Intended as the primary text for introductory courses on medical anthropology, this text integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), so the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. In addition to being the only current text that takes a biocultural approach, it provides a state-of-the-science review of selected topics and looks at the potential application of the biocultural anthropological approach to health interventions/prevention. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Creating Effective Learning Environments takes curriculum development to another level: it fills the gap between theory and practice. This text helps readers see the curriculum from a child's perspective and understand how that perspective is linked to learning and theory. It is the author's view that the centre of any curriculum is the child; this text begins not with general theories or applications that are suitable for many, but with each individual child. The theory and methodology of this text are integrated around the actual experiences of children, presented in a logical flow, and embracing current philosophies about integration, play, bias, and learning practices.

In many ways, Arbatel is unique among texts on magic. Unlike the vast majority of writings, it is clear, concise, and elegantly written. The practical instructions are straightforward and undemanding. When it first appeared in 1575, it attracted the attention of people with a surprisingly broad range of agendas, including some of the finest minds of the time. Often quoted and reprinted, both praised and condemned, its impact on western esoteric philosophy has been called "overwhelming." Arbatel's magic is full of wonder and free from the sinister elements usually associated with texts on the subject. But it is about more than magic; filled with gnomic wisdom, it urges us to help our neighbors, be positive and grateful, and use time wisely. Above all, it teaches us to pay attention, looking for the wondrous and miraculous. In fact, to the author this virtually defines the magus. Included are illustrations, bibliography, index, and original Latin text. First English translation published since in 1655.

It's scones and scandal for Indigo Tea Shop owner Theodosia Browning in the latest from the New York Times bestselling author of Steeped in Evil... Normally Theodosia wouldn't attend a black tie affair for all the tea in China. But she can hardly say no to her hunky, handsome boyfriend, Max, who directs public relations for the Gibbes Museum in Charleston. Max has organized an amazing gala opening for an exhibit of a genuine eighteenth century Chinese teahouse, and the crème de la crème of Charleston society is invited. In the exotic garden staged in the museum's rotunda, a Chinese dragon dances to the beat of drums as it weaves through the crowd. The guests are serenaded by a Chinese violin as they sample an assortment of tempting bites. And to give them a memento of the occasion, there's even a photo booth. But Theodosia makes a grim discovery behind the booth's curtains: the body of museum donor Edgar Webster. While Theodosia prefers tea service over the service of justice, this case is difficult to ignore—especially after Max becomes a suspect. Now she must examine the life of the fallen philanthropist and find out who really wanted him to pay up... INCLUDES DELICIOUS RECIPES AND TEA TIME TIPS!
