

Moteur T4 Nanni

In contemporary philosophy, substantive moral theories are typically classified as either consequentialist or deontological. Standard consequentialist theories insist, roughly, that agents must always act so as to produce the best available outcomes overall. Standard deontological theories, by contrast, maintain that there are some circumstances where one is permitted but not required to produce the best overall results, and still other circumstances in which one is positively forbidden to do so. Classical utilitarianism is the most familiar consequentialist view, but it is widely regarded as an inadequate account of morality. Although Professor Scheffler agrees with this assessment, he also believes that consequentialism seems initially plausible, and that there is a persistent air of paradox surrounding typical deontological views. In this book, therefore, he undertakes to reconsider the rejection of consequentialism. He argues that it is possible to provide a rationale for the view that agents need not always produce the best possible overall outcomes, and this motivates one departure from consequentialism; but he shows that it is surprisingly difficult to provide a satisfactory rationale for the view that there are times when agents must not produce the best possible overall outcomes. He goes on to argue for a hitherto neglected type of moral conception, according to which agents are always permitted, but not always required, to produce the best outcomes.

Poems by Chaucer, Shakespeare, Wordsworth, Dickinson, Hughes, Plath, and others are accompanied by biographical sketches and commentary

Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel Quinoa is an invaluable crop, highlighted by the Food and Agriculture Organization of the United Nations (FAO) as one of the world's main crops for future food security. The first comprehensive review of quinoa, this book includes four sections covering the history of the crop, phylogeny and systematics, botany and agrotechnology, and the qualitative aspects, economics and marketing of quinoa, making it a vital resource for students and researchers of crop science.

Serious, Moving, Funny And Ironic By Turns, These Stories Are Replete With The Perceptions Of A Man Who Has Viewed The World With Equanimity And Compassion.

Precision agriculture (PA) and its suite of information technologies-such as soil and yield mapping using a global positioning system (GPS), GPS tractor guidance systems, and variable-rate input application-allow farm operators to fine-tune their production practices. Access to detailed, within-field information can decrease input costs and increase yields. USDA's Agricultural Resource Management Survey shows that these PA technologies were used on roughly 30 to 50 percent of U.S. corn and soybean acres in 2010-12. Previous studies suggest that use of PA is associated with higher profits under certain conditions, but aggregate estimates of these gains have not been available. In this report, a treatment-effects model is developed to estimate factors associated with PA technology adoption rates and the impacts of adoption on profits. Labor and machinery used in production and certain farm characteristics, like farm size, are associated with adoption as well as with two profit measures, net returns and operating profits. The impact of these PA technologies on profits for U.S. corn producers is positive, but small. Keywords: Crop production information technologies, precision agriculture, variable-rate technology, soil tests, global positioning system maps, guidance systems.

Anita Lahey's second collection, Spinning Side Kick,is a hard-knuckled look at the other half. These lively poems mix a girl-about-town cockiness with an all-too-rare emotional honesty about men, love, and relationships. Whether the subject is a one-man chimney demolition, the lifelong fidelity of seahorses, a lover at war in Afghanistan or a kickboxing match, Lahey confronts the enduring disconnect between the sexes in a language that is stangy and quick, punctuated with jabs. She eyes those moments—in a day, in a life—when the normal clues we rely on disappear, shifting the line between domesticity and danger. In Spinning Side Kick, a talented poet returns with sharper aim.

Get Rolling on Your Most Inventive Artwork Ever! What lurks in the shadows of your imagination? This book takes you deep into the dusty corners and dark recesses where your most original ideas lie in wait, showing you how to lure them out into daylight, and shape them into fantastic yet believable concept art. Experimentation is the cornerstone of Fantasy Genesis. A series of dice rolls and corresponding word lists present you with an infinite variety of jumping-off points and visual problems to solve. The challenge (and the fun) is to meld seemingly unrelated and everyday elements such as a caterpillar, seashells, fire or a hammer into exceptionally curious, grotesque, oddly beautiful and totally unexpected creations. • 40+ step-by-step mini-demonstrations illustrate basic techniques for drawing a wide range of fantasy elements and forms • 3 game variations (complete with game sheets) lead you to create fiercely imaginative objects, creatures and humanoids • 3 full-length demonstrations show how to play the game from your first rolls of the die to finished concept drawings Use this art-game as a warm-up, a bulldozer for creative-block or a daily sketching exercise to generate a stockpile of inspired beasts, heroes, costumes, weapons and other never-before-dreamt creations. It all starts with a roll, a word and your imagination.

Joel, aka 'The Rink' (because his bald patch is shiny enough to skate on), the unpopular owner of the only bar in town has been murdered. There are so many suspects, it's not so much a question of who didkill him as who didn't. There's Magalie, the temperamental teenager obsessed with Paris Hilton; her troublemaker boyfriend, Tani; Tani's mother, Madame Levi; her unemployed, daytime-TV addicted husband; Yeznig, their younger son, who has learning difficulties but perfect memory recall; and newcomers Ali and Nadia, the Muslim twins struggling to fit in. As the tension mounts and we're still none the wiser, the ending is as tragic as it is unexpected.

Starting with a 10-day meal plan for those wishing to try out the macrobiotic diet, this title explains each meal in terms of its health benefits. With over 100 recipes, an appendix explaining the basic principles of macrobiotics, and a glossary of ingredients, it offers an introduction to an ancient diet. Mayumi Nishimura, one of Japan's best-kept secrets, has worked as Madonna's macrobiotic chef since 2001. In 'Mayumi's Kitchen', her first book in English, she shares her repertoire of healthy, delicious recipes, starting with a 10-day meal plan for

Jail has its good sides, too (like you never eat alone). These are the cook's highly philosophical views, though in his job he has lost his touch lately he only sets off riots twice a year. So help yourselves to a new serving of Arkas. It contains the Lifer's epic struggle with his woes. No need to ask who's winning...

Heroes are hard to find, especially for Sean, who, at fifteen years old, has never had it easy. He's estranged from his father and abused by his mother—Sean feels he has nowhere to turn. Suspended from school and with a mounting police record, he is one step away from serious trouble. Sentenced to community service for violating curfew, Sean is sent to Mr. Hassler's farm, where he's forced to confront his fears and take charge of his own life. When Sean is faced with a dangerous situation that tests his true character, he learns just what it means to be a hero. In an age where it seems that few truly worthy heroes exist, S. L. Rottman has written a compelling and realistic portrayal of the conflicts that drive a young man toward his destiny.

Nina Raine's Tiger Country is a hospital play that follows a tangle of doctors and nurses in a busy London hospital - from the award-winning author of Tribes. Professionalism and prejudice, turbulent staff romances, ambition and failure collide in this swirling, action-packed drama about an overburdened health service that we all depend on and the dedicated individuals that keep it going. 'Tiger country' is where animal instinct stirs and an irrefutable eye opens. Where we make eye contact with the unknown. Tiger Country was premiered at Hampstead Theatre in 2011 and, following its sell-out run, was revived there in 2014.

In a fledgling community, on a hilltop near a Palestinian village, Gabi Kupper's life is disrupted when his brother Roni arrives from America penniless.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier—forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

The LCS is a relatively inexpensive Navy surface combatant equipped with modular (plug-and-fight) mission packages. The basic version of the LCS, without any mission packages, is referred to as the LCS sea frame. The Navy wants to field a force of 55 LCSs. Contents of this report: (1) Intro.; (2) Background: The LCS in General; Two Industry Teams, Each with Its Own Design; Planned Procurement Quantities; (3) Issues for Congress: New Acquisition Strategy Announced in 9/09; Unit Procurement Cost Cap; Total Program Acquisition Cost; (4) Legislative Activity for FY 2011. Appendices: Cost Growth on LCS Sea Frames; LCS Acquisition Strategy Announced in 9/09. Charts and tables. This is a print on demand publication.

Climate change effects over the next 25 years will be mixed. Continued changes by mid-century and beyond, however, are expected to have generally detrimental effects on most crops and livestock. As temperatures increase, crop production areas may shift to follow the temperature range for optimal growth and yield, though production in any given location will be more influenced by available soil water during the growing season. Weed control costs total more than \$11 billion a year in the U.S.; those costs are expected to rise with increasing temperatures and carbon dioxide concentrations. Changing climate will also influence livestock production. Heat stress for any specific type of livestock can damage performance, production, and fertility, limiting the production of meat, milk, or eggs. Changes in forage type and nutrient content will likely influence grazing management needs. Insect and disease prevalence are expected to increase under warmer and more humid conditions, diminishing animal health and productivity.

"...of a coldly moving..." Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

Consulting for Phds, Lawyers, and Doctors

Neldoralin, The land of Elves, Dwarves, Orcs, Humans, Horse Lords and Knights holds the key to Rose's past and to her future. A chance encounter with a dying sailor yields a letter and a key, propelling Rose to discover the mystery behind her heritage. Follow Rose on her fantastical journey fraught with danger and intrigue as she rushes headlong toward her destiny. "A Key of Hope" is Amanda Redhead's exciting introduction to the land of Nelderailin, where many fantastic tales yearn to be told.

At the moment when Mabel wins Waddles the pig at the Mystery Fair, Dipper ruins his chance to impress Wendy. But when Dipper finds a way to travel back in time and changes his fate with Wendy, Mabel's fate also changes—for the worse. Will Dipper and Mabel tweak time so they both leave the fair a winner? Will Mabel ever share a slice of pizza with her beloved Waddles again? Then, when a prehistoric creature snatches up Waddles, it's up to the Gravity Falls gang to save him! Readers will love this chapter book filled with black-and-white art from the show.

A story about how the very messy French philosopher, René Descartes, invented an ingenious way to keep track of his possessions.

One of the greatest pleasures of having a garden is to be able to observe and identify the great number of animal species which may feed, bathe and reside there, or simply fly over or pass through. This book combines full identification and behavioural features of over 250 common species, including birds, mammals, amphibians, wasps and bees, beetles and spiders, insects and invertebrates. Stunningly illustrated, yet simple to use, "The Complete Garden Wildlife Book" will ensure that you get the maximum pleasure from your garden whatever its size or location.

The Top 500 Poems

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll nsk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

Having safe drinking water is important to all Americans. The Environmental Protection Agency's decision in the summer of 2001 to delay implementing a new, more stringent standard for the maximum allowable level for arsenic in drinking water generated a great deal of criticism and controversy. Ultimately at issue were newer data on arsenic beyond those that had been examined in a 1999 National Research Council report. EPA asked the National Research Council for an evaluation of the new data available. The committee's analyses and conclusions are presented in Arsenic in Drinking Water: 2001 Update. New epidemiological studies are critically evaluated, as are new experimental data that provide information on how and at what level arsenic in drinking water can lead to cancer. The report's findings are consistent with those of the 1999 report that found high risks of cancer at the previous federal standard of 50 parts per billion. In fact, the new report concludes that men and women who consume water containing 3 parts per billion of arsenic daily have about a 1 in 1,000 increased risk of developing bladder or lung cancer during their lifetime.

Developers who want to access USB devices from their embedded systems will find a helpful resource in USB Embedded Hosts: The Developer's Guide. This new book from the author of USB Complete shows how small systems can take advantage of the same wealth of USB devices available to conventional PCs. The book begins with a review of USB host communication protocols. Readers then learn which USB host requirements are relaxed for embedded systems and what new requirements some embedded systems must meet. To help in selecting a development platform, the book explores available hardware and software for USB host communications in small systems. The heart of the book focuses on communicating with USB devices. The topics (with example code) include USB drives, keyboards, virtual serial ports, network bridges, mics, speakers, video cameras, and printers, plus devices that don't fit defined USB classes. Also discussed are systems that support both USB host and device functions. The example code is written for the BeagleBoard-xM open development board using a distribution of Linux targeted to small systems. Also covered is how to use Linux commands and utilities to learn about, monitor, and debug communications with USB devices.

In the past 10 years hirsutism has become the object of a considerable number of fundamental studies. It provides endocrinologists with an experimental model for the investigation of androgen secretion, metabolism and mechanism of action. Plasma androgen assay, free testosterone measurement, hepatic and extrahepatic androgen metabolic clearance and androgen metabolism in the skin are the different steps which were studied by many groups and represent valuable parameters of the mechanisms of hirsutism. Determination of the origin of androgen oversecretion has become easier by technical progress in differential effluent venous catheterism, which makes it possible to compare androgens in adrenal or ovarian effluent veins to their peripheral levels, and to determine the ovarian or adrenal source of the androgen oversecretion as well as the side responsible, essential in the case of tumors. The study of androgen metabolism and the discovery of androgen receptors in the skin confirm the latter as an actual target cell for androgens. This target cell uses the circulating active androgen, i. e., testosterone and can also metabolize local inactive androgens into active ones. This is the case of androstenedione and dehy droepiandrosterone which are the two main androgens secreted in women, since women secrete very little testosterone. The capacity of the skin to transform inactive androgens into active ones varies from one individual to another. That would support the concept of variable skin receptivity from one woman to another and from one ethnic group to another.

Amnesty International Report 2008

Conservation Agriculture

A Key of Hope

This annual report documents human rights abuses by governments and armed opposition groups in 150 countries across the world. It provides an invaluable reference guide to international human rights developments.

The book covers the spread of conservation agriculture (CA) to regions including Brazil, Argentina, Canada, Australia, Europe and emerging CA destinations in Asia and Africa. yTopics covered include the various components of CA, and how their individual and combined implementation influence productivity, soil health and environmental quality under diverse edaphic and climatic conditions. The book will be useful to teachers, researchers, extensionists, farmers, and students interested in environmental quality.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser's philosophy. The growing importance of Althusser's philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called 'Ideological State Apparatuses', law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser's ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.
