Hypercalcemia is the most common life-threatening metabolic disorder associated with cancer. The pathophysiological, epidemiological and clinical aspects of hypercalcemia of malignancy are presented in this issue, with a focus on the recently discovered humoral factor responsible for the development of hypercalcemia. With a better understanding of the pathophysiology of this condition and the development of new potent drugs, capable of inhibiting bone resorption, especially bisphosphonates, the clinician will be more successful in correcting hypercalcemia in the great majority of patients.

Like its best-selling predecessor, the fifth edition of this popular series contains over 450 multiple-choice questions, updated references, color photographs and ECG tracings. MKSAP for Students is intended for third-year students participating in their required internal medicine clerkship and for fourth-year students on an advanced medicine clerkship. All questions are formatted as clinical vignettes that resemble the types of questions students encounter on the examination at the end of the clerkship and on the USMLE licensing examination. Each question has a detailed answer critique that identifies the correct answer, an explanation of why that answer is correct and the other

of these topics are uniquely focused on the needs of generalists and subspecialists outside of cardiovascular medicine. The publication of the 17th edition of Medical Knowledge Self-Assessment Program (MKSAP) represents nearly a half-century of serving as the gold-standard resource for internal medicine education. It also marks its evolution into an innovative learning system to better meet the changing educational needs and learning styles of all internists. The core content of MKSAP has been developed as in previous editions—newly generated, essential information in 11 topic areas of internal medicine created by dozens of leading generalists and subspecialists and guided by certification and recertification requirements, emerging knowledge in the field, and user feedback. MKSAP 17 also contains 1200 all-new, psychometrically validated, and peer-reviewed multiple-choice questions (MCQs) for self-assessment and study, including 120 in Cardiovascular Medicine. MKSAP 17 continues to include High Value Care (HVC) recommendations, based on the concept of balancing clinical benefit with costs and harms, with links to MCQs that illustrate these principles. In addition, HVC Key Points are highlighted in the text. Also highlighted, with blue text, are Hospitalist-focused content and MCQs that directly address the learning needs of internists who work in the hospital setting. health administration; others to special areas of practice such as trauma and radiology. Still other books in this series focus on interdisciplinary issues, such as the computer-based patient record, electronic health records, and networked healthcare systems. Renamed Health Informatics in 1998 to reflect the rapid evolution in the discipline now known as health informatics, the series continues to add titles that contribute to the evolution of the field. In this series, eminent experts, serving as editors or authors, offer their accounts of innovation in health informatics. Increasingly, these accounts go beyond hardware and software to address the role of information in influencing the transformation of healthcare delivery systems around the world. The series also increasingly focuses on “peopleware” and the organizational, behavioral, and societal changes that accompany the diffusion of information technology in health services environments.

Prep for Boards 2 focuses on core material that is included on the American Board of Internal Medicine Examination, and contains more than 500 Board-like multiple-choice questions with answers, references, and evidence-based critiques that explain why each option is either right or wrong. More than 50 Prep for Boards 2 questions are image-based and are modeled after questions on the ABIM exam.
