The official publication of the International Society for the Study of the Lumbar Spine, this volume is the most authoritative and up-to-date reference on the lumbar spine. This edition provides more balance between basic science and clinical material and has been completely reorganized for easy reference. New chapters cover gene therapy, outcomes assessment, and alternatives to traditional nonoperative treatment. The editors have also added chapters on preparation for surgery, surgical approaches, spinal instrumentation, and bone grafts. Chapters on specific disorders have a consistent structure—definition, natural history, physical examination, imaging, nonoperative treatment, operative treatment, postoperative management, results of surgery, and complications.

Vol. 73- include the section ASSE journal, 1956- .

"The signature undertaking of the Twenty-Second Edition was clarifying the QC practices necessary to perform the methods in this manual. Section in Part 1000 were rewritten, and detailed QC sections were added in Parts 2000 through 7000. These changes are a

direct and necessary result of the mandate to stay abreast of regulatory requirements and a policy intended to clarify the QC steps considered to be an integral part of each test method. Additional QC steps were added to almost half of the sections."--Pref. p. iv.

Greatly revised, the Second Edition presents an extended survey of this rapidly growing field. The book reviews the effects of industrial and pharmaceutical chemicals on human behavior, cognitive function, and emotional status. Features include two new chapters addressing key forensic issues and recent views on multiple chemical sensitivity, sick building syndrome, and psychosomatic disorders; current data on NIOSH and OSHA exposure levels for industrial toxins; and enhanced coverage of testing methods; studies of PET, SPECT, and BEAM imaging applied to neurotoxic exposure.

Papers presented at the title symposium, held in Montreal in June 1994. Following an overview, the papers are arranged in sections devoted to standards development and test methods; bituminous roofing; synthetic materials; and insulation. No index.
