Having an infant in the Neonatal Intensive Care Unit is full of a flurry of emotions overshadowed by anxiety. An admission to the NICU is not anticipated and therefore can be a very trying experience. Explaining the hospitalization of the baby to the other children in your home can be challenging. The baby's siblings may be too young to understand, fearful of hospitals, or even upset that you are spending more time at the hospital

It is best read together, ideally before a visit to the NICU. In addition to visiting the hospital, establish some routines and alone time with your children at home to help ease the transition as your new baby grows and heals in the intensive care unit.

awaited little boy is changing from the happy toddler they knew into an introverted less verbal boy. This story, as seen through the eyes of a sibling, expresses the confusion and pain a family feels when a diagnosis of autism is made. The story also highlights the beauty of accepting someone, even though they may be different, and realizing that, sometimes, a dream doesn't end, it just needs to be adjusted. A diagnosis of autism impacts all family members. Adults are able to speak with professionals, explore the internet, and speak with others in similar situations. Young children have less options. It is frightening for them to see the adults in their lives in distress with little

There are no celebrations of her sister's birth. Her family is sad. Her mother cries a lot. Each time that Olivia asks questions she is only told to go to play with her doll. As the story concludes Olivia reminds us all of what we should already know, a child is more than a diagnosis. My Sister is Special, My Sister Has Down Syndrome showcases the resiliency of children who can come to a place of acceptance so much sooner than adults. When a child is born with a disability, parents mourn what could have been. They may be in shock and grieving, needing time to adjust. When there are other children in the family, parents may be too involved in their own grief to understand the impact that this unexpected occurrence is having

on the other children. Children see the adults grieving and stressed and may not understand what is happening. They too may have been preparing for the birth of their sibling and what may be taking place is not what they expected either. This book is written by a Child Development Specialist to assist families in similar situations.
