When it comes to how to succeed as an entrepreneur, we are besotted with advice. According to bestselling author Alan Weiss, success is a combination of opportunism, very disciplined work, luck, timing, and ignoring most advice. In other words, it means striking out on your own, original path to success. In Million Dollar Maverick, he explains that entrepreneurs don't take advice, they create value and then monetize it. They do what they love and are great at and find a way to sell it to people. They do not--contrary to "conventional wisdom"--chase money. They attract money. And most of all they think differently, act decisively--and, if talent and timing are with them, succeed quickly. Drawing on over thirty years of experience as a consultant, speaker, and global expert, Weiss shares his story and "Million Dollar Tips," not found in any of his other books, to help entrepreneurs gain influence, build confidence, and develop the critical thinking skills they need to discover the inside track to rapid success

True or false? While deeply meaningful and utterly essential, social justice work can be confounding. Why do we take one step forward and then two steps back - on income inequality, the environment, immigration, gun control? What can we do to bridge the divides in our increasingly polarized country, beginning with the very language we use? How can nonprofits and public agencies best serve constituents in need, balancing mission with necessities such as marketing (too often dismissed as a luxury)? What lessons from past social justice efforts directly benefit our current work? How do those in justice professions make a sustainable difference, and how do we keep on keeping on? *Chasing Social Justice* is written in an unusually poignant and accessible way, combining lived experience with political analysis, illuminating lessons learned over the past three decades across social justice movements, initiatives, and organizations. This riveting new book is ideal for: Nonprofit leaders Professors teaching graduate and undergraduate students in areas such as Public Health, Social Work, Management, Public Policy, Education, Sociology, and Political Science New and long-time activists

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Please note: This is a companion version & not the original book. Sample Book Insights: #1 A proposal is a summary of the conceptual agreement reached with an economic buyer. It is not a negotiating document or an attempt to make a sale. It should not establish your credibility, establish a relationship with the buyer, or serve as a point of comparison for competitors' proposals. #2 Proposals have traditionally been viewed as a mix of credibility, research, consultant's beliefs and mission, pricing, risk management, and competitive submission. #3 The most important thing you can do is to persuade the firm to stop using a metric of number of proposals issued per week as an indicator of sales success. Proposals are not the point of the arrow, but the heft behind it. #4 The buyer must share personal and nonpublic information with you in order to establish a trusting relationship. The buyer should ask your advice.

This report assesses progress in implementing the commitments and actions in the Addis Ababa Action Agenda. The global economic recession and financial turmoil from COVID-19 (coronavirus) are derailing implementation of the Agenda and achievement of the Sustainable Development Goals (SDGs). Even before the pandemic, the 2020 Financing for Sustainable Development Report (FSDR) of the Inter-agency Task Force noted that there was backsliding in many areas. Due to the crisis, global financial markets have witnessed heavy losses and intense volatility. Particularly worrisome is the prospect of a new debt crisis. The FSDR highlights both immediate and longer-term actions, including arresting the backslide, to respond to the COVID-19 crisis. Recommendations are included in the report.

Every leader understands the burning need for change—and every leader knows how risky it is, and how often it fails. To make organizational change work, you need to base it on science, not intuition. Despite hundreds of books on change, failure rates remain sky high. Are there deep flaws in the guidance change leaders are given? While eschewing the

pat answers, linear models, and change recipes offered elsewhere, Paul Gibbons offers the first blueprint for change that fully reflects the newest advances in mindfulness, behavioral economics, the psychology of risk-taking, neuroscience, mindfulness, and complexity theory. Change management, ostensibly the craft of making change happen, is rife with myth, pseudoscience, and flawed ideas from pop psychology. In Gibbons' view, change management should be "euthanized" and replaced with change agile businesses, with change leaders at every level. To achieve that, business education and leadership training in organizations needs to become more accountable for real results, not just participant satisfaction (the "edutainment" culture). Twenty-first century change leaders need to focus less on project results, more on creating agile cultures and businesses full of staff who have "get to" rather than "have to" attitudes. To do that, change leaders will have to leave behind the old paradigm of "carrots and sticks," both of which destroy engagement. "New analytics" offer more data-driven approaches to decision making, but present a host of people challenges—where petabyte information flows meet traditional decision-making structures. These approaches will have to be complemented with "leading with science"—that is, using evidence-based management to inform strategy and policy decisions. In *The Science of Successful Organizational Change*, you'll learn: How the VUCA (Volatile, Uncertain, Complex, and Ambiguous) world affects the scale and pace of change in today's businesses How understanding of flaws in human decision-making can help leaders guide their teams toward wiser strategic decisions when the stakes are largest—including "when to trust your guy and when to trust a model" and "when all of us are smarter than one of us" How new advances in neuroscience have altered best practices in influencing colleagues; negotiating with partners; engaging followers' hearts, minds, and behaviors; and managing resistance How leading organizations are making use of the science of mindfulness to create agile learners and agile cultures How new ideas from analytics, forecasting, and risk are humbling those who thought they knew the future—and how the human side of analytics and the psychology of risk are paradoxically more important in this technologically enabled world What complexity theory means for decision-making in the context of your own business How to create resilient and agile business

cultures and anti-fragile, dynamic business structures To link science with your "on-the-ground" reality, Gibbons tells "warts and all" stories from his twenty-plus years consulting to top teams and at the largest businesses in the world. You'll find case studies from well-known companies like IBM and Shell and CEO interviews from Nokia and Barclays Bank.

*This deeply insightful guide to understanding what clients really want is “an indispensable resource for consultants” (Keith Ferrazzi, #1 New York Times–bestselling author of Never Eat Alone). Independent consulting is a potentially lucrative enterprise—but the reality seldom matches the dream. Most solo consultants and boutique consulting firms are perpetually within six months of bankruptcy due to the sputtering unreliability of their new business engines. The problem, according to international consulting expert David A. Fields, is twofold: 1) lack of a consistent, proven plan, and 2) fundamental misunderstanding about what clients want in a consultant. Fields, who has helped hundreds of consultants and boutique firms worldwide build profitable, sustainable practices, replaces the typical consultant’s mindset of emphasizing expertise and differentiated processes with a focus on building relationships, engendering trust, and solving clients’ existing problems. In *The Irresistible Consultant’s Guide to Winning Clients*, Fields synthesizes his decades of experience into a step-by-step approach to winning more projects from more clients at higher fees. From nuts-and-bolts business advice and tactics to a deeply insightful breakdown of the human side of a very human profession, Fields, named one of Advertising Age magazine’s “Marketing Top 100,” delivers a comprehensive guidebook that is at once highly approachable and satisfyingly detailed. “If I could have just one book on client strategy, this book would be it.” —Marshall Goldsmith, #1 New York Times–bestselling author of Triggers*

*Have you ever looked around and wondered why some businesses seem like the popular kids in school? They appear to be wildly successful overnight. They are in all the magazines, seem to have more business than they can handle, and everyone is talking about them. Author J. Nichole Smith has spent over a decade building and studying this type of stand-out brand in the pet industry. She calls these outliers Million Dollar Dog Brands. In this book she outlines the exact formula petpreneurs can follow to craft their own. In *the Million Dollar Dog Brand*, Smith shares exclusive in-depth interviews with the founders of 10 of the most pioneering, market-leading Million Dollar Dog Brands, including BarkBox, Ruffwear, Planet Dog, Honest Kitchen, P.L.A.Y., Zee.Dog, Harry Barker, Victoria Stilwell, PetHub, and her own co-creation, Dog is Good. The pet industry has just surpassed \$100 billion in value worldwide. Building a pet business is more appealing than ever. Opportunity leads to intense competition, which means building a sustainable, profitable business in this market can feel like an impossible job. This book is the essential field guide to do exactly that: to start or grow a pet business in a way that is irresistible to customers and opinion leaders, resulting in more demand, more profit, and more influence. The Language of Success

The acclaimed New York Times and Wall Street Journal bestseller from Robert Cialdini—"the foremost expert on effective persuasion" (Harvard Business Review)—explains how it's not necessarily the message itself that changes minds, but the key moment before you deliver that message. What separates effective communicators from truly successful persuaders? With the same rigorous scientific research and accessibility that made his Influence an iconic bestseller, Robert Cialdini explains how to prepare people to be receptive to a message before they experience it. Optimal persuasion is achieved only through optimal pre-suasion. In other words, to change "minds" a pre-suader must also change "states of

mind." Named a "Best Business Books of 2016" by the Financial Times, and "compelling" by The Wall Street Journal, Cialdini's Pre-Suasion draws on his extensive experience as the most cited social psychologist of our time and explains the techniques a person should implement to become a master persuader. Altering a listener's attitudes, beliefs, or experiences isn't necessary, says Cialdini—all that's required is for a communicator to redirect the audience's focus of attention before a relevant action. From studies on advertising imagery to treating opiate addiction, from the annual letters of Berkshire Hathaway to the annals of history, Cialdini outlines the specific techniques you can use on online marketing campaigns and even effective wartime propaganda. He illustrates how the artful diversion of attention leads to successful pre-suasion and gets your targeted audience primed and ready to say, "Yes." His book is "an essential tool for anyone serious about science based business strategies...and is destined to be an instant classic. It belongs on the shelf of anyone in business, from the CEO to the newest salesperson" (Forbes).
