“Operating across international markets is a highly turbulent affair that imposes real challenges on corporate risk management capabilities. The multinational corporation is exposed to many diverse risks and exogenous influences beyond managerial control but also attain new strategic opportunities. The exposures range from price volatilities, changing macroeconomic conditions, and operational disruptions to technological innovations, competitive moves, and socio-political events. Strategic risk management can reduce the adverse effects from these exposures but may also furnish gains from new opportunities. This book relates to the need for effective strategic risk management practices that facilitate the ability to monitor essential exposures and respond appropriately to changing environmental conditions. ”

Examines the new challenges facing Africa's pastoral drylands from large-scale investments and how this might affect the economic and political landscape for the regions affected and their peoples.

Principles and Practice, Third Edition

Finally a book that combines the fresh, exuberant flavors of great Italian food with the ease and comfort of a slow cooker. Michele Scicolone, a best-selling author and an authority on Italian cooking, shows how good ingredients and simple techniques can lift the usual “crockpot” fare into the dimension of fine food. Pasta with Meat and Mushroom Ragu, Osso Buco with Red Wine, Chicken with Peppers and Mushrooms: These are dishes that even the most discriminating cook can proudly serve to company, yet all are so carefree that anyone with just five or ten minutes of prep time can make them on a weekday and return to perfection. Simmered in the slow cooker, soups, stews, beans, grains, pasta sauces, and fish are as healthy as they are delicious. Polenta and risotto, “stir-crazy” dishes that ordinarily need careful timing, are effortless. Meat loaves come out perfectly moist, tough cuts of meat turn succulent, and cheesecakes emerge flawless.

The two-part, fifth edition of Advanced Organic Chemistry has been substantially revised and reorganized for greater clarity. The material has been updated to reflect advances in the field since the previous edition, especially in computational chemistry. Part A covers fundamental structural topics and basic mechanistic types. It can stand-alone; together, with Part B: Reaction and Synthesis, the two volumes provide a comprehensive foundation for the study in organic chemistry. Companion websites provide digital models for study of structure, reaction and selectivity for students and exercise solutions for instructors.

In Pop Music and Hip Ennuï: A Sonic Fiction of Capitalist Realism, Macon Holt provides the imaginative and analytical resources to think with contemporary pop music to investigate the ambivalences of contemporary culture and the potentials in it for change. Drawing on Kodwo Eshun’s practice of Sonic Fiction and Mark Fisher’s analytical framework of capitalist realism, Holt explores the multiplicities contained in contemporary pop from sensation to abstraction and from the personal to the political. Pop Music and Hip Ennuï unravels the assumptions embedded in the cultural and critical analysis of popular music. In doing so, it provides new ways to understand the experience of listening to pop music and living in the sonic atmosphere it produces. This book neither excuses pop’s oppressive tendencies nor dismisses the pleasures of its sensations.

In this illustrated and easy-to-use guide, noted pediatrician Dr. Alan Greene, a leading voice of the green baby movement, advises parents how to make healthy green choices for pregnancy, childbirth, and baby care—from feeding your baby the best food available to using medicines wisely. Consumer advocate Jeanette Pavini includes information for making smart choices and applying green principles to a whole new universe of products from zero-VOC paints for the nursery, to pure and gentle lotions for baby’s delicate skin, to the eco-friendly diapers now in the marketplace, as well as specific recommendations for hundreds of other products.

Large-scale displacement - whether caused by war, state-related political or development projects, different forms of political violence, structural crisis, or even natural disasters - evokes many stereotyped assumptions about those forcibly displaced or emplaced. At the same time there is a problematic lack of attention paid to the diversity of actors, strategies and practices that reshape the world in the face (and chronic aftermath) of dramatic moments of violent dislocation. In this highly original volume, based on empirical case studies from across sub-Saharan Africa, the authors reveal the paradoxical effects, both intended and unexpected, that displacement produces, and that manifest themselves in displacement economies. An important contribution to a topic of growing scholarly and policy interest.

An analysis of how discrimination against women is reflected by the attitudes of the nation's premier golf club reveals how it is led by men who appear to support equality in their workplaces but conduct private campaigns of ostracism within the club, arguing that the club's no-women stance perpetuates systems of gender discrimination. 40,000 first printing.

Kenya supplies more than 35 percent of the fresh-cut roses and other flowers sold annually in the European Union. This industry—which employs at least 90,000 workers, most of whom are women—is lucrative but enduringly controversial. More than half the flowers are grown near the shores of Lake

Naivasha, a freshwater lake northwest of Nairobi recognized as a Ramsar site, a wetland of international importance. Critics decry the environmental side effects of floriculture, and human rights activists demand better wages and living conditions for workers. In this rich portrait of Kenyan floriculture, Megan Styles presents the point of view of local workers and investigates how the industry shapes Kenyan livelihoods, landscapes, and politics. She investigates the experiences and perspectives of low-wage farmworkers and the more elite actors whose lives revolve around floriculture, including farm managers and owners, Kenyan officials, and the human rights and environmental activists advocating for reform. By exploring these perspectives together, Styles reveals the complex and contradictory ways that rose farming shapes contemporary Kenya. She also shows how the rose industry connects Kenya to the world, and how Kenyan actors perceive these connections. As a key space of encounter, Lake Naivasha is a synergistic center where many actors seek to solve broader Kenyan social and environmental problems using the global flows of people, information, and money generated by floriculture.

The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century. Sound artworks today embody the contemporary and transcultural trends towards the post-apocalyptic, a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound. Within the areas of musicology, art history, and, later, sound studies, Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis. Summoning artists, researchers, curators, and critics, this volume takes note of and reflects the most recent shifts and drifts in Sound Art--rooted in sonic histories and implying future trajectories.

Widely regarded as a standard work in its field, this book introduces the range of processing techniques that are used in food manufacturing. It explains the principles of each process, the processing equipment used, operating conditions and the effects of processing on micro-organisms that contaminate foods, the biochemical properties of foods and their sensory and nutritional qualities. The book begins with an overview of important basic concepts. It describes unit operations that take place at ambient temperature or involve minimum heating of foods. Subsequent chapters examine operations that heat foods to preserve them or alter their eating quality, and explore operations that remove heat from foods to extend their shelf life with minimal changes in nutritional quality or sensory characteristics. Finally, the book reviews post-processing operations, including packaging and distribution logistics. The third edition has been substantially rewritten, updated and extended to include the many developments in food technology that have taken place since the second edition was published in 2000. Nearly all unit operations have undergone significant developments, and these are reflected in the large amount of additional material in each chapter. In particular, advances in microprocessor control of equipment, 'minimal' processing technologies, genetic modification of foods, functional foods, developments in 'active' or 'intelligent' packaging, and storage and distribution logistics are described. Developments in technologies that relate to cost savings, environmental improvement or enhanced product quality are highlighted. Additionally, sections in each chapter on the impact of processing on food-borne micro-organisms are included for the first time.

“Has there ever been a better reason to shop?” asks an ad for the Product RED American Express card, telling members who use the card that buying “cappuccinos or cashmere” will help to fight AIDS in Africa. Cofounded in 2006 by the rock star Bono, Product RED has been a particularly successful example of a new trend in celebrity-driven international aid and development, one explicitly linked to commerce, not philanthropy.

In Brand Aid, Lisa Ann Richey and Stefano Ponte offer a deeply informed and stinging critique of “compassionate consumption.” Campaigns like Product RED and its precursors, such as Lance Armstrong’s Livestrong and the pink-ribbon project in support of breast cancer research, advance the expansion of consumption far more than they meet the needs of the people they ostensibly serve. At the same time, such campaigns sell both the suffering of Africans with AIDS (in the case of Product RED) and the power of the average consumer to ameliorate it through familiar and highly effective media representations. Using Product RED as its focal point, this book explores how corporations like American Express, Armani, Gap, and Hallmark promote compassionate consumption to improve their ethical profile and value without significantly altering their business model, protecting themselves from the threat to their bottom lines posed by a genuinely engaged consumer activism. Coupled with the phenomenon of celebrity activism and expertise as embodied by Bono, Richey and Ponte argue that this “causerism” represents a deeply troubling shift in relief efforts, effectively delinking the relationship between capitalist production and global poverty.

This book focuses on the multifarious aspects of ‘fuzzy boundaries’ in the field of discourse studies, a field that is marked by complex boundary work and a great degree of fuzziness regarding theoretical frameworks, methodologies, and the use of linguistic categories. Discourse studies is characterised by a variety of theoretical frameworks and disciplinary fields, research methodologies, and lexico-grammatical categories. The contributions in this book explore some of the nuances and implications of the fuzzy boundaries in these areas, resulting in a wide-reaching volume which will be of interest to students and scholars of discourse studies in fields including sociology, linguistics, international relations, philosophy, literary criticism and anthropology.

The adoption of pro-market economic reforms by emerging market economies in last two decades has transformed the institutional context for firms in these economies. The objective of this volume is to better understand how domestic and foreign firms have transformed their strategy, organization and management system in response to this change.

The Bloomsbury Handbook of the Anthropology of Sound presents the key subjects and approaches of anthropological research into sound cultures. What are the common characteristics as well as the inconsistencies of living with and around sound in everyday life? This question drives research in this interdisciplinary area of sound studies: it propels each main chapter of this handbook into a thoroughly different world of listening, experiencing, receiving, sensing, dreaming, naming, desiring, and crafting sound. This handbook is composed of six sections: sonic artifacts; sounds and the body; habitat and sound; sonic desires; sounds and machines; and overarching sensologies. The individual chapters explore exemplary research objects and put them in the context of methodological approaches, historical predecessors, research practices, and contemporary research gaps. This volume offers therefore one of the broadest, most detailed, and instructive overviews on current research in this area of sensory anthropology.

The explosive demand for mobile communications is driving the development of wireless technology at an unprecedented pace. Unfortunately, this exceptional growth is also giving rise to a myriad of security issues at all levels-from subscriber to network operator to service provider. Providing technicians and designers with a critical and comprehens

"In Good Bounces and Bad Lies, Wright brings the reader into the world of professional golf - and professional golf broadcasting - depicting in equal measure the game's grace and tradition as well as its often raucous behind-the-scenes character. Wright tells of the ups and downs of his expansive career, relating dozens of funny and outrageous anecdotes along the way. Having known such greats as Ben Hogan, Arnold Palmer, Jack Nicklaus, Steve Ballesteros, Tom Watson, and many other prominent figures in the world of golf, Wright gives the true insider's perspective."--BOOK JACKET.

South African rooibos tea is a commodity of contrasts. Renowned for its healing properties, the rooibos plant grows in a region defined by the violence of poverty, dispossession, and racism. And while rooibos is hailed as an ecologically indigenous commodity, it is farmed by people who struggle to express “authentic” belonging to the land: Afrikaners, who espouse a “white” African indigeneity, and “coloureds,” who are characterized either as the mixed-race progeny of “extinct” Bushmen or as possessing a false identity, indigenous to nowhere. In Steeped in Heritage Sarah Ives explores how these groups advance alternate claims of indigeneity based on the cultural ownership of an indigenous plant. This heritage-based struggle over rooibos shows how communities negotiate landscapes marked by racial dispossession within an ecosystem imperiled by climate change and precarious social relations in the postapartheid era.

The increased presence of Somalis has brought much change to East African towns and cities in recent decades, change that has met with ambivalence and suspicion, especially within Kenya. This volume demystifies Somali residence and mobility in urban East Africa, showing its historical depth, and exploring the social, cultural and political underpinnings of Somali-led urban transformation. In so doing, it offers a vivid case study of the transformative power of (forced) migration on urban centres, and the intertwining of urbanity and mobility. The volume will be of interest for readers working in the broader field of migration, as well as anthropology and urban studies.

This book addresses the status quo of Corporate Social Responsibility practices and their development since 2008. How have things changed in the practice of CSR? What new opportunities and challenges have arisen? The book reports on an international set of cases and case studies on how CSR is practiced at business and organizations in various countries. It analyzes country-specific and industry-specific issues, as well as general global issues in connection with the United Nations’ Sustainable Development Goals. The contributions gathered here provide comprehensive information on CSR for both practitioners and researchers around the globe.

Economic growth and increasing population impose long-term risks to the environment and society. Approaches to address the impact of consumption and production on bio-diversity loss, resource availability, climate change, and mounting waste problems on land and in seas have yet not proven to be successful. This calls for innovative approaches to address the complex environmental, social, and economic interrelationships that have to be addressed in transforming to sustainable development. Sustainable Consumption and Production, Volume I: Challenges and Development aims to explore critical global challenges and addresses how consumers, producers, the private sector, international organizations, and governments can play an active role in innovating businesses to support a transitioning towards sustainable consumption and production. The book explores different approaches and innovations to address sustainable consumption and production. It details multiple social and economic contexts to the challenges and developments towards a sustainable consumption and production. The book is of interest to economists, students, businesses, and policymakers. Chapter 14 and chapter 15 are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

\* Annual guide to educational institutions and business centers offering executive and management education worldwide \* Relevant for executives seeking international business education exposure \* Index of specialties ranging accounting, strategy planning, and change management, through conflict management, corporate finance and strategy, to global management, leadership, logistics, project management, and recruitment and team building listing which schools offer them This is the only genuinely international directory to senior management education. There are clearly a large number of US directories to North American MBA courses, and other countries produce similar publications. However, information on shorter courses as covered by this Guide are rare. Now in its seventh edition, this directory to worldwide courses for middle and senior management has been extensively revised, and is linked to a dedicated website. The directory is backed up by a series of articles from leading business schools, management academics, and executives from leading companies. These articles focus on different aspects and approaches to executive education, pr

This undergraduate textbook adopts the perspective of organizations - not individuals - and clarifies the impact of social media on their different departments or disciplines, while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach, embracing IT, marketing, HR and many other fields. Readers will benefit from a comprehensive selection of current topics, including: tools, tactics and strategies for social media, internal and external communication, viral marketing campaigns, social CRM, employer branding, e-recruiting, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues. Amartya Sen and Martha Nussbaum have made major contributions to development studies and social philosophy, yet sustainability issues have largely remained outside their domain despite sustainability 's significance and complex relation to their central value of freedom. This volume explores sustainability from a capabilities perspective, with the motif of human security, inviting a lively discussion within the human development family. After introducing the two approaches, authors conceptualize relationships between capabilities and the environment, examine the scientific and normative validity of environmental indicators and analyse intergenerational justice. Climate change is used to exemplify that a human security approach can add an explanatory ontology to the ethical criticisms of contemporary ways of life that champion consumerism. That ontology recognizes shared life experiences, problems and life challenges - a community of fate. The volume ends with a discussion of how the approaches can inform and sometimes critique the Sustainable Development Goals.

**At the interface between culture and tourism lies a series of deep and challenging issues relating to how we deal with issues of political engagement, social justice, economic change, belonging, identity and meaning. This book introduces researchers, students and practitioners to a range of interesting and complex debates regarding the political and social implications of cultural tourism in a changing world. Concise and thematic theoretical sections provide the framework for a range of case studies, which contextualise and exemplify the issues raised. The book focuses on both traditional and popular culture, and explores some of the tensions between cultural preservation and social transformation. The book is divided into thematic sections - Politics and Policy; Community Participation and Empowerment; Authenticity and Commodification; and Interpretation and Representation - and will be of interest to all who wish to understand how cultural tourism continues to evolve as a focal point for understanding a changing world.**

**This wide-ranging book examines the new dynamics of corporate social responsibility (CSR) and the impact they have had on the transformation of business corporations. Written by an international group of distinguished experts in management and organization studies, economics and sociology, the book leads one to theoretically and practically rethink CSR, a movement that has developed into a strong and rich institutional domain since the mid 1990s. Through 14 chapters, the book shows the complexity, diversity and progression of the institutional work performed by a large number of individual and organizational actors in specialized networks to develop this strategic field. Central to this book are: the core issues associated with the field of CSR; recent advances in the development, dissemination and implementation of public and private standards of social responsibility; the pressing challenges of developing sustainable strategies of value creation in the face of global warming and underdevelopment; and finally, examples of how CSR has been implemented and institutionalized within business organizations with special attention to the role played by a variety of social actors in organizational change. Conceived as a movement, corporate social responsibility spearheads a transformation project challenging traditional and outmoded forms of corporate governance that frequently pose troublesome ethical issues. From this standpoint, Corporate Social Responsibility and Corporate Change will serve as a reference point for academics, researchers, managers and practitioners.**

**This lush book of photography represents National Geographic's Photo Ark, a major cross-platform initiative and lifelong project by photographer Joel Sartore to make portraits of the world's animals-especially those that are endangered. His powerful message, conveyed with humor, compassion, and art- to know these animals is to save them.Sartore intends to photograph every animal in captivity in the world. He is circling the globe, visiting zoos and wildlife rescue centers to create studio portraits of 12,000 species, with an emphasis on those facing extinction. He has photographed more than 6,000 already and now, thanks to a multi-year partnership with National Geographic, he may reach his goal. This book showcases his animal portraits- from tiny to mammoth, from the Florida grasshopper sparrow to the greater one-horned rhinoceros. Paired with the eloquent prose of veteran wildlife writer Douglas Chadwick, this book presents a thought-provoking argument for saving all the species of our planet.**

**The Handbook of Sustainable Innovation maps the multiple lineages of research and understanding that constitute academic work on how technological change relates to sustainable practices of production and consumption. Leading academics contribute by mapping the general evolution of this academic field, our understanding of sustainable innovation at the firm, user, and systems level, the governance of sustainable innovation, and the methodological approaches used. The Handbook explores the distinctiveness of sustainable innovation and concludes with suggestions for generating future research avenues that exploit the current diversity of work while seeking increased systemic insight.**

This practical book provides an extremely comprehensive, up-to-date, and easy-to-understand treatment of the entire GSM network and the signaling methods of its terrestrial interfaces. You learn how to analyze network problems, what measurements you have to take to solve them, and where in a scenario you will find the desired information or parameter. The book introduces you to all the interfaces between the GSM subsystems, starting with the Abis- and Air- Interface and continuing on to VLR's, HLR's and MSC's within the Network Switching Subsystem (NSS). You learn about the various signaling standards or methods used in GSM, including TCAP and MAP and how to apply this knowledge when working with GSM networks.
