

The use of analytical sciences in the discovery, development and manufacture of pharmaceuticals is wide-ranging. From the analysis of minute amounts of complex biological materials to the quality control of the final dosage form, the use of analytical technology covers an immense range of techniques and disciplines. This book concentrates on the analytical aspects of drug development and manufacture, focusing on the analysis of the active ingredient or drug substance. It provides those joining the industry or other areas of pharmaceutical research with a source of reference to a broad range of techniques and their applications, allowing them to choose the most appropriate analytical technique for a particular purpose. The volume is directed at analytical chemists, industrial pharmacists, organic chemists, pharmaceutical chemists and biochemists.

This Ebook is all about learning in simplest and best way. Please read full pdf file for better understanding. This Ebook is also beneficial for learners of UPSC & MPSC, for interview purpose, for freshers as well as for professionals and researchers of all Indian as well as global universities/Institutions. For any queries, suggestions or guidance, mail me at "svkaware@yahoo.co.in". Keep watching keep learning. For more updates subscribe to my channel on YouTube as "Tech_Guru Swapnil Kaware".....

Maharashtra Common Entrance Test (MH CET/ MHT CET) is annually conducted by the State Government of Maharashtra for the admission into B.Tech., B. Pharma, Ph.D. and other degree courses of different colleges in Maharashtra. There is no age limit for the candidates to apply for this entrance examination. The revised edition of this book has been carefully designed according to the latest pattern of the examination by providing the best guide to the students who are preparing for this paper. It contains Solved Papers (2019-2007) because of its self-explanatory features that help candidates to understand the solution with full-fledged diagrams and illustrations easily, quickly and deeply. Practicing from this book creates the scenario of environment which boosts confidence in the aspirants so that they can face the examination. This book prepares candidates to pass this entrance test with great ranks and get admissions in the reputed colleges. TABLE OF CONTENT SOLVED PAPERS (2019-2007)

While writing the book, we have continuously kept in mind the examination requirements of the students preparing for U.P.S.C. (Engg. Services) and A.M.I.E. (I) examinations. In order to make this volume more useful for them, complete solutions of their examination papers up to 1975 have also been included. Every care has been taken to make this treatise as self-explanatory as possible. The subject matter has been amply illustrated by incorporating a good number of solved, unsolved and well-graded examples of almost every variety.

Electrical Power Transmission and Distribution

This manual is specially written for Students who are interested in understanding Structured Query Language and PL-SQL concepts in the Computer Engineering and Information technology field and wants to gain enhance knowledge about power of SQL Language in Relational Database Management System Development. The manual covers practical point of view in all aspects of SQL and PL/SQL including DDL, DML, DCL sublanguages, also there are practices for Views, Group by, Having Clause. All PL-SQL concepts like Condition and Loop Structures, Functions and Procedures, Cursor, Triggers, Locks are illustrated using best examples

Advanced Java is a textbook specially designed for undergraduate and post graduate students of Computer Science. It focuses on developing the applications both at basic and moderate level. This text book is divided into seven units. The first unit introduces Java network programming. In this unit along with the basic concepts of networking, the programming using Sockets, InetAddress, URL and URLConnection class is discussed in a lucid manner. The second unit is based on JDBC programming. In this unit, connecting with the database is discussed with examples and illustrations. Then next two chapters focus on server side programming by means of Servlet programming and JSP. In third unit, the illustration of how to create and execute servlets is given. Then the concept of cookies and session management is discussed. In the next subsequent unit the Java Server Pages - its overview and programming is studied. In the last three units the advanced concepts of Java programming such as JSF, Hibernate and Java Web Framework : Spring is discussed. The contents of this textbook is supported with numerous illustrations, examples, program codes, and screenshots. With its lucid presentation and inclusion of numerous examples the book will be very useful for the readers.

The new edition of this popular student text offers an engaging introduction to environmental study. It covers the entire breadth of the environmental sciences, providing concise, non-technical explanations of physical processes and systems and the effects of human activities. In this second edition the scientific background to major environmental issues is clearly explained. These include: * global warming * genetically modified foods * desertification * acid rain * deforestation * human population growth * depleting resources * nuclear power generation * descriptions of the 10 major biomes. Special student text features include illustrations and explanatory diagrams, boxed case studies, concepts and definitions.
