***The renowned Caldecott Honoree and illustrator of Chicka Chicka Boom Boom provides a moving, intimate, and inspiring inside look at her colorful picture book career. Lois Ehlert always knew she was an artist. Her parents encouraged her from a young age by teaching her how to sew and saw wood and pound nails, and by giving her colorful art supplies. They even gave her a special spot to work that was all her own. Today, many years and many books later, Lois takes readers and aspiring artists on a delightful behind-the-scenes tour of her books and her book-making process. Part fascinating retrospective, part moving testament to the value of following your dreams, this richly illustrated picture book is sure to inspire children and adults alike to explore their own creativity.***

***Still considered one of the best books ever written about bullfighting, Death in the Afternoon is an impassioned look at the sport by one of its true aficionados. It reflects Hemingway's conviction that bullfighting was more than mere sport and reveals a rich source of inspiration for his art. The unrivaled drama of bullfighting, with its rigorous combination of athleticism and artistry, and its requisite display of grace under pressure, ignited Hemingway's imagination. Here he describes and explains the technical aspects of this dangerous ritual and "the emotional and spiritual intensity and pure classic beauty that can be produced by a man, an animal, and a piece of scarlet serge draped on a stick." Seen through his eyes, bullfighting becomes a richly choreographed ballet, with performers who range from awkward amateurs to masters of great elegance and cunning. A fascinating look at the history and grandeur of bullfighting, Death in the Afternoon is also a deeper contemplation of the nature of cowardice and bravery, sport and tragedy, and is enlivened throughout by Hemingway's sharp commentary on life and literature.***

*Destruction of habitat due to urban sprawl, pollution, and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals, despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent, therefore, to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations.*

***This book examines the nature of retail financial transaction infrastructures. Contributions assume a long-term outlook in their exploration of the key financial processes and systems that support a global transition to a cashless economy. The volume offers both modern and historic accounts that demonstrate the constantly changing role of payment instruments. It brings together different theoretical approaches to the study, re-examining and forecasting changes in retail payment systems. Chapters explore a global transition to a cashless society and contemplate future alternatives to cash, cheques and plastic, featuring the perspectives of academics from different disciplines in conversation and industry participants from six continents. Readers are invited to discover the innovation in payment systems and how it co-evolves with changes in society and organisations through personal, corporate and governmental processes.***

Anything is possible in the world of Latin American folklore, where Aunt Misery can trap Death in a pear tree; Amazonian dolphins lure young girls to their underwater city; and the Feathered Snake brings the first musicians to Earth. One in a series of folklore reference guides ( " ...an invaluable resource... " —School Library Journal), this book features summaries and sources of 470 tales told in Mexico, Central America and South America, a region underrepresented in collections of world folklore. The volume sends users to the best stories retold in English from the Inca, Maya, and Aztec civilizations, Spanish and Portuguese missionaries and colonists, African slave cultures, indentured servants from India, and more than 75 indigenous tribes from 21 countries. The tales are grouped into themed sections with a detailed subject index.
