Mid Ocean is a Novel of fiction by Author T. Rafael Cimino and is about the war on drugs as it occurs in South Florida in the year 1984.Joel Kanyon has lived in his father's shadow for most of his life. Even after his Dad's death, the man's powerful legacy still haunts him at every turn. As he graduates from the U. S. Custom's Academy, Joel is assigned strategic duty in the 'bad-lands' of U. S. drug enforcement, the Florida Keys. Set in 1984, Mid Ocean shows the lives of the sometimes violent drug smugglers and the men and women sworn to uphold the law in this Caribbean 'wild west'. In the end, Joel Kenyon will question everyone, including himself in a quest for what's right and true. It is here that he will find out the sea holds many secrets. Thrilling, heartbreaking, and, at times, absurdly funny, The Last Resort is a remarkable true story about one family in a country under siege and a testament to the love, perseverance, and resilience of the human spirit. Born and raised in Zimbabwe, Douglas Rogers is the son of white farmers living through that country 's long and tense transition from postcolonial rule. He escaped the dull future mapped out for him by his parents for one of adventure and excitement in Europe and the United States. But when Zimbabwe 's president Robert Mugabe launched his violent program to reclaim white-owned land and Rogers 's parents were caught in the cross fire, everything changed. Lyn and Ros, the owners of Drifters—a famous game farm and backpacker lodge in the eastern mountains that was one of the most popular budget resorts in the country—found their home and resort under siege, their friends and neighbors expelled, and their lives in danger. But instead of leaving, as their son pleads with them to do, they haul out a shotgun and decide to stay. On returning to the country of his birth, Rogers finds his once orderly and progressive home transformed into something resembling a Marx Brothers romp crossed with Heart of Darkness: pot has supplanted maize in the fields; hookers have replaced college kids as guests; and soldiers, spies, and teenage diamond dealers guzzle beer at the bar. And yet, in spite of it all, Rogers 's parents—with the help of friends, farmworkers, lodge guests, and residents—among them black political dissidents and white refugee farmers—continue to hold on. But can they survive to the end? In the midst of a nation stuck between its stubborn past and an impatient future, Rogers soon begins to see his parents in a new light: unbowed, with passions and purpose renewed, even heroic. And, in the process, he learns that the "big story" he had relentlessly pursued his entire adult life as a roving journalist and travel writer was actually happening in his own backyard. Evoking elements of The Tender Bar and Absurdistan, The Last Resort is an inspiring, coming-of-age tale about home, love, hope, responsibility, and redemption. An edgy, roller-coaster adventure, it is also a deeply moving story about how to survive a corrupt Third World dictatorship with a little innovation, humor, bribery, and brothel management.

HOW TO RELEASE THE POWER OF GOD'S MERCY TO WORK FOR YOU!(THE 15 DAYS MORNING AND NIGHT DAILY WORSHIP PRAYER BOOK)HOW TO ACTIVATE THE MIRACLE POWER IN GOD'S MERCY AND PUT IT TO WORK ON YOUR BEHALFLife is often about facing and fighting battles. There are battles against sicknesses, diseases, poverty, death, stagnancy, childlessness, career problems, business failures, problems with spouse or children, etc. The list goes on and on.Many are battling with problems they have never been able to overcome. Some have been racing for years with no finish line in sight. Many have given up on hope; many are no longer fighting because they have lost the same battle over and over again. They have prayed; they have been prayed for, but are nothing bettered. But there is something - a force of God's nature you can activate and stir up to get divine intervention. It is called the MERCY OF GOD!Many people don't know the power of activating the mercy of God to work for them. When God's mercy is stirred up, mighty works of power are wrought or performed in your favour; this includes great miracles, great healings, great salvation, release of abundant prosperity and victory in every battle of life.When a situation seems impossible or too hard to overcome, one thing that can get the job done is God's Mercy fully activated.I have discovered that miracles are almost wrought instantly when we deliberately give thanks and praise to God because his mercy endures forever. This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform section measurement analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 on oil-derivate fossil fuels, whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons, presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

A history of the Korean War with soldier's-eye views from both sides, by the Pulitzer Prize-winning author of The Rising Sun and Infamy. Pulitzer Prize-winning author John Toland reports on the Korean War in a revolutionary way in this thoroughly researched and riveting book. Toland pored over military archives and was the first person to gain access to previously undisclosed Chinese records, which allowed him to investigate Chairman Mao's direct involvement in the conflict. Toland supplements his captivating history with in-depth interviews with more than two hundred American soldiers, as well as North Korean, South Korean, and Chinese combatants, plus dozens of poignant photographs, bringing those who fought to vivid life and honoring the memory of those lost. In *Mortal Combat* is comprehensive in it discussion of events deemed controversial, such as American brutality against Korean civilians and allegations of American use of biological warfare. Toland tells the dramatic account of the Korean War from start to finish, from the appalling experience of its POWs to Mao's prediction of MacArthur's Inchon invasion. Toland's account of the "forgotten war" is a must-read for any history aficionado.

The book is a complete treatise on renewable energy sources and also includes issues relating to biofuels. It aims to serve as a text for the undergraduate and postgraduate students in relevant disciplines and a reference for all the professionals in related fields.
