This book addresses the practice of learning and teaching within higher education. Higher education is currently a sector challenged worldwide by increased numbers and diversity of students, tougher demands for professional accountability, increasing calls for educational relevance, thinning resources and the exacting demands of a global education market. This book brings together key issues of theory and practice to develop an overall professional 'language' of teaching situated within communities of academic practice. This 'language' provides teachers with a conceptual 'vocabulary' and 'grammar' for understanding and improving practice, enables them to critically reflect upon their teaching in a range of key 'genres'

French Cycling: a Social and Cultural History aims to provide a balanced and detailed analytical survey of the complex leisure activity, sport, and industry that is cycling in France. Identifying key events, practices, stakeholders and institutions in the history of French cycling, the volume presents an interdisciplinary analysis of how cycling has been significant in French society and culture since the late Nineteenth century. Cycling as Leisure is considered through reference to the adoption of the bicycle as an instrument of tourism and emancipation by women in the 1880s, for example, or by study of the development in the 1990s of long-distance tourist cycle routes. Cycling as Sport and its attendant dimensions of amateurism/professionalism, national identity, the body and doping, and other issues is investigated through study of the history of the Tour de France, the track-racing organised at the Velodrome d'hiver in Paris in the 1920s and 1930s and other emblematic events. Cycling as Industry and economic activity is considered through an assessment of how cycling firms have contributed to technological innovation at various junctures in France's economic development. Cycling and the Media is investigated through analysis of how cyclesport has contributed to developments in the French press (in early decades) but also to new trends in television and radio coverage of sports events. Based on a very wide range of primary and secondary sources, the volume aims to present in clear language an explanation of the varied significance of cycling in France over the last hundred years.

The number of athletes who have died competing in the sport of motor racing, including amateurs and professionals around the world, stretches into the thousands. Despite the danger, drivers continue to compete day in and day out for the thrill and joy of the race. In *Taken by Speed: Fallen Heroes of Motor Sport and Their Legacies*, Connie Ann Kirk pays tribute to professional racing drivers who died while competing in the sport they loved. Covering tragedies from 1955 to the present, Kirk carefully reflects on the legacies of the racers and the impact of the tragic events, including on safety regulations, innovations, and on society as a whole. Drivers and incidents covered in this book include the 24 Heures du Mans race of 1955 where over 80 people died; the 1964 crash at the Indianapolis 500 that stopped the race for the first time in history; and the tragic losses of racers Ayrton Senna, Dale Earnhardt, Alberto Ascari, Jim Clark, Bruce McLaren, Gilles Villeneuve, Francois Cevert, Dan Wheldon, Justin Wilson, and Jules Bianchi. *Taken by Speed* features exclusive interviews with legends of motor sport—Mario Andretti, Derek Bell, Sir Stirling Moss, Bobby Rahal, Brian Redman, and Sir Jackie Stewart—who raced in the sport's most dangerous era. It also includes timelines of safety improvements in the sport and key moments in motor sport history. Using motor sports as its lens, this book explores moving stories of what it means to pursue a life's passion with unwavering drive, commitment, and courage.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should buy. Toyota - enough apologies: "when you mess up, 'fess up."
