Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

The Geologic Story of the Southern Appalachian Mountains

The only thing you'll find on the summit of Mount Everest is a divine view. The things that really matter lie far below. - Peak Marcello After fourteen-year-old Peak Marcello is arrested for

scaling a New York City skyscraper, he's left with two choices: wither away in Juvenile Detention or go live with his long-lost father, who runs a climbing company in Thailand. But Peak quickly learns that his father's renewed interest in him has strings attached. Big strings. As owner of Peak Expeditions, he wants his son to be the youngest person to reach the Everest summit--and his motives are selfish at best. Even so, for a climbing addict like Peak, tackling Everest is the challenge of a lifetime. But it's also one that could cost him his life. Roland Smith has created an action-packed adventure about friendship, sacrifice, family, and the drive to take on Everest, despite the incredible risk. The story of Peak's dangerous ascent--told in his own words--is suspenseful, immediate, and impossible to put down.

To the Diamond Mountains

This compelling and engaging book takes readers on a unique journey through China and North and South Korea. Tessa Morris-Suzuki travels from Harbin in the north to Busan in the south, and on to the mysterious Diamond Mountains, which lie at the heart of the Korean Peninsula's crisis. As she follows in the footsteps of a remarkable writer, artist, and feminist who traced the route a century ago—in the year when Korea became a Japanese colony—her saga reveals an unseen face of China and the two Koreas: a world of monks, missionaries, and smugglers; of royal tombs and socialist mausoleums; a world where today's ideological confrontations are infused with myth and memory. Northeast Asia is poised at a moment of profound change as the rise of China is transforming the global order and tensions run high on the Korean Peninsula, the last Cold War divide. Probing the deep past of this region, *To the Diamond Mountains* offers a new and unexpected perspective on its present and future.

THE CHANGING EARTH: EXPLORING GEOLOGY AND EVOLUTION, Seventh Edition, is a member of a rare breed of texts written specifically for courses covering both physical and historical geology. Three interrelated themes (plate tectonics, organic evolution, and geologic time) help students understand that Earth is a complex, integrated, and continually changing system. In the new edition authors James S. Monroe and Reed Wicander integrate new content emphasizing the economic impacts of geology. Topics such as fracking, nuclear waste, and the threat of earthquakes are covered in new Geo-Impact boxes that stress real-world applications. Lauded for their clear writing style, the authors go beyond simply explaining geology and its processes; rather, they place that knowledge within the context of human experience by consistently emphasizing relevance, resources, and the environment. New Global Geoscience Watch activities help students learn how to use an extensive database of articles on geology that are updated several times a day and are available exclusively for users of this book.
