*As the Civil War drew to a close, newly emancipated black women workers made their way to Atlanta--the economic hub of the newly emerging urban and industrial south--in order to build an independent and free life on the rubble of their enslaved past. In an original and dramatic work of scholarship, Tera Hunter traces their lives in the postbellum era and reveals the centrality of their labors to the African-American struggle for freedom and justice. Household laborers and washerwomen were constrained by their employers' domestic worlds but constructed their own world of work, play, negotiation, resistance, and community organization. Hunter follows African-American working women from their newfound optimism and hope at the end of the Civil War to their struggles as free domestic laborers in the homes of their former masters. We witness their drive as they build neighborhoods and networks and their energy as they enjoy leisure hours in dance halls and clubs. We learn of their militance and the way they resisted efforts to keep them economically depressed and medically victimized. Finally, we understand the despair and defeat provoked by Jim Crow laws and segregation and how they spurred large numbers of black laboring women to migrate north. Hunter weaves a rich and diverse tapestry of the culture and experience of black women workers in the post-Civil War south. Through anecdote and data, analysis and interpretation, she manages to penetrate African-American life and labor and to reveal the centrality of women at the inception--and at the heart--of the new south.*

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-*

selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Do you know how to tie your shoe? Or do you just think you do but you've actually been screwing it up for decades like most people have? This witty, light book takes a fresh spin on all the mistakes we make everyday that end up costing us big in our wallets, our health, our homes, and beyond. Topics covered are Yourself (appearance, skills, all things you), Your Home, Your Cooking, Your Money, Your Relationships & Family, and Your Health. This perfect combination of humor and wisdom entertains readers as they learn how to make their lives better by avoiding and remedying common screw-ups. Things we all mess up: Using chopsticks as spears because you just can't figure them out (Yourself) Throwing Frisbees behind you, sucking at horseshoes, and other game/sporting fouls (Yourself) Living with streaky paint or air bubbles under the wallpaper you screwed up (Your Home) Killing all the houseplants you've ever bought (Your Home) Burning the edges and undercooking the middle (Your Cooking) Breaking the yolk every time you flip an egg (Your Cooking) Your taxes. Argh. (Your Money) Overdrawing your account and paying a fee even though you have overdraft protection (Your Money) Cracking someone's ribs in the Heimlich maneuver (Your Health) Inability to make a Band-Aid stick or get a Band-Aid off without tearing out your hair (Your Health) Forgetting your loved ones birthdays year after year (Your Relationships & Family) Ruining Christmas with the untimely truth about Santa (Your Relationships & Family) Embarrassing yourself on a date because you don't understand the French menu or the 90-page wine list (Your Relationships & Family) The ways in which we flub and flounder are infinite, and this book taps into that boundless fountain of foul ups in a way that will entertain and enlighten readers of all kinds.

The success of any organization most often depends on the execution and management of such strategic issues as business development, personnel and fiscal operations. This new book introduces readers to the duties and practices assigned to service managers in the successful operation of an automotive service facility. Coverage begins with a general discussion of the management structure and the service manager's role in facility operations. Consideration is then given to navigation of the personnel process from the recruitment of workers to supervision of their performance. The financial business practices of a service manager familiarizes readers with the importance of fiscal responsibility in the operation of a lucrative automotive service business. **John Mitchell was a contradictory figure, representing the best and worst labor leadership had to offer at the turn of the century. Articulate, intelligent, and a skillful negotiator, Mitchell made effective use of the press and political opportunities as well as the muscle of his union. He was also manipulative, calculating, tremendously ambitious, and prone to place more trust in the business community than in his own rank and file. Phelan relates Mitchell's life to many issues currently being debated by labor historians, such as organized labor's search for respectability, its development of a large bureaucracy, its ambiguous relationship to the state, and its suppression of worker input. In addition, he shows how Mitchell's life illuminates broad economic and political developments in the late nineteenth and early twentieth centuries. When purchasing your vehicle, you should probably expect to be lied to by everyone from the sales department to the financial department. Apples, Oranges, and Lemons is a one-of-a-kind, tell-all book about the automobile trade that reveals inside secrets they don't want you to know. There is no other book like it. It is written by the only person who could, or would. Phillip James Grismer knows the automobile industry from the inside out. He first apprenticed in a number of import auto shops, eventually rising through the ranks and opening his own facility. Grismer draws on his thirty-seven years of experience to expose how the industry really works. He provides answers on how to deal with a "lemon" while offering advice on how to make the best buy before purchasing your vehicle. Discover how the valuation and appraisal process works and how the history of your vehicle affects you and your money. Grismer's conversational style makes the information accessible while offering personal insight on the process of vehicle manufacturing and servicing. Even the most casual reader will be enlightened and entertained by the inner workings of the automobile manufacturing, sales, and service industry. But most importantly, this handy reference guide**

Melanie Mitchell separates science fact from science fiction

in this sweeping examination of the current state of AI and

how it is remaking our world No recent scientific enterprise

has proved as alluring, terrifying, and filled with extravagant promise and frustrating setbacks as artificial intelligence. The award-winning author Melanie Mitchell, a leading computer scientist, now reveals AI's turbulent history and the recent spate of apparent successes, grand hopes, and emerging fears surrounding it. In *Artificial Intelligence*, Mitchell turns to the most urgent questions concerning AI today: How intelligent—really—are the best AI programs? How do they work? What can they actually do, and when do they fail? How humanlike do we expect them to become, and how soon do we need to worry about them surpassing us? Along the way, she introduces the dominant models of modern AI and machine learning, describing cutting-edge AI programs, their human inventors, and the historical lines of thought underpinning recent achievements. She meets with fellow experts such as Douglas Hofstadter, the cognitive scientist and Pulitzer Prize-winning author of the modern classic *Gödel, Escher, Bach*, who explains why he is “terrified” about the future of AI. She explores the profound disconnect between the hype and the actual achievements in AI, providing a clear sense of what the field has accomplished and how much further it has to go. Interweaving stories about the science of AI and the people behind it, *Artificial Intelligence* brims with clear-sighted, captivating, and accessible accounts of the most interesting and provocative modern work in the field, flavored with Mitchell's humor and personal observations. This frank, lively book is an indispensable guide to understanding today's AI, its quest for “human-level” intelligence, and its impact on the future for us all.
