Danger isn't Zoey's middle name. But it is something she can't forget, something she's reminded of every time she looks in the mirror. For those reasons, Zoey has become an expert at creating the perfect illusion. Her ability to fool the eye, to create truth where there was previously none makes her the best in the business. Working as a makeup and special effects artist for Hollywood combines her two life must-haves: her passion for makeup and hiding in plain sight. It also doesn't hurt that she's safe within the heavily secured and secret studio sets, away from the public eye. Then her perfect job becomes her perfect nightmare. Not only does her illusion slip with the blast of icy water, but it does so in front of the country's biggest action hero and the gossippiest of celebrity TV shows. At first, Zoey thinks danger hasn't caught up to her and the worst thing about her mishap is the world's most perfect man sees her in all her not-so-perfect glory. Until a series of unexplained "accidents" begins on set. That's when Zoey knows. Danger has caught up to her... and this time she fears death has, too. It started as playful, if barbed, banter before rising to a fateful wager with a most notorious rake—the Captain of the Guard, Jalal al-Khoury—who may have finally met his match in a lovely, if haughty, handmaiden, Despina. But she, too, seems to have met her match in the handsome Jalal. What begins as a tempestuous battle of will and wit in short order becomes a passionate affair spurred on by tragedy of the worst kind.

"[This] is a book of great richness, beauty and power and thus very difficult to do justice to in a brief review...The violence is sometimes unbearable, the language rarely less than superb. Dillard's description of the moth's death makes Virginia Woolf's go dim and Edwardian. Nature seen so clear and hard that the eyes tear...A rare and precious book." —Frederick Buechner, New York Times Book Review From Pulitzer Prize-winning Annie Dillard, a book about the grace, beauty, and terror of the natural world. In the mid 1970s, Annie Dillard spent two years on an island in Puget Sound in a room with a solitary window, a cat, and a spider for company, asking herself questions about memory, time, sacrifice, reality, death, and God. Holy the Firm, the diary-like collection of her thoughts, feelings, and ruminations during this time, is a lyrical gift to any reader who have ever wondered how best to live with grace and wonder in the natural world.

Four, Ever, and the rest of the Blackwood Keep crew are back in this second installment! THE FLAME Here lies Louchana Valentine. She was a homeless, orphaned virgin. I never cared what my gravestone would say until I landed in deep with a powerful gangster. Lucky for me, my best friend happens to be ruthless too. I should feel guilty that he's forced to turn on the man who's been a father to him. Except I've always known that Wren's soul wasn't as black as he claimed. He was good. He was beautiful. He was mine. He just didn't know it yet. And with Wren keeping me safe, I've got time left to rewrite the end of my story. But if he has his way, virgin is already carved in stone. THE MOTH I've never known anyone as alluring as Lou. Or as frustrating. Since the night she saved my life and stole my wallet for her troubles, I couldn't stay away. She became my onus. My light. My...anyway. With nowhere to run, I'm forced to trust someone I never expected. At least with Lou safe in Blackwood Keep--far away from me--I'll die with my conscience intact. Because she no longer looks at me with friendship in her eyes. Those iridescent blues shine with a different need entirely, and I've never been able to deny her. Alternate Cover Edition. The Moth and the Flame is an interconnected standalone and book two of the When Rivals Play series. It's recommended you start with The Peer and the Puppet. Content suitable for ages 18+.

After the international success of his collection of World War II newspaper articles, *German Autumn*—a book that solidified his status as the most promising and exciting writer in Sweden—Stig Dagerman was sent to France with an assignment to produce more in this journalistic style. But he could not write the much-awaited follow-up. Instead, he holed up in a small French village and in the summer of 1948 created what would be his most personal, poignant, and shocking novel: *A Burnt Child*. Set in a working-class neighborhood in Stockholm, the story revolves around a young man named Bengt who falls into deep, private turmoil with the unexpected death of his mother. As he struggles to cope with her loss, his despair slowly transforms to rage when he discovers his father had a mistress. But as Bengt swears revenge on behalf of his mother's memory, he also finds himself drawn into a fevered and conflicted relationship with this woman—a turn that causes him to question his previous faith in morality, virtue, and fidelity. Written in a taut and beautifully naturalistic tone, Dagerman illuminates the rich atmospheres of Bengt's life, both internal and eternal: from his heartache and fury to the moody streets of Stockholm and the Hitchcockian shadows of tension and threat in the woods and waters of Sweden's remote islands. *A Burnt Child* remains Dagerman's most widely read novel, both in Sweden and worldwide, and is one of the crowning works of his short but celebrated career.

Unlike their gaudy day-flying cousins, moths seem to reside in the shadows as denizens of the night, circling around streetlights or caught momentarily in the glare of headlights on a country lane. As Matthew Gandy demonstrates in this book, however, there are many more species of day-flying moths than there are butterflies, and many rival butterflies in a dazzling range of markings. Gandy shows that the study of moths formed an integral part of early natural history. Many thousands of drawings, paintings, and physical specimens remain in museum collections, and in recent years there has been a renewed surge of interest facilitated by advances in digital photography, the internet, and new cartographic projects that have enabled direct collaboration between amateur experts and scientific research projects. He explores the rich history of vernacular names, which speaks to a significant place for moths in early cultures of nature. Names such as the Merveille-du-Jour, the Green Brindled Crescent, or the Clifden Nonpareil evoke a sense of wonder that connects disparate fields such as folklore, the history of place, and early scientific texts. With wingspans ranging in size from a few millimetres to nearly a foot, moths display an extraordinary diversity of evolutionary adaptations, which Gandy captures here.

"For two decades now I've been awaiting a book explaining computers and their social consequences to literate readers without using any unnecessary jargon or pedantry--or math. I wanted such a book to lend to all those friends who've pestered me about computers and to all the computer science students who've asked me about computers over the years. I particularly wanted a book that I could buy for my father, who's an accountant of the old school, to explain something of the mysterious world I live in." Gregory Rawlins, who teaches artificial intelligence at Indiana University, got tired of waiting for that book and decided to write it himself. In *Moths to the Flame* he takes us on a humorous yet thought-provoking tour of the world wrought by modern technology, a technology, he points out, that is rooted deep inside the military: a technology that when applied to everyday life, may have startling results. Unlike space technology, today's technological race won't simply bring us Tang-flavored Velcro. Rawlins educates by entertaining. His stories and anecdotes enliven and surprise us while increasing our awareness of technology itself as a player in the political and commercial climate of our times. In our headlong rush toward networked humanity Rawlins raises serious concerns about our future jobs and our future wars: we can figure out what kind of job to get today if we know where technology is taking us tomorrow. The book's first four chapters explore the worlds of privacy, virtual reality, publishing, and computer networks, while the last four focus on social issues such as warfare, jobs, computer catastrophes, and the future itself. Throughout unusual, eye-opening analogies and historical comparisons--from Egyptian hieroglyphics to the sewing machine to the codebreakers of World War II--give us a context for the computer age, showing how new technologies have always bred intertwined hope and resistance. Provocative yet balanced and sophisticated, *Moths to the Flame* is an indispensable guidebook to the future: a Baedeker for the Brave New World. A Bradford Book

extraordinary true story about one man's attempt to salve the wounds of war and save his own soul through an audacious adventure. In the 1930s, as official government expeditions set their sights on conquering Mount Everest, a little-known World War I veteran named Maurice Wilson conceives his own crazy, beautiful plan: he will fly a plane from England to Everest, crash-land on its lower slopes, then become the first person to reach its summit—completely alone. Wilson doesn't know how to climb. He barely knows how to fly. But he has the right plane, the right equipment, and a deep yearning to achieve his goal. In 1933, he takes off from London in a Gipsy Moth biplane with his course set for the highest mountain on earth. Wilson's eleven-month journey to Everest is wild: full of twists, turns, and daring. Eventually, in disguise, he sneaks into Tibet. His icy ordeal is just beginning. Wilson is one of the Great War's heroes, but also one of its victims. His hometown of Bradford in northern England is ripped apart by the fighting. So is his family. He barely survives the war himself. Wilson returns from the conflict unable to cope with the sadness that engulfs him. He begins a years-long trek around the world, burning through marriages and relationships, leaving damaged lives in his wake. When he finally returns to England, nearly a decade after he first left, he finds himself falling in love once more—this time with his best friend's wife—before depression overcomes him again. He emerges from his funk with a crystalline ambition. He wants to be the first person to stand on top of the world. Wilson believes that Everest can redeem him. This is the "rollicking" (The Economist) tale of an adventure unlike any you have ever encountered: complex, driven, wry, haunted, and fully alive. He is a man written out of the history books—dismissed as an eccentric and gossiped about because of rumors of his transvestism. The Moth and the Mountain rescues Maurice Wilson to his rightful place in the annals of Everest and tells an unforgettable story about the power of the human face of adversity.
