Hope has always said to Americans tomorrow will be better than today. Always, until now. Because if you are a computer programmer, engineer, accountant, manager or a factory worker, you are filled with fear, instead of hope, for your job may disappear overnight. If you are a small sized entrepreneur, the big company you've serviced from the beginning of your existence may call in the middle of the night to inform you they will no longer buy from you; they are buying from overseas. And these are the stories unfolding in communities across America. Fear, not hope, is stalking many an American. The information superhighway that was supposed to have been the road to high-

paying jobs for Americans has instead turned into one on which offshore outsourcing is killing many jobs. If it is allowed to continue, America's foundation built over many generations will be weakened. To save existing jobs in America and create new ones, Dr. Abraham Turkson has suggested new ideas to reduce costs to make businesses in America more competitive, provide private healthcare for all Americans, and stop oil imports. And none of the suggestions involves raising taxes. Hope must be reborn across America.

In the West, news about the Middle East is dominated by an endless stream of reports and commentary about civil war, sectarian violence, religious extremism, and economic stagnation. But do they tell the full story? For instance, who knew that university enrolment in the war-torn Palestinian territories exceeds that of Hong Kong, or that more than a third of Lebanese entrepreneurs are women? Change is on its way in the Middle East, argues Bessma Momani, and its cause is demographic. Today, one in five Arabs is between the ages of fifteen and twenty-four. Young, optimistic, and increasingly cosmopolitan,

their generation will shape the region's future. Drawing on interviews, surveys, and other research conducted with young people in fifteen countries across the Arab world, Momani describes the passion for entrepreneurship, reform, and equality among Arab youth. With insightful political analysis based on the latest statistics and first-hand accounts, Arab Dawn is an invigorating study of the Arab world and the transformative power of youth.

This second volume on carbonate reservoirs completes the two-volume treatise on this important topic for petroleum engineers and geologists. Together, the volumes form a complete, modern reference to the properties and production behaviour of carbonate petroleum reservoirs. The book contains valuable glossaries to geologic and petroleum engineering terms providing exact definitions for writers and speakers. Lecturers will find a useful appendix devoted to questions and problems

that can be used for teaching assignments as well as a guide for lecture development. In addition, there is a chapter devoted to core analysis of carbonate rocks which is ideal for laboratory instruction. Managers and production engineers will find a review of the latest laboratory technology for carbonate formation evaluation in the chapter on core analysis. The modern classification of carbonate rocks is presented with petroleum production performance and overall characterization using seismic and well test analyses. Separate chapters are devoted to the important naturally fractured and chalk reservoirs. Throughout the book, the emphasis is on formation evaluation and performance. This two-volume work brings together the wide variety of approaches to the study of carbonate reservoirs and will therefore be of value to managers, engineers, geologists and lecturers. First, it describes the life of a mainstream, Christian family living in Egypt. The agony involved for the head of the family (the author) to make the decision of taking his wife and three young daughters from the safety of living among family and friends that provided a hedge against the unknown and uncertainty of moving to another country and a new culture. It describes how Divine intervention tilted the balance in favor going ahead with the decision to move to America. The book entails several circumstances that clearly manifested God's desire for us to leave the country in which we had lived most of our lives. Second, the book describes how the basically Islamic, Arabic culture of the Middle East compares with the essentially Christian culture of the United States. It deals with the subtle underlying teachings of Islam that affect social and spiritual lives of people living in Muslim-majority societies. The book describes how deeply-ingrained ideas can enhance or prohibit advancement of society.

Book One - Arabian Seduction Josie is a disorganized, clumsy, intelligent, hardworking college intern who loves engineering. On a trip to the Middle Eastern paradise of El-Safar with several classmates and her best friend, Fiona, Josie is ready to get out in the field and out of the orientation process. And now, she's been given a desk job that's keeping her from the gritty work she loves. But the man who is keeping her from her passion is also determined to impassion her in other ways-both good and bad. Sheikh Jamal, the handsome billionaire and owner of the business that Josie is interning for, may find Josie to be unkempt and shameless, but he's inexplicably drawn to her, even giving her a personal assignment to keep her nearby.

Witness a competition of strong-willed minds as pressure builds from both sides to make Josie a suitable match for the Arabian billionaire. Book Two - Arabian Kiss In the steamy Middle East, engineering intern Josie and handsome oil-tycoon Sheikh Jamal Zahid have just had their first intimate encounter-a passionate embrace, which neither allowed to follow through. She finds him brash, sexist, and yet still the most coolly collected and confident man she's ever come across. Josie's the only person willing to challenge him, the only person who sees him for his rude conduct, and the only person who can get under his skin-even though his stoic face never betrays him. Because of all of this, he insists that she needs to be tamed but cannot control his wandering eyes and hidden lusts around her. Meanwhile, the sheikh's family and Josie's friends play matchmakers and troublemakers, vicariously living through the two of them and watching their sarcastic fights unfold. Between encounters with ex-lover supermodels, awkward business meetings with the sheikh's family as he corrects her etiquette, and fiery trips into the field where Josie feels simultaneously most at home and most vulnerable to the sheikh, this romance leading up to an Arabian kiss will challenge these two strong-willed characters in ways they could have never imagined. Book Three - Arabian Touch Josie's heated relationship with handsome oil-tycoon Sheikh Jamal Zahid reaches new heights of lust and conflict as the two have finally shared their first kiss. Everything they think they feel about one another is getting put to the test now. Josie is questioning her sanity because she

never goes for guys like the sheikh-conceited men who think they can tame her. The sheikh, meanwhile, is questioning his sanity because he could have any woman he wants, yet he wants her—a sarcastic, tough woman who isn't throwing herself at his feet. As passions build, an ex-lover closes in, and Josie feels the steam of Jamal's Arabian touch and exchanges it with her own wild tenacity. The two lovers are coming quickly to a crossroad—the end of Josie's internship at the sheikh's company—and they will face the biggest decision of their lives: to continue their strong-willed ways or to open their stubborn hearts for the sake of love. Please note: This is a series of erotic romance stories and not appropriate for young adult readers. The book contains graphic sex, language and situations not appropriate for young adult readers.

In a dramatic unveiling of the little-known world of contracted military logistics, Adam Moore examines the lives of the global army of laborers who support US overseas wars. *Empire's Labor* brings us the experience of the hundreds of thousands of men and women who perform jobs such as truck drivers and administrative assistants at bases located in warzones in the Middle East and Africa. He highlights the changes the US military has undergone since the Vietnam War, when the ratio of contractors to uniformed personnel was roughly 1:6. In Afghanistan it has been as high as 4:1. This growth in logistics contracting represents a fundamental change in how the US fights wars, with the military now dependent on a huge pool of contractors recruited

from around the world. It also, Moore demonstrates, has social, economic, and political implications that extend well beyond the battlefields. Focusing on workers from the Philippines and Bosnia, two major sources of "third country national" (TCN) military labor, Moore explains the rise of large-scale logistics outsourcing since the end of the Cold War; describes the networks, infrastructures, and practices that span the spaces through which people, information, and goods circulate; and reveals the experiences of foreign workers, from the hidden dynamics of labor activism on bases, to the economic and social impacts these jobs have on their families and the communities they hail from. Through his extensive fieldwork and interviews, Moore gives voice to the agency and aspirations of the many thousands of foreigners who labor for the US military.

New Business Ideas to Retain Jobs in America

Petroleum discovery in a country presents its policy makers with a challenging and complex task: formulating and agreeing on policies that will shape the country's petroleum sector and guide the translation of the newly discovered resources into equitable and sustainable economic and social growth for the

nation over the long term. Balancing Petroleum Policy provides policy makers and other stakeholders with the basic sector-related knowledge they need to embark on this task. It introduces a number of topics: the petroleum value chain and pivotal factors affecting value creation, a consultative process for developing a nation's common vision on key petroleum development objectives, design of a legislative and contractual framework, petroleum fiscal regimes and their administration, prudent fiscal management, transparency and governance, environmental and social safeguards, and economic diversification through industrial linkages. Although much of the material is relevant to designing policies for the development of the petroleum sector in general, the book gives special focus to developing countries, countries in a federal or devolved setting, and countries that have experienced or are still experiencing civil conflict. With this focus in mind, the book examines three questions—ownership, management, and revenue sharing of petroleum resources—that are central to petroleum policy in any federal or devolved state. It also offers important perspectives on how to prevent violent conflicts related to such resources. Petroleum policies tend to vary significantly from country to country, as do the objectives that such policies aim to achieve in the specific context of each particular country. Although there is no one-size-fits-all policy and there are no clear-cut answers to the many potential policy dilemmas associated with the discovery of petroleum resources, this publication may help policy makers find the right balance among the chosen objectives—and the right policy choices to achieve these objectives.

This book analyzes the progress of the MSRI, highlights the political and economic factors affecting its realization, and offers insights into the political and economic implications of China's endeavor. It focuses specifically on countries within Africa and the Middle East to provide a basis for a substantive examination of these issues in a manner sensitive to the milieu in individual countries and relevant regions. It represents the final volume in a well-received series on China's Maritime Silk Road Initiative (MSRI), which, so far, includes books covering China's MSRI and South Asia (Palgrave, 2018) and China's MSRI and Southeast Asia (Palgrave, 2019). This book will interest scholars of China, international relations, and the relevant regions, journalists, and policymakers.
