, research students, postdoctoral researchers, and university lecturers which, together with final year undergraduates, are the primary market for this text. The book is also aimed at the increasingnumber of human biology/physiology students and researchers, sports medicine physicians and students, paediatricians, paramedics, clinicians dealing with young athletes and advanced youth coaches. International interest in the children and exercise is reflected by a dramatic 123% increase in published research papers in the 10 years to 2007 compared with the 10 years to 2000 when the first edition was published (i.e. 4,377 compared with1,959).The first edition of Paediatric ExerciseScience and Medicine received excellent international reviews and was welcomed by reviewers as a coherent and comprehensive volume which offered 'state of the art' coverage of the topic. However, this material is now almost 10 years old and in a rapidly developing field requires updating andrefreshing. The second edition has retained the successful format of the

first edition but has extended coverage to address recent research and new experimental techniques and methodologies which have provided further insights into understanding the exercising child. 'New' researchers who have become leaders in their field since the publication of the first edition have joined members of the original team of expert contributors who are still recognised as active leaders in their field toproduce a new edition which will be immediately recognised as the premier text covering children, sport and exercise.
