This edited book examines the management of diversity and inclusion in the military. Owing to the rise of asymmetric warfare, a shift in demographics and labor shortfalls, the US Department of Defense (DoD) has

## Access Free Military Information Paper Format

prioritized diversity and inclusion in its workforce management philosophy. In pursuing this objective, it must ensure the attractiveness of a military career by providing an inclusive environment for all personnel (active and reserve military, civilian, and contractors) to reach their potential and maximize their contributions

to the organization. Research and practice alike provide substantial evidence of the benefits associated with diversity and inclusion in the workplace. Diversity and inclusion programs are more strategic in focus than equal opportunity programs and strive to capitalize on the strengths of the workforce, while minimizing the

weaknesses that inhibit optimal organizational performance. This new book provides vital clarification on these distinct concepts, in addition to offering concrete best practices for the successful management of diversity and inclusion in the workplace. Written by scholars and practitioners, each chapter addresses

major areas, raises crucial issues, and comments on future trends concerning diversity and inclusion in the workplace. The book will be of great interest to students of military studies, war and conflict studies, business management/HRM, psychology and politics in general, as well as to military

The publication  
describes the  
evaluation, in terms of  
speed and accuracy, of

four configurations of procedures for inputting information into a semi-automated information processing system. Sixty USMA Prep School enlisted men were given

an experimental task  
requiring each to  
translate 35 free-text  
messages into computer-  
acceptable terminology.  
Accuracy and speed of  
two input procedures

were each compared under two conditions of verification. In one procedure, the subjects translated the incoming message onto a paper format before

transcribing on a CRT screen (off-line). In the other procedure, the message was transcribed directly on the CRT screen (on-line). In the unverified condition,

one man performed the  
input operation without  
error check; in the  
verified condition, two  
men translated the same  
message, compared their  
translations, and
